# REPORT

## OF

# THE POSTMASTER-GENERAL.

POST-OFFICE DEPARTMENT,  
Washington, D. C., November 28, 1888.

SIR: I have the honor to present a report of the transactions of this Department for the fiscal year ended June 30, 1888.

As will be seen by the tabulated statements herewith submitted, the volume of business of the postal service is rapidly expanding. The average increase of business in the salary and allowance division since 1880 is 561.9 per cent., and since 1885, 108.2 per cent.

The number of postmasters appointed during the year ended June 30, 1888, was 12,288, of which 6,521 were upon resignations and commissions expired, 1,244 upon removals, 659 to fill vacancies by death, and 3,864 on establishment of new post-offices.

One thousand six hundred and forty-five post-offices were discontinued during the year, and the names and sites of 1,493 offices were changed, retaining the incumbents.

*Statement of postmasters appointed during each fiscal year between June 4, 1863, and June 30, 1888, with number of post-offices in operation at the end of each fiscal year mentioned, as well as the number discontinued each year.*

For the year ended June 30—	Number of post-offices established.	Number of post-offices discontinued.	Total number remaining in operation.	Appointments on resignations and commissions expired.	Appointments on removals and suspensions.	Appointments on changes of names and sites.	Appointments on deaths of postmasters.

The total of allowances for clerk-hire, rent, fuel, light, and miscellaneous and incidental items, including furniture, advertising, and salaries of Presidential postmasters, for the year ending June 30, 1888, amounted to \$11,077,498.76.

**Presidential Postmasters.**—The adjustment of July 1, 1888, established 97 offices in the first class, 497 in the second class, and 1,908 in the third class, making a total of Presidential offices at the date last named of 2,502.

The gross receipts which accrued at the Presidential offices for the four quarters ended March 31, 1888, amounted to \$38,498,987.87, an increase of \$3,322,826.13, as compared with the adjustment of July 1, 1887.

There has been an increase of \$322,500 in the amount required for the salaries of Presidential postmasters over the amount required for 1887.

**Review of Postmasters' Salaries.**—The review of salaries under the act of March 3, 1883, as construed by the Attorney-General under date of February 13, 1884, and June 14, 1884, has been completed. The total number of claims reviewed was 68,725. Of this number 26,238 were allowed, involving the sum of \$1,221,009.69 for additional compensation. Appropriations for the payment of these claims have been made by the Congress from time to time from July 7, 1884, to October 19, 1888, inclusive.

**Allowances for Rent for Third-Class Offices.**—The act of Congress approved July 24, 1888, authorized allowances for rent, fuel, and light for third-class post-offices, as frequently recommended by the Department. On the 1st of July, 1888, 1,908 offices were assigned to the third class, and under the operation of existing law 80 additional offices were assigned to the third class from October 1, 1888, making the total number 1,988.

The limitations of the said act, by which the maximum annual rental for an office of the third class was fixed at \$300, and the maximum allowance for fuel and light at \$60, should, in my opinion, be repealed, as the best interests of the service require discretionary authority in the head of the Department to fix these allowances, having regard to local needs.

**Classification and Salaries of Clerks in the Larger Post-Offices.**—Attention is requested to the recommendation of the First Assistant Postmaster-General regarding the classification and salaries of clerks attached to the larger post-offices. The results obtained by a commission on this subject are embodied in a report printed in the report of my immediate predecessor for the year ended June 30, 1887, at pages 177 to 182, inclusive. The subject calls for the attention of the Congress.

While the free-delivery service, with its 358 offices, has received marked legislative consideration, providing careful classification and

promotion of carriers, and providing substitutes for vacations and holidays, and a limitation in the appropriation for but eight hours' service per day, at a total cost for that service during the current fiscal year of about seven millions of money, there has been provided for the cost of clerks in all the post-offices of the United States but \$5,950,000. The total increase of free-delivery offices for the current year will not exceed 40.

**Division of Post-Office Supplies.**—This division furnishes all stationery supplies for the Post-Office Department; and stationery, wrapping paper, facing slip paper, twine, canceling, postmarking and rating stamps, canceling ink, pads, blanks, and account books to all post-offices of the first and second classes, the nine superintendents of divisions of the Railway Mail Service, and the twelve post-office inspectors in charge.

The total appropriation for wrapping-paper was \$44,000; the expenditures were \$43,997.55, leaving a balance unexpended of \$2.45; value of inventory at close of year, \$6,576.54. Twenty-five thousand four hundred and sixty reams of wrapping and facing slip paper were issued, as against 21,747 reams for the previous year, an increase of 3,713 reams, or about 17 per cent.

The appropriation for twine was \$80,000; expenditures \$71,175.77, leaving a balance of \$8,824.23; value of inventory, \$10,437.40. There was an increase of issue over the previous year of 54,252 pounds, or 7 per cent.

The appropriation for letter balances and scales was \$17,000; expenditures, \$16,999.92, leaving a balance of 8 cents; value of inventory, \$578.41. Seven thousand one hundred and forty-seven scales were issued, as against 2,180 the previous year, an increase of 5,867, or 273 per cent. This increase was caused by the inspection of fourth-class offices, a large proportion of which were found to be without scales; and from the fact that no contracts were made the previous years for certain classes of scales, the orders for which were held up and filled from the appropriation for the year ended June 30, 1888.

The appropriation for stamps, ink, and pads was \$30,000; the expenditures, \$29,999.71, leaving a balance of 29 cents; the value of the inventory was \$3,510.73. There was an increase in issues over the previous year of 22,363 stamps (128 per cent.), 16,119 pads (155 per cent.), and 9,004 pounds of ink (68 per cent.). The recommendation was made that a committee be appointed to investigate the question of canceling-ink. (See report of Division of Post-Office Supplies.)

The appropriation for stationery for offices of the first and second classes was \$50,000; the expenditures, \$49,836.73, leaving a balance of \$163.27; the value of the inventory was \$29,695.84. The purchases of the previous year amounted to \$46,456.19, showing an excess of purchases for the present year of \$3,380.54, or 7 per cent.; the inventory of the previous year amounted to \$22,658.94, making the year's increase

\$7,036.90, or 31 per cent. This shows a saving to the Department on this appropriation of \$3,656.36.

The appropriation for stationery for the Post-Office Department was \$12,000; expenditures, \$9,875.72, leaving a balance of \$2,124.28; the value of the inventory was \$3,964.48. The amount expended the previous year was \$7,514.35, showing an increase this year of \$2,361.37, or 31 per cent. The inventory of the previous year amounted to \$3,065.29, showing an increase of stock at the close of the present year of \$899.19, or 30 per cent.

The increase of the demands for printing and binding is shown by the following figures: 66,556,830 blanks and 179,713 books were furnished by the Government Printer for the year ended June 30, 1888, as compared with 60,468,900 blanks and 112,403 books for the previous year, an increase this year of 9 per cent. in blanks and 60 per cent. in books. The recommendation is made that a branch of the Government Printing Office be established in this division, or that an appropriation of \$10,000 be asked for to properly equip the stationery section of this division with presses and material for doing work required immediately. (See report.)

The recommendation is made that this division be made an independent division. (See Report.)

**The Free-Delivery Service** was, during the last fiscal year, extended to 169 additional places under the act of January 3, 1887, making a total of 358 free-delivery cities. The number of carriers was increased from 5,310 to 6,346, adding 1,036 to the number. The whole number of pieces of mail handled by the carriers was 2,630,861,758, against 2,234,564,656 the preceding year, showing an increase of 396,297,102 pieces, or 17.73 per cent. The percentages of increase were as follows: Letters delivered, 11.53; newspapers, etc., delivered, 25.22; letters collected, 23.19; postal-cards collected, 31.69; newspapers, etc., collected, 25. The total cost of the service was \$5,422,356.38, being an increase of \$803,664.29, or a percentage of 17.40 over the preceding year.

There is a largely increased estimate for the fiscal year ending June 30, 1890, called for by the eight-hour law. The Superintendent estimates that the amount required to carry out the provisions of that law will approximate about \$1,462,000, of which amount \$1,345,000 is for the pay of carriers, including promotions and \$117,000 for incidental expenses, additional carriers, and pay of substitutes for carriers on vacation. If the law had not been enacted the appropriation required for the next fiscal year would have been about \$6,538,000, whereas the estimate is \$8,000,000. I append full details of this estimate, as prepared by the Superintendent of the Free Delivery System, with a statement of my allowance of \$8,000,000, after careful consideration.

Independent of the eight-hour law, with the present number of offices, and the usual number of additional offices to be added annually, the annual increase would be about \$500,000.

The amount of postage on local matter at these offices amounted to \$7,721,689.16, an increase of \$1,030,435.47 over the preceding year, being \$2,299,332.80 in excess of the entire cost of the service.

**Fourth-Class Post-Offices.**—I have the honor to recommend a revision of the law regulating the compensation of fourth-class postmasters by which the compensation shall be permitted which was intended by the act of Congress fixing the standard. Through all reductions of postage rates the amount of postage received has furnished the standard of compensation to these officials. They number 54,874. There has been no re-adjustment of the rate of compensation in harmony with the reductions in postage rates; increased labor has been imposed by increased business resulting from lower postage, which at the same time has reduced compensation.

**Efficiency and Criminal Statistics and Recommendations Thereon.**—The report of the Chief Inspector shows that during the year 791 persons, officials, employés of the Department, and others, were arrested for various offenses against the postal laws and regulations. The number includes 90 postmasters, 26 assistant postmasters, 32 post-office clerks, 12 railway postal clerks, 34 letter carriers, 15 mail carriers, 9 other employés, 123 burglars of post-offices, and 380 others for various offenses—these subject to the jurisdiction of the courts of the United States. Forty-nine burglars and 23 other offenders were arrested whose cases were subject to the jurisdiction of the State courts. One hundred and seventy-one of these offenders were convicted, 35 acquitted or discharged; 510 are awaiting trial.

Attention is invited to the statement of the Chief Inspector, in his report, that the crime of burglary of post-offices is increasing at a rate to create apprehension. Six hundred and eighty-three robberies of post-offices were reported during the year, and in spite of the best efforts of the inspector's force, only 172 burglars were arrested. The Chief Inspector is of opinion that the payment of a small reward on the conviction of the guilty parties would remedy this evil to a great extent. He asks an appropriation of \$10,000 for this purpose, to be expended by the direction of the Postmaster-General, and I so recommend and urge.

**Cases for the Action of Inspectors.**—These are classified as follows:

*Class A.*—Complaints of depredations upon, and all sorts of irregularities in, the domestic registered mail.

*Class B.*—Similar complaints in the domestic ordinary mail.

*Class C.*—All sorts of miscellaneous complaints and inquiries, not strictly mail depredations.

*Class F.*—Complaints and inquiries concerning foreign mail, both ordinary and registered.

*Class A.*—It is gratifying to note that in the first class there has been a marked improvement over the past year. The number of complaints received is smaller, and the percentage of ascertained loss much less.

Only 4,820 complaints were received as against 5,286 made last year, while the total number of pieces registered increased 1,042,819. The total number of losses sustained, as shown by investigation and a careful estimate, was 845, or one piece out of every 15,334 pieces handled. Last year the actual loss was 1,065, or one piece out of every 11,187. These figures show a much better service this year than last. These losses were from all causes—accidents, burnings of cars and post-offices, and other casualties, and only 213 were the result of theft by dishonest officials.

*Class B.*—In this class 44,917 complaints were received and 35,828 investigated. In view of the figures showing the increased number of postage-stamps sold during the year, demonstrating the great increase of mail handled, these figures show an improvement in the service. In 6,570 of these complaints investigated the claim of loss was found to be false. The letters or packages were either not mailed or were subsequently delivered.

*Class C.*—At the request of my predecessor an additional appropriation of \$100,000 was made for the inspection service. This was done in order that the smaller post-offices, those of the fourth class, might be examined, and the postmasters instructed by a personal visit of an inspector. This had not previously been done systematically. During the past year 24,889 such offices were carefully inspected. Much good has resulted, as the Department records show. Greater promptness in making deposits and reports to the Department has resulted, and a marked increase in its receipts. The inspectors collected or caused to be deposited in the Treasury on account of cases of Class C \$177,525.12.

For the good of the service in all its branches this additional appropriation of \$100,000 should be renewed for the coming year.

*Class F.*—The total number of complaints in this class was 10,855, a considerable increase over any previous year, but it is also noticed that the number of actual losses is less in proportion to the number of complaints treated. Six thousand six hundred and eighty-three cases related to the registered mail, 3,802 to the ordinary mail, and 370 to miscellaneous complaints. Actual loss was sustained in 202 cases relating to registered matter.

The carefully prepared tables at the end of the Chief Inspector's report will prove instructive, as they show by comparison the workings of the inspection office for the past few years and its comparative cost.

The following table is a comparative statement of the work of the inspectors of the Department upon crime and fraud in and against the service for the years 1884, 1886, 1887, and 1888:

	1884.	1886.	1887.	1888.
Arrests caused by post-office inspectors .....	756	660	773	791
A cases made and referred to inspectors .....	4,238	4,281	5,286	4,820
B cases so referred .....	33,668	37,956	42,096	41,917
C cases so referred .....	4,870	13,544	18,260	34,250
F cases treated and referred to inspectors .....	7,634	7,773	9,362	10,855
Total .....	50,410	63,554	75,009	94,842
Cases investigated and closed:				
A cases .....	4,590	6,583	5,680	4,577
B cases .....	28,930	58,262	42,017	45,678
C cases .....	5,223	12,345	14,514	31,545
F cases .....	8,391	7,173	8,774	10,044
Total .....	47,134	84,363	70,985	91,844
Money recovered from depredators on mails .....	\$18,198 81	\$14,522 23	\$11,548 13	\$12,347 57
Money recovered from post-office employés and turned into the United States Treasury .....	26,927.11	100,991.41	242,403.72	177,525.13
Total amount recovered .....	45,125.92	115,513.64	253,951.85	189,872.69
Total amount recovered since March 4, 1885, from postmasters on false returns * .....				604,464.10
Amount appropriated .....	200,000.00	200,000.00	200,000.00	300,000.00
Total amount of money expended .....	187,186.00	194,955.39	197,624.63	†291,406.46
Cases on hand at end of each fiscal year .....		13,445	18,016	†21,014

\* See Table A as to date of appointment of such postmasters.

† Estimated.

## The following is table A.

Number of orders made by the Postmaster-General from March 4, 1885, to June 30, 1888, requesting the Auditor to re-adjust the compensation of postmasters who rendered false returns of business, in order to increase their compensation, 521.

Amount the Auditor was requested to charge back, \$246,624.60.

Number of orders made since March, 4, 1885, involving the accounts of postmasters for false returns, appointed prior to March 4, 1885, 449, or 87 per cent.

Number of orders made since March 4, 1885, involving the accounts of postmasters for false returns, appointed after March 4, 1885, 72, or 13 per cent.

Amount recovered by the orders involving accounts of postmasters appointed prior to March 4, 1885, \$239,074.43, or 97 per cent.

Amount recovered by the orders involving accounts of postmasters appointed after March 4, 1885, \$7,550.17, or 3 per cent.

*Statement showing the increase in the issues of postage-stamps, stamped envelopes, newspaper wrappers, letter-sheets, and postal-cards during the year ending June 30, 1887, over the year ending June 30, 1885.*

Period.	Number.	Value.
Year ending June 30, 1887 .....	2,503,170,139	\$45,619,680.65
Year ending June 30, 1885 .....	2,142,678,890	40,460,316.04
	*360,491,249	†6,159,364.61

Number of pieces of registered matter handled during the year ending June 30, 1887 ..... 12,524,426  
 Number of pieces of registered matter handled during the year ending June 30, 1885 ..... 11,043,251

†1,481,165

There has been no increase in the clerical force in the office of the Third Assistant Postmaster-General during the years 1886, 1887, and 1888.

\* Or 16.8 per cent.

† Or 15.2 per cent.

† Or 13.4 per cent.

**Claims of Postmasters for Losses.**—The report of the Assistant Attorney-General exhibits the action, with the reason therefor, upon the several claims of postmasters for losses of money-order funds, postage-stamps, stamped envelopes, newspaper wrappers, and postal-cards resulting from burglary, fire, or other unavoidable casualty, and of money-order funds lost while in transit.

During the year 534 claims were considered, 449 were allowed in whole or in part, and 86 were wholly disallowed. The allowed claims amount in the whole to \$23,653.02. The amount of claims wholly disallowed is \$6,442.44. The recapitulation to the accompanying report gives full details as to these losses, which are \$16,947.53 less than for the previous year.

The amendment to the act of 1882, approved May 9, 1888, has opened the door for the admission of a large number of claims for "postal funds," and many were filed prior to the expiration of the fiscal year, but not early enough for action during the year.

**Safety of Registered Mail.**—A consideration of the following table and comparison of the results for the different years proves conclusively that the safety of the registered mail has materially and steadily improved for the past three years, and that its present treatment is one of the strongest evidences of reform in the mail service. In proof of this claim, attention is called to the fact that the number of complaints this year has decreased 466, or 8 per cent.; the number of losses has decreased from 220 to 20 per cent., while the number of pieces handled has increased 774,461, or 6½ per cent.; and the ratio of pieces lost to pieces handled has decreased from 1 in 11,187 to 1 in 15,016—a decided improvement. It is thus shown in every respect that the registered mail is more safely handled, more accurately delivered in 1888 than in 1887 or any previous years.

TABLE B.—*Statistics relating to the domestic registered mail for the fiscal years ending June 30, 1884, 1886, 1887, and 1888.*

Fiscal year.	Complaints of loss, rifling, missent, and other depredations or accidents on or to the domestic registered mail.	Total lost each year.			Total number of letters and packages registered each year.	Total number of letters and packages handled to one piece lost.
		Ascertained by investigation.	Estimated on unfinished business.	Total.		
1884....	4, 238	516	743	1, 259	10, 750, 155	8, 538
1886....	4, 281	1, 042	.....	1, 042	11, 102, 607	10, 655
1887....	5, 286	1, 065	.....	1, 065	11, 914, 792	11, 187
1888....	4, 820	565	280	845	*12, 689, 253	*15, 016

\* Estimated on the basis of 6½ per cent. increase over preceding year, which is probably below the actual increase.

**The Volume of ordinary mail has largely increased,** as shown by the increased revenue of the Department from the sale of postage-stamps. The total number of pieces handled has doubled since

1883, and the revenue on pieces handled, if at the rate of 1883 (act reducing postage), would now be upward of \$70,000,000 per annum.

**The Money-Order System.**—The report of the Superintendent of the Money-Order System exhibits considerable increase in both the domestic and international orders, and in the postal-notes issued as well as paid.

The number of money-order offices at the close of the year was 8,241, and the number of postal-note offices 311.

The domestic orders issued numbered 9,959,207, of the aggregate amount of \$119,649,064.93, while the orders paid and repaid were in excess of that sum by \$94,280.27.

There were issued 6,668,006 postal-notes, amounting to \$12,134,459.04 and the notes paid were only \$29,577.49 less in value.

There were 759,636 orders drawn for payment in foreign countries, reaching the large total of \$11,293,870.05, while 236,992 orders of the value of \$1,169,675.64 were transmitted from abroad for payment in the United States.

The increase in the number of domestic orders issued was nearly 8 per cent., and in the amount thereof nearly 2 per cent. In the postal-notes issued the increase in number was nearly 6 per cent., and in amount over 3 per cent., while in the international orders the increase in the number issued was over 23 per cent., and in the amount issued nearly 25 per cent.; in the number paid and repaid nearly 7 per cent., and in the amount paid and repaid nearly 4 per cent.

It is interesting to note that the total volume of business, including domestic and international orders and postal-notes, comprised 17,386,849 issues, amounting to \$143,077,394.07, and 16,816,772 payments and repayments, of the value of \$136,055,662.42, an increase in issues over the preceding year of 1,231,715 transactions, or nearly 8 per cent., and an increase in amount of \$4,810,378.06, or about  $3\frac{1}{2}$  per cent.

Notwithstanding the very large sum transmitted in the mails by money-order offices to their depositories, namely, \$103,129,930.74, only 91 cases of loss were reported, amounting to \$6,368.43.

It continues to be a source of gratification that the erroneous payments of money-orders bears such small ratio to the total extent of the transactions in payments. For the last year only 1 in every 161,739 orders was reported as improperly paid.

The gross revenue from the domestic business amounted to \$541,272.77; from the international business, \$139,159.68; and from the postal-note business, \$117,885.38; a total of \$798,317.83—a sum more than sufficient by \$43,016.21 to meet all such expenditures as, under existing practice, are paid, for account of the money-order system, from appropriations.

This net profit of \$43,016.21, the Superintendent shows, is likely to be increased somewhat during the current year by reason of a number of additional conventions, executed with foreign countries, which establish a more advantageous rate of accounting by each country to the

other, such rate being fixed at one-half instead of three-fourths of 1 per cent. on the face value of the orders issued. The estimated additional annual profit from the conventions already signed to that end is over \$9,500, while others in process of negotiation, if satisfactorily concluded, will result in a further profit of about \$3,300 per annum.

I fully concur in the Superintendent's recommendation for the increase of the maximum amount of the international money-orders from \$50 to \$100, so as to make them uniform in this respect with the domestic orders. The change, it is apparent, will result in the additional advantage of reducing expenses in post-offices, on account of clerk hire, as well as in the Department on account of blank forms, by making one order take the place of two for sums from \$50 to \$100.

A convention for the exchange of money-orders with Denmark, a copy of which is appended to the Superintendent's report, was concluded by my predecessor to take effect January 1, 1888, so that money-order business is now transacted directly with twenty-three foreign countries.

**Dead Letter Office.**—There were received during the year, 6,217,876 pieces of original mail matter, an increase of 882,513 over the number received the previous year. This number was composed of the following general classes: 4,993,290 domestic mailable letters, 576,727 domestic unmailable letters; 499,831 letters, and 60,121 parcels of printed matter, samples, etc., which originated in foreign countries; 74,648 parcels of domestic third and fourth class matter of obvious value, and 22,112 registered articles.

There were restored to owners 749,515 pieces, unopened, including matter of foreign origin.

Of the number of letters opened, 20,437 were found to contain money, amounting to \$35,245.38; 23,638 contained negotiable paper representing a money value of \$1,343,519.52; 3,697 contained postal-notes to the value of \$5,798.31; 37,619 contained receipts, paid notes, and other miscellaneous papers; 119,246 contained postage-stamps; 40,331 contained photographs. These letters were duly recorded, and 223,881, or about 91 per cent., were restored to owners.

There was deposited in the United States Treasury \$8,511.44 separated from dead letters which could not be restored to owners, together with \$2,023.35 realized from the annual sale of unclaimed articles.

**Topographer's Report.**—Referring to the report for the fiscal year ended June 30, 1883, I may state the following: The printing and delivery of the post-route sheets by the contractor were very satisfactory. Five thousand five hundred and eighty post-route maps were received during the fiscal year ended June 30, 1888; 229½ maps mounted and 340 in sheets were sold, realizing the sum of \$1,885.50; 748½ maps mounted and 3,101½ in sheets were officially distributed; 489½ maps mounted and 260½ were given away. All post-route sheets becoming useless are consigned to the disbursing clerk and superintendent to be sold as waste paper. The effective force in this branch of the Depart-

ment numbers 25 employés, 17 males and 8 females. In order to provide for the renewal of maps the services of an additional draughtsman will be required. Owing to the worn condition of certain of the lithographic stones, a few will have to be purchased, as set forth in the estimates.

## FINANCIAL STATEMENT.

**Statement of Financial Operations.**—In continuation of the plan adopted in the last annual report, I present the following condensed statements of the revenue, expenditure, and cost of the postal service for the fiscal years ending June 30, 1886, 1887, and 1888, charging to the two former years whatever expenditures have been made on account thereof since their termination, and to all three their estimated liabilities, respectively, now outstanding, as well as the amounts earned by the Pacific railroad companies and credited to them on the books of the Treasury Department.

### FISCAL YEAR ENDING JUNE 30, 1886.

#### REVENUE.

1 Ordinary postal revenue.....	\$43,597,871.08
2. Revenue from money-order business.....	350,551.87
Total gross receipts.....	43,948,422.95
Deduct amount charged to bad debts.....	12,174.25
Leaves total revenue.....	43,936,548.70

#### EXPENDITURES AND LIABILITIES.

##### Expenditures:

From July 1, 1885, to September 30, 1886 .....	\$50,627,553.37
From October 1, 1885, to September 30, 1887 .....	211,881.50
From October 1, 1887, to September 30, 1888 .....	12,020.34
	<hr/> 50,851,455.21

##### Liabilities:

Estimated amount of outstanding indebtedness for various objects on account of the year .....	\$286.40
Amount due for transportation on Pacific railroads, for which no appropriation was made.....	251,101.61
	<hr/> 251,388.01
	<hr/> 51,102,843.22

Deficiency in revenue .....	7,166,594.52
-----------------------------	--------------

## COST OF POSTAL SERVICE.

Amount of expenditures and liabilities as above .....	\$51,102,843.22
Amount certified to the Secretary of the Treasury for credit to Pacific railroads—	
From July 1, 1885, to September 30, 1886 .....	\$1,112,138.40
From October 1, 1886, to September 30, 1887....	391.22
From October 1, 1887, to September 30, 1888....	142.38
Total amount certified.....	1,112,672.00
Total cost of the service.....	52,215,515.22
Excess of total cost of postal service over revenue.....	8,279,266.52

## FISCAL YEAR ENDING JUNE 30, 1887.

## REVENUE.

1. Ordinary postal revenue.....	48,118,273.94
2. Receipts from money-order business.....	719,335.45
Gross revenue.....	48,837,609.39

## EXPENDITURES AND LIABILITIES.

## Expenditures :

From July 1, 1886, to September 30, 1887 .....	\$52,391,677.43
From October 1, 1887, to September 30, 1888 ....	368,160.40
	52,759,837.83

## Liabilities :

Amount of outstanding liabilities for various objects on account of the year.....	\$75,000.00
Estimated amount due for transporta- tion on Pacific railroads, for which no appropriation was made.....	300,009.87
	375,009.87

Total actual and estimated expenditures for the service of the year..	53,134,847.70
Deficiency in revenue.....	4,297,238.31

## COST OF POSTAL SERVICE.

Amount of actual and estimated expenditures, as shown above .....	53,134,847.70
Amount certified to Secretary of the Treasury by the Auditor for transportation of the mails on the Pacific railroads, and by law not charged to the appropria- tions for the postal service—	
From July 1, 1886, to September 30, 1887 .....	\$1,187,027.33
From October 1, 1887, to September 30, 1888.....	11,241.72
	1,198,269.05
Total cost of the service.....	54,333,116.75
Excess of total cost of service over amount of revenue .....	5,495,507.36

FISCAL YEAR ENDING JUNE 30, 1888.

## REVENUE.

1. Ordinary postal revenue.....	\$51,896,858.96
2. Receipts from money-order business.....	798,317.83
Gross revenue.....	<u>52,695,176.79</u>

## EXPENDITURES AND LIABILITIES.

## Expenditures:

Amount expended to September 30, 1888, on account of the year ending June 30, 1888..... \$55,795,357.84

## Liabilities:

Amount of indebtedness for various objects certified to Auditor and not yet reported for payment (partly estimated).....	\$375,000.00
Estimated amount of indebtedness not yet reported to Auditor (railroad service).....	404,830.25
Estimated amount due for transportation on Pacific railroads, for which no appropriation was made.....	307,215.75
Estimated amount of indebtedness incurred, for which appropriation will be asked of Congress .....	3,000.00
	<u>1,090,046.00</u>

Total actual and estimated expenditures for the service of the year.. 56,885,403.84

Estimated amount of deficiency of revenue to be supplied out of the General Treasury on account of the service of the year ..... 4,190,227.05

## COST OF POSTAL SERVICE.

Amount of actual and estimated expenditures, as shown above.....	\$56,885,403.84
Amount certified to the Secretary of the Treasury by the Auditor for transportation of the mails on the Pacific railroads, and by law not charged to the appropriation for the postal service.....	<u>1,240,600.83</u>
Total estimated cost of the postal service for the year.....	58,126,004.67
Deduct amount of gross revenue, as shown above.....	<u>52,695,176.79</u>
Leaves excess of estimated cost of service over amount of revenue....	5,430,827.88

**Estimated Revenue for the Fiscal Years Ending June 30, 1889 and 1890.**—The increase in the ordinary revenue (excluding revenue from money-order business) for the fiscal year ended June 30, 1887, was at the rate of 10.3 per cent. over the revenue of the previous year, and the increase for the year ended June 30, 1888, was at the rate of 7.9 per cent. The receipts for the quarter ending June 30—the last quarter of the past year—were somewhat smaller than had been estimated by the Department; but this unexpected falling off in business it is thought will not continue during the present year, for

special returns already received by the Department from thirty of the larger cities for the quarter ended September 30 show an increase of over 9 per cent. In estimating, therefore, for the current and coming years, it is not unreasonable to assume that an increase of 9 per cent. for each year will be maintained. Upon this basis the gross revenue for the years ending June 30, 1889 and 1890, is estimated at \$57,392,576.26 and \$62,508,658.12, respectively, as appears from the following statements:

## FISCAL YEAR ENDING JUNE 30, 1889.

Amount of ordinary postal revenue for the fiscal year	
ending June 30, 1889.....	\$51,896,858.93
Add 9 per cent. for increase.....	4,670,717.30
	<hr/>
Gives estimated amount of ordinary postal revenue for fiscal year	
ending June 30, 1889.....	\$56,567,576.26
Amount of estimated revenue from money-order business.....	825,000.00
	<hr/>
Total estimated gross receipts for the year ending June 30, 1889.	57,392,576.26

The amount appropriated for service of this year is \$60,860,233.74, or an excess over the amount of revenue estimated above of \$3,467,657.48, which will be drawn from the General Treasury should the total amount appropriated be needed.

## FISCAL YEAR ENDING JUNE 30, 1890.

Estimated amount of ordinary postal revenue for the	
fiscal year ending June 30, 1889 .....	\$56,567,576.26
Add 9 per cent. for increase.....	5,091,081.86
	<hr/>
Gives estimated amount of ordinary revenue for the fiscal year ending	
June 30, 1890 .....	\$61,658,658.12
Amount of estimated revenue from money-order business.....	850,000.00
	<hr/>
Total estimated gross receipts for the year ending June 30, 1890.	62,508,658.12

The probable amount of expenditure to be made in carrying on the business of the postal service for the year ending June 30, 1890, as shown by estimates submitted to the Secretary of the Treasury, is \$66,812,073.02. The deficiency to be supplied from the general Treasury is, therefore, \$4,303,414.90.

**New Form of Quarterly Postal Account.**—As a matter connected with the affairs of this office, I take pleasure in reporting that the use by postmasters of the new form of quarterly postal account and the record of postal business, adopted shortly after the commencement of the last fiscal year, has been satisfactory, both as regards the transaction of business at post-offices and the examination and audit of accounts in the office of the Auditor. I understand that fewer delinquencies as to the prompt and correct rendition of accounts by postmasters have occurred during the year than was formerly the case, and that the Auditor has been able to settle accounts with greater exactness and with fewer outstanding cases at the end of each quarter than ever before.

As time goes on the new system will probably work still more satisfactorily.

**Work of Signing Drafts and Warrants.**—Recommendation is made that the act of Congress of February 25, 1882, be so modified as to allow the Acting Third Assistant Postmaster-General to sign warrants on the Treasury during the absence of the Third Assistant Postmaster-General.

**The Special-Delivery System.**—The special delivery system has met with a reasonable amount of patronage during the past fiscal year and has, I am persuaded, been conducted by postmasters generally with increased efficiency. I present the following statement of the year's business:

For the whole country the Auditor reports that the amount of fees allowed in postmasters' accounts during the year for special delivery is \$109,015.64. Allowing for cases where no fees were paid, as, for example, in cases of delivery by letter-carriers or other salaried employés of post-offices, these figures would indicate a total of about 1,434,400 special-delivery letters received during the year at all offices, the special-delivery stamps on which would amount to \$143,440. Deducting from this the amount allowed postmasters, and there is left a total profit to the Government on the year's business of over \$34,424.

At the letter-carrier offices, from which exact returns have been received, the business of the year will appear from the following statement:

(1) The total number of pieces of all matter received for special delivery at all the letter-carrier offices was 1,220,276, of which 899,494, or nearly 74 per cent., came through the mails from other than the offices of delivery, and 320,782, or 26 per cent., were of local origin.

(2) The total number of pieces delivered by the regular messengers was 1,164,668, or over 95 per cent. of the whole, leaving 55,608, or less than 5 per cent., as the number delivered by letter-carriers or other salaried employés, including the few where delivery was impossible.

(3) The value of the special-delivery stamps on the pieces received was \$122,027.60. The amount of special-delivery stamps sold at the letter-carrier offices, ascertained from returns made by postmasters to this office, aggregates \$92,149.20.

(4) The average number of messengers employed during each month of the year was 768.

(5) The average time consumed in the delivery of matter after reaching the respective offices of destination was twenty-one minutes.

Statistics in detail of the business at each of the letter-carrier offices in existence on the 1st of July, 1888, are given in Table No. 16 of the Third Assistant Postmaster-General's report.

The recommendation made in the last annual report concerning the establishment of the pneumatic-tube system, or some equivalent under-

ground means of rapid transit, for special-delivery messages at a few of the prominent cities of the country, is renewed. I have received information in various ways during the year which convinces me that at least some investigation of the matter is desirable.

**Division of Postage-Stamps, Stamped Envelopes, and Postal-Cards.**—During the year there were issued to postmasters, through the work of this division, of the various kinds and denominations of stamped paper, 2,700,635,170 pieces, valued at \$50,636,321.84, as against a total of 2,503,170,139 pieces, valued at \$46,619,680.65, for the preceding year, an increase of 7.89 per cent. in number and 8.62 per cent. in value.

The several issues, by aggregates, are as follows :

	Number.	Value.
Ordinary adhesive postage-stamps.....	1, 867, 173, 140	\$36, 293, 183. 00
Special-delivery stamps.....	1, 331, 790	133, 179. 00
Newspaper and periodical stamps.....	3, 464, 413	1, 588, 425. 00
Postage-due stamps.....	10, 805, 572	283, 954. 00
Stamped envelopes, plain.....	186, 741, 000	3, 634, 508. 44
Stamped envelopes, printed request.....	196, 625, 250	4, 242, 611. 10
Newspaper wrappers.....	50, 269, 500	581, 804. 50
Letter-sheet envelopes.....	2, 427, 000	55, 821. 00
Postal-cards.....	381, 797, 500	3, 819, 835. 00
Total .....	2, 700, 635, 170	50, 636, 321. 84

**Postage on Second-Class Matter.**—The weight of second-class matter sent in the mails during the fiscal year ended June 30, 1888, not including matter circulated free within the county of publication, was 143,662,918 pounds, or over 71,831 tons, and the amount of postage collected was \$1,436,629.18. This is an increase of 13 8 per cent. as compared with the business of 1887.

The number of post-offices at which second-class matter was mailed is 7,463, an increase over the previous year of 463, or 6.6 per cent. The number of new publications admitted to the mails during the year is 3,076.

Collections were made during the year to the amount of \$1,954.09 from publishers and news agents for matter mailed at the second-class rate of postage which should have been charged at a higher rate. This is an increase of \$1,831.72 over the amount collected for like irregularities during the preceding year.

**Use of Stamped Envelopes.**—The Third Assistant Postmaster-General calls attention to the increasing use of stamped envelopes—particularly of the special-request envelopes—and gives a number of reasons why they should be used, wherever practicable, in preference to adhesive postage stamps, to which I call attention.

**Reduction in the Cost of Stamped Envelopes.**—The present contract for supplying the Department with stamped envelopes and newspaper wrappers was made in 1886, the contract term beginning on the 1st of October of that year. The amount saved under this con-

tract, as compared with the prices of the previous contract for the nine months ending June 30, 1887, was shown by the last annual report to be \$119,483.77; the amount similarly saved during the fiscal year ending June 30, 1888, is \$163,475.60, making a total saving since the beginning of the contract of \$282,964.37. The items of saving during the past year are shown by the following table:

Quality.	Number of envelopes.	Cost under contract of—		Saving.	
		1882.	1886.	Amount.	Per cent.
First .....	328,048,600	\$733,585.90	\$594,823.09	\$138,762.81	13.9
Second .....	12,554,100	25,738.94	18,613.06	7,055.88	27.4
Third .....	4,729,500	8,217.08	4,918.89	3,298.19	40.1
Circulars .....	33,487,500	45,927.41	37,098.33	8,829.08	19.2
Newspaper wrappers .....	50,269,500	49,766.80	44,237.16	5,529.64	11.1
Total .....	*429,089,200	863,236.13	699,760.53	163,475.60	18.9

\* Four million five hundred and nine thousand and fifty envelopes, costing \$8,240, were issued during the year, for which no corresponding style was issued under the contract of 1882.

**Distributing Agencies for Stamped Paper.**—The Third Assistant Postmaster-General reports that the distributing agencies for postage-stamps, stamped envelopes, and postal-cards, as well as the sub-agencies at Chicago and Saint Louis, have worked satisfactorily during the year.

**Envelope Machine at Cincinnati Exposition.**—Just prior to the close of the fiscal year arrangements were made with the stamped-envelope contractors by which one of their most improved envelope machines was erected at the Centennial Exposition of the Ohio Valley and Central States, which began on the 4th of July, 1888, at Cincinnati, Ohio, and by which it has since been operated as a part of the display made by the Post-Office Department under authority of the act of Congress approved May 23, 1888. Up to the present time, in the operation of this machine 1,408,500 first-quality stamped envelopes of the No. 4½ size have been made, 850 of which have been sent to postmasters, and the remainder of which will be disposed of in the same way. These envelopes have all been made under the same safeguards as surround the manufacture of stamped envelopes at the regular manufactory at Hartford, Conn., and of course have been or will be paid for as they are issued upon the terms of manufacture prescribed by the standing contract with the Department. I understand that the operation of this machine has proved to be a very interesting feature of the postal exhibit at the exposition.

**Manufacture of Stamped Paper by the Government.**—The Third Assistant Postmaster-General urges that when the present contracts for the manufacture of postage-stamps, postal-cards, and stamped envelopes expire, the Government take the work into its own hands, manufacturing the articles at the Bureau of Engrav-

ing and Printing of the Treasury Department. The following provision is proposed as a part of the next Post-Office appropriation bill:

That upon the expiration of the present contracts for the manufacture of adhesive stamps and other stamped paper issued under the direction of the Post-Office Department, the work of making such stamped paper shall, if before that time considered advisable by the Postmaster-General and the Secretary of the Treasury, be performed by the Bureau of Engraving and Printing of the Treasury Department, under such regulations as the said officers shall jointly prescribe, the cost of the work to be relatively no greater than the cost under existing contracts, including the expenses of the several agencies: *Provided*, That the stamped paper hereinabove referred to shall always be supplied in sufficient quantities and kinds to meet the wants of the Post-Office Department, to be from time to time made known by the Postmaster-General or any proper official under him, and shall be turned over to that Department promptly as called for, and issued by its designated officials under methods of distribution similar to those now in operation. And payment for the stamped paper thus issued shall be made by warrants on the Treasurer of the United States in favor of the Bureau of Engraving and Printing, payable out of the appropriations now and to be hereafter made for the purpose, the bills to be rendered monthly by such Bureau, and to be regularly audited by the Sixth Auditor in the same manner as other bills for the postal service are audited: *And provided further*, That the Secretary of the Treasury is hereby authorized to provide whatever facilities are needed in the way of machinery, paper, gum, and other supplies to carry the above provision into effect.

**Division of Registration.**—The fees collected on registry business during the year ending June 30, 1888, amounted to \$1,125,154.40, which shows an increase of \$90,477.60, or 8.7 per cent. over the amount collected during the previous year. Everything considered this is a gratifying increase.

The classification and number of pieces of mail matter registered during the year are as follows:

Domestic letters .....	9,465,414
Domestic parcels.....	1,066,572
<b>Total domestic.....</b>	<b>10,531,986</b>
Foreign letters.....	674,607
Foreign parcels.....	44,951
<b>Total foreign .....</b>	<b>719,558</b>
Letters and parcels free—on Government business.....	2,425,625
<b>Aggregate .....</b>	<b>13,677,169</b>

**More space and better Mechanical Arrangements needed for the Registry Division in Government Buildings.**—The recommendation of the Postmaster-General in his last annual report that the Department be provided with an architect thoroughly familiar with post-office requirements to design the interior space and fixtures of post-offices, either under construction or to be leased, applies with especial force to the handling of registered matter in large post-offices. The custody and manipulation of the immense values involved and the different duties of recording, enveloping, sorting, pouching, checking, and receipting inward and outward with postal

clerks, carriers, and the public, so that all transfers may be made without objectionable contact and without danger, require much planning and forethought. In but few of the new post-office buildings have the best results been obtained in the adaptation of the architect's plans to the prosecution of post-office business, so that the work has frequently to be performed with surroundings far from safe or convenient, requiring more clerical labor and involving greater delays to the service and to the public. With correct plans, based on a broad experience, far better provision could have been made without added expense in the buildings. As far as it has been possible with such means as I could command, I have endeavored to remedy some of these defects by making and devising designs for registry space and fixtures at different post-offices; but so far as concerns new post-office buildings to be erected, to say nothing of the large number of new buildings to be leased, it will be impossible for me to give any such full attention to the plans, so far as they affect the registry service, as an architect could give who had familiarized himself with the needs of the different branches of post-office work.

As showing the great importance of perfecting and improving the registry system from a Government standpoint, attention is called to table No. 15, appended to Third Assistant Postmaster-General's report, which gives the Government values in the registered mail for the fiscal year as aggregating over \$911,000,000.

#### **Contrast with the Postal Service of Other Nations.—**

Statistics are given by the Third Assistant Postmaster-General showing that in cheapness of postage, gross revenue and expenditures, number of post-offices, extent of mail routes, mileage of mail service, and volume of mail matter transmitted, the postal system of the United States is the leading one of the world. In the amount of mail matter transmitted, the following are the statistics:

United States (year ending June 30, 1886):

Letters delivered, not including free letters on Government business .....	1, 769, 800, 000
Postal-cards delivered .....	370, 300, 000
Newspapers and periodicals delivered (second-class matter) .....	1, 063, 100, 000
Pieces of third and fourth class matter delivered (books, circulars, parcels of merchandise, etc. ....	372, 900, 000
Total .....	3, 576, 100, 000

(The calculations upon which the above statistics are obtained will be found in paper No. 17, appended to this report.)

Great Britain (year ending March 31, 1888):

Letters delivered, not including free letters on Government business ..	1, 512, 260, 000
Postal-cards delivered .....	188, 800, 000
Book packets and circulars delivered .....	389, 500, 000
Newspapers delivered .....	152, 300, 000
Parcels delivered .....	36, 732, 000
Total .....	2, 279, 532, 000

## Germany (year ending December 31, 1886):

Letters, not including free letters on Government business .....	720, 497, 240
Postal-cards .....	245, 282, 540
Newspapers and periodicals sent to subscribers.....	523, 873, 340
Miscellaneous articles of printed matter.....	210, 108, 220
Samples of merchandise and parcels .....	116, 305, 050
Total .....	1, 816, 066, 390

## France (year ending December 31, 1886):

Letters, not including free letters on Government business.....	591, 451, 811
Postal-cards .....	35, 923, 379
Newspapers and periodicals sent to subscribers.....	92, 957, 793
Miscellaneous articles of printed matter .....	713, 962, 439
Samples of merchandise and parcels.....	28, 953, 858
Total .....	1, 463, 249, 280

The average number of pieces of mail matter to each inhabitant of the several countries named, taking the last census as the basis of the calculation, is now about as follows:

United States.....	pieces per capita..	71
Great Britain.....	do.....	61
Germany .....	do.....	41
France .....	do.....	37

**Franking Privilege.**—I respectfully call attention to the several provisions of law conferring the privilege of sending mail-matter free of charge. They are as follows:

That from and after the passage of this act Senators, Representatives, and Delegates in Congress, the Secretary of the Senate, the Clerk of the House of Representatives may send and receive through the mail free all public documents printed by order of Congress; and the name of each Senator, Representative, Delegate, Secretary of the Senate, and Clerk of the House shall be written thereon with the proper designation of the office he holds, and the provisions of this section shall apply to each of the persons named herein until the first Monday of December, following the expiration of their respective terms of office. (Act of March 3, 1879, part of Sec. 1; 20 Stats., 356; P. L. and R., Sec. 409.)

That from and after the passage of this act the Congressional Record, or any part thereof, or speeches or reports therein contained, shall, under the frank of a Member of Congress or Delegate, to be written by himself, be carried in the mail free of postage under such regulations as the Postmaster-General may prescribe. (Act of March 3, 1875, part of Sec. 5; 18 Stats., 343; P. L. and R., Sec. 410.)

That seeds transmitted by the Commissioner of Agriculture or by any Member of Congress or Delegate receiving seeds for distribution from said Department, together with agricultural reports emanating from that Department, and so transmitted, shall, under such regulations as the Postmaster-General shall prescribe, pass through the mails free of charge. And the provisions of this section shall apply to ex-Members of Congress and ex-Delegates for the period of nine months after the expiration of their terms as Members and Delegates. (Act of March 3, 1875, Sec. 7; 18 Stats., 343; P. L. and R., Sec. 411.)

Pursuant to the authority above given to prescribe regulations, I find that the following have been adopted by my predecessors:

No matter can be transmitted under the franking privilege unless admissible to the mails under the provisions of chapter eleven. To entitle to free carriage the word "free" should be printed or written, and signed with the name and official

designation, if any, of the person entitled to frank it, on the address face of the package, except in case of matter addressed to the persons named in the preceding section. In the case of the Congressional Record, the name of the Senator, Member, or Delegate must be written by himself; in other cases the name may be written by any one duly deputed by him for that purpose. A Senator, Member, or Delegate, who holds his certificate of election, is entitled to the franking privilege from the commencement of this term.

All franked matter may be forwarded like any other, but such matter, when once delivered to the addressee, can not be remailed unless properly franked again. A bulk package of franked articles may be sent to one addressee, who, on receiving and opening the package, may place addresses on the franked articles and remail them for carriage and delivery to the respective addresses. (P. L. and R., Sec. 413.)

Where the wrappers or covers indicate that the documents are public documents, or give the name of the documents, as is generally the case, such documents, with the name and official designation of the Senator, Member, Delegate, or official written thereon, should pass free. Such is the requirement of the statute.

Where the wrapper or covering of the document does not disclose the public character of the document, the regulation appears to be intended to require that the word "free" should appear upon the face of the package as a certification that the matter within is free.

As the statutes do not require the name of the Senator or Member to be written by himself, except in the case of Congressional Record or parts thereof, or speeches or reports therein contained, the regulation has been evidently framed to guard against the abuse of the franking privilege by others who may be deputed to use it and may exceed their authority, or by those who may forge the frank to avoid the payment of postage on matter not frankable.

As no statute provides a penalty for the unlawful placing of the name of a Senator, Member, etc., by an unauthorized person upon public documents, or upon matter not entitled to be franked, the regulation appears to have been designed for two purposes: one to require some word to be placed over the signature to bring the unlawful use of such name within the designation of forgery of a certificate for the purpose of defrauding the United States, and the other to insure uniformity in the appearance of the franking formula so as to avoid mistakes by the average intelligence of many thousand postmasters, resulting in delay to the franked matter itself.

It is possible that the regulation, in its terms, is liable to such construction as to require the word "free" to be printed or written on the face of the cover or public documents mentioned in the act of March 3, 1879, above quoted. To avoid such construction the regulation will be made more explicit, although it was intended to guard against the abuse of the franking privilege by unauthorized persons, and to expedite the mail matter franked, rather than to qualify or place other than statutory limitations upon the rights of those entitled to use it.

In this connection I respectfully invite attention to the need for legislation which will provide penalties for the unlawful use of the names of Senators, Members, or other officials by unauthorized persons for

the purpose of sending matter frankable, and uniformity in the franking certificate.

The right to send matter in the mails under an official frank has, by recent legislation, been considerably extended, and opportunity largely increased for the abuse of this privilege. The placing of official names upon public or private matter by others than the officers on whom the right is conferred is easy, difficult of detection by postal officials, and under present statutes not explicitly declared punishable.

If the franking privilege were abolished, and a regular yearly allowance for the purchase of postage-stamps made instead, every Senator and Member of the House of Representatives would be placed upon an exact equality. No one could make use of the mails beyond his own allowance, and no unauthorized person could make use of the mails to forward unofficial matter. Agricultural colleges, now enjoying the franking privilege, might be furnished, through the Department of Agriculture, with free penalty envelopes.

**The Railway Mail, Steam-boat, and Star-Route Service.**—The report of the Second Assistant Postmaster-General shows that the mail service on June 30, 1888, aggregated 24,869 routes, the total distance covered being 403,977 miles. The expenditure was \$31,456,847, and the number of miles traveled during the year, 287,251,056. The star service included 14,146 routes and covered 225,607 miles. Its cost for the year was \$4,959,192. The mail-messenger service embraced 5,903 routes and the annual cost was \$883,719. The steam-boat service comprised 127 routes and cost for the year \$438,942. The railroad service consisted of 1,995 routes and cost \$17,528,600. The railway post-office car service cost \$1,996,359. The expenditure on account of railway post-office clerks was \$5,084,517. For mail equipment \$269,531 was expended. The necessary and special facilities on trunk lines occasioned an expense of \$295,987. Comparison with the service as it stood at the close of the previous fiscal year shows for the entire mail service an increase of 1,107 routes, 11,102 miles, \$1,650,338 in the cost, and 17,077,990 in the number of miles traveled per annum. A decrease of .08 cent, or .72 per cent., in the rate of cost per mile traveled and an increase of .22, or 3.32 per cent., in the average number of trips per week is also shown.

The star service has been materially decreased. A comparison shows that 5,989 miles have been cut off, with a decrease of .13 cent, or 2.14 per cent., in the rate of cost per mile traveled. The mail-messenger service has 388 more routes, and it is shown the cost per mile has been decreased .03 cent, or .35 per cent. There are four more steam-boat routes, in all 461 miles long, and the cost per mile of the service has been decreased .28 cent, or 2.01 per cent. An increase of 168 routes and of 12,764 miles in the railroad service is noted, and a decrease of .12 cent, or 1.12 per cent., in the rate of cost per mile. The estimates for the fiscal year ending June 30, 1890, are: Star service, \$5,650,000; steam-boat service, \$450,000; railroad service, \$19,105,557.90; railway

post-office car service, \$2,260,000; for necessary and special facilities on trunk lines, \$295,655.38; for railway post-office clerks, \$5,676,728.74; for mail-messenger service, \$1,050,000, and for mail equipments, \$240,000. A comparison of these estimates with the appropriation for the current fiscal year shows for the star service an increase of \$250,000; for steam-boat service no increase; for the railroad service an increase of \$2,105,557.90; for necessary and special facilities on trunk lines a decrease of \$332.15; for railway post-office clerks an increase of \$429,938.53; for mail-messenger service an increase of \$100,000; for mail equipments a decrease of \$70,000. The total amount of appropriations for mail service for the current fiscal year is \$31,653,777.74. The total amount of the estimates for the next fiscal year is \$34,728,942.02. This is an increase of \$3,075,164.28.

Since February last, contracts have been made with the New York Central and Hudson River Railroad Company and the Lake Shore and Michigan Southern Railway Company for a fast-mail train between New York and Chicago; with the Pennsylvania Railroad Company, the Pittsburgh, Cincinnati and Saint Louis, and the Chicago, Saint Louis and Pittsburgh Railway Companies, and the Terre Haute and Indianapolis Railroad Company for a fast mail between New York and East Saint Louis. Renewals of contracts have been made with the Chicago, Burlington and Quincy Railroad Company, and the Chicago, Milwaukee and Saint Paul Railway Company for fast-mail service between Chicago and Union Pacific Transfer.

The Second Assistant Postmaster-General calls attention to the need of a general repair shop at Washington. The result of collecting the old mail-bags and bringing them to Washington for repairs has been a saving of \$60,000. He recommends an appropriation of \$10,000 to establish a repair shop here, not only for bags, but for locks and keys as well. Experience teaches that the ultimate saving fully justifies an outlay for a building and the necessary tools. The discovery of the extravagance heretofore existing in the repair shops led at once to a remedy of the evil, and the result is mail equipment next year will not require within \$70,000 of the amount it has cost during previous fiscal years. Nearly 300,000 bags, a little damaged, had been thrown aside. These are rapidly being put into serviceable condition, and as a consequence the necessity for new bags is growing less daily.

The Second Assistant Postmaster-General again calls attention to the law regulating the compensation of railroad companies for carrying the mails, and, as in the annual reports of the two preceding years, recommends that the law should be changed so that space should be the criterion of such compensation.

**Appropriation for special facilities in the Railway Mail Service.**—I desire to call attention to the settled application of the appropriation made for extra facilities and to the absence of any means to improvements of the service in portions of the country and on lines equally if not more deserving than those for which

special appropriations are made. These special appropriations are not sufficient for proper distribution and create an indisposition on the part of railroad companies to co-operate for the best attainable service. Dissatisfaction is natural enough when the Government pays one road more than others, and for no better or more necessary service than is expected or required from many others.

I do not venture an opinion as to whether or not the rate of compensation allowed by law is sufficiently liberal to secure for the Government adequate and the best service. It is certain that the dissatisfaction caused by extra compensation to some, and not to others, has prevented in some instances cordial co-operation with the Department to secure much-needed improvement.

The following is the settled application of appropriations for special facilities :

*Statement of expenditures on account of special facilities for the fiscal year ended June 30, 1887, out of \$291,000, appropriated by act approved June 30, 1886.*

Number of route.	Termini.	Railroad company.	Miles.	Pay.
5005 .....	New York to Springfield .....	New York, New Haven and Hartford.	136.00	\$17,647.00
6011 .....	4.35 a. m. train, between New York and Albany.	New York Central and Hudson River.	144.00	25,000.00
10006 .....	Baltimore to Hagerstown .....	Western Maryland .....	86.60	15,804.50
19001 .....	Philadelphia to Bay View .....	Philadelphia, Wilmington and Baltimore.	91.80	20,000.00
10013, 11001 (part)	Bay View to Quantico .....	Baltimore and Potomac .....	79.80	21,900.00
11001 (part) .....	Quantico to Richmond .....	Richmond, Fredericksburgh and Potomac.	81.50	17,419.26
11008 .....	Richmond to Petersburg .....	Richmond and Petersburg .....	23.39	4,268.67
11009 .....	Petersburgh to Weldon .....	Petersburgh .....	64.00	11,680.00
12002 .....	Weldon to Wilmington .....	Wilmington and Weldon .....	162.07	29,577.77
14002 .....	Wilmington to Florence .....	Wilmington, Columbia and Augusta.	110.00	20,075.00
14005 .....	Florence to Charleston Junction.	Northeastern .....	95.00	17,337.50
14004 .....	Charleston Junction to Savannah.	Charleston and Savannah .....	108.00	19,710.00
15009 .....	Savannah to Jacksonville .....	Savannah, Florida and Western .....	171.50	31,298.75
16018 .....	Jacksonville to Sanford .....	Jacksonville, Tampa and Key West.	126.18	17,602.10
16007 .....	Sanford to Tampa .....	South Florida .....	116.39	16,265.49
Total .....	.....	.....	.....	285,586.10

These are substantially the same for the current year.

It will be observed that but one New England road, the New York, New Haven and Hartford, has extra compensation, and that, with the exception of \$25,000 to the New York Central and Hudson River and \$15,804 to the Baltimore and Hagerstown Railroads, the entire appropriation for special facilities goes to the system whose terminals are Philadelphia and Tampa. It would seem that if extra compensation is to be given to lines south the great and growing trade between the Northwest and the new commercial South should have attention.

I submit herewith Table A, showing the routes to the South which receive extra compensation, with the average daily weight of mails carried, as compared with weights of mails carried from Chicago to New Orleans, which routes receive no such compensation. In this connection I submit, also, five tables showing the mail service and the methods of carrying to the South.

TABLE A. — *Statement of railroad service.*

Number of route.	State and termini.	Corporate title of company carrying the mail.	Distance.	Cost per annum for transportation.	Cost per annum for P. O. cars.	Average weight per day.	Special facilities.	Totals.

In this connection I call attention to the condition of the law, in urgent need of revision, which reposes *no authority in any official of the Government to compel the owner of a railroad to receive and carry the mails of the Republic.*

In this state of things the Government is always at a disadvantage in negotiating for improved mail facilities, and public opinion and sentiment are the only force to which the Department can now appeal to secure them.

**Fast Mails.**—Between Chicago and Omaha the fast mail has been made daily, instead of simply west, as before.

This connects with the fast mail between New York and Chicago at the latter place, which has also been increased to run east as well as west.

A new fast mail has been established between Portland, Oregon, and Chicago, and between Chicago and New Orleans, by way of Cincinnati, Chattanooga, and Meridian, Miss. But all these and other improvements in the mail service have been brought about by negotiations and contract in which the Government has been obliged to stipulate for special advantages to the railroads, whereas the Department should be in a position to dictate terms within the rules of fair dealing.

The increase in the Railway Mail Service has been unprecedented and far beyond the estimates for the fiscal year for which they were made. Increase has been added in the South and Southwest, whose needs in this regard had not before met with the attention which their growth and commercial importance seemed to require. The table heretofore set out furnish a showing for increased means of communication.

**Foreign Mail Service.**—The weight of the mails dispatched to foreign countries was as follows:

Transatlantic service, 581,130 pounds letters, 2,259,877 pounds other articles.

Transpacific and miscellaneous service, 62,483 pounds letters, 763,115 pounds other articles. Total, 643,613 pounds letters, 3,022,992 pounds other articles.

The largest quantity of mail matter was dispatched to Great Britain, 43.28 per cent. of letters and 51.22 per cent. of other articles; and the next to Germany, 21.41 per cent. of letters, and 20.27 per cent. of other articles.

The total cost of the service was \$490,067.29, of which \$464,910.70 was for transporting mails of United States origin. Of this amount there was paid for transatlantic service, \$353,262.08; for transpacific service, \$42,593.13; and for miscellaneous service, \$58,553.61.

The estimates for the fiscal year ending June 30, 1890, are as follows:

Total amount, \$760,000. Of this sum there will be required for transportation of mails of United States origin \$613,738.97. The last men-

tioned sum is calculated on the basis of the following rates of annual increase:

To ports to which American vessels do not ply: Letters, 11.87 per cent.; other articles, 8.20 per cent.

To ports to which American vessels ply: Letters, 4.91 per cent.; other articles, 18.56 per cent.

**Transatlantic Steam-ship Service.**—The mails for Europe have been invariably assigned each month to those steamers which made the fastest time, as ascertained from an average of a number of trips as reported by the steam-ship companies.

The fastest time from New York to London via Queenstown was made by the Cunard steam-ship *Umbria*, viz, 179.7 hours.

The fastest time from New York to London via Southampton was made by the North German Lloyd steam-ship *Lahn*, viz, 188 hours.

The fastest time from New York to Havre was made by the General Transatlantic steam-ship *La Champagne*, viz, 189 hours.

**Postal Convention with the Dominion of Canada.**—On the 12th of January there was signed at Washington, and on the 19th of January at Ottawa, a postal convention between the United States and the Dominion of Canada, abrogating the special postal convention between the two countries of 1875.

The new convention went into operation March 1, 1888, and makes virtually one postal territory of the United States and Canada. Uniformity of postage rates had already been established, but there was still the restriction that no merchandise of any kind could be sent to Canada. This restriction has now been removed, and, with the exception of specially prohibited articles, merchandise can now be sent at fourth-class rates of postage.

**Parcel Post.**—Four parcel-post conventions have been concluded during the fiscal year ended June 30, 1888, viz: With Barbadoes, went into operation December 1, 1887; with the Bahamas, went into operation February 1, 1888; with British Honduras, went into operation March 1, 1888; with Mexico, went into operation July 1, 1888.

The parcel-post rates to all these countries are the same, viz, 12 cents per pound, or fraction of a pound; and, in addition to this, a charge for interior service and delivery may be collected from the addressee in the country of destination. This charge is 5 cents for each single parcel of whatever weight, and, if the weight exceed one pound, 1 cent for each four ounces or fraction thereof.

The highest charge for a parcel weighing 11 pounds sent from the United States by parcel-mail to any of the above-mentioned countries will, therefore, be \$1.76 (of which the sender will have to pay \$1.32 and the addressee 44 cents).

Parcel-post conventions are now pending with all the Central and South American States, and will doubtless prove a great benefit to American commerce and industry.

**The Universal Postal Union.**—During the year the following countries have been added to the union :

The German territories of the “New Guinea Company,” of “Tago,” Western Africa, of “Southwest Africa,” and of the “Marshall Islands,” in the Pacific, and the Regency of Tunis, north coast of Africa.

A German post-office has been established at Afia, Samoan Islands, thus making these islands virtually part of the Postal Union.

**Statistics of the Postal Service in the Principal Countries of the Postal Union.**—The greatest length of postal routes was possessed by the United States, viz, 410,824 miles; next in order came Germany, France, and Russia.

The greatest number of miles of annual transportation was in the United States, viz, 252,525,293 miles; next in order came Germany, France, and Austria.

As regards the number of articles of mail matter dispatched in the international mails, Germany takes the lead in letters, 53,151,430, and next in order came Great Britain, Austria, and the United States. The United States takes the lead in prints, 47,049,064, and next in order came Great Britain, Germany, and France.

As regards the annual postal income Germany takes the lead with \$48,816,200.33; next comes the United States with \$45,948,422, followed in order by Great Britain, France, Russia, and Austria.

As regards the annual postal expenditure the United States takes the lead with \$51,018,243.79; next comes Germany with \$42,237,084.91, followed in order by Great Britain, France, Russia, and Austria.

The greatest postal surplus was in Great Britain, viz, \$12,501,850.03, and the greatest deficiency in the United States, viz, \$5,069,820.85.

The largest amount of steamship subsidies was paid by France, viz, \$5,154,330.61, followed by Great Britain, \$3,024,334.12.

**International Postal Congress of Vienna, in 1890.**—The first congress was held at Berne, Switzerland, in 1873, the second at Paris, France, in 1878, and the third at Lisbon, Portugal, in 1885.

The United States were represented at all these congresses and will doubtless also be represented at the Vienna Congress, which promises to be of unusual interest, as, among the rest, the question of doing away with all transit charges will come up for discussion. An appropriation of \$5,000 is asked for the expenses of the United States delegates to that congress.

**Special services Maintained by Foreign Countries.**—The collection service was first established by Belgium in 1842, by Germany in 1871, Switzerland in 1875, France in 1879, and Austria in 1882.

Under the regulations the post-office undertakes to collect, at certain fixed charges, bills up to a certain amount, to cash bills of exchange, and collect (in Belgium) dividend coupons of the public debt and coupons of other kinds.

The number of bills mailed for collection in Germany (in 1886) was 4,362,027 to the value of \$87,550,220.66, yielding a revenue of \$288,717.80 to the post-office. The number of bills mailed for collection in Belgium (in 1886) was 4,391,263 to the value of \$66,949,312.34, yielding a revenue to the post-office of \$178,840.40, and the number of bills mailed for collection in France (in 1883) was 5,777,541, to the value of \$70,252,946.73, yielding an income to the post-office of \$688,178.39.

I venture to express the hope that if the policy of subsidizing American ships for the promotion of commerce with foreign countries shall be adopted, the disbursement of the fund shall not be added to the functions of postal administration. In this connection I have the honor to quote from a communication made by me to the Committee on Post-Offices and Post-Roads of the House of Representatives on July 2, 1888. It was called out by a request for my opinion upon the provision of the bill appropriating \$800,000 "to promote the purposes of a more efficient mail service between the United States and Central and South America and the West Indies by contract with American built and registered steam-ships for the transportation of the United States mails," and providing that such contract should be for a period of not less than five nor more than ten years, at a compensation not exceeding for each outward trip \$1 per nautical mile:

It will hardly be claimed for this legislation that it is either demanded or required, or that it can be utilized for the benefit of the postal service merely. The resources and powers of the Department have proved entirely adequate to afford to the citizens of the United States a foreign mail service equal to, and in most cases superior to, that of any nation in the world. Nine-tenths of our foreign letter mail crosses the Atlantic, and the settled policy of the Department has been to employ the swiftest vessels from week to week for carrying the mails. The Department, at the request of prominent merchants, importers, and bankers of the United States having commercial relations with foreign countries, has endeavored to induce foreign postal administrations to adopt a similar policy to promote expedition and security in correspondence.

Under the present system, on routes other than to European ports, mails have been carried in American steam-ships at four times the rates paid for transatlantic service, although no foreign vessel has ever refused or hesitated to accept the sea postage, or one-fourth the rate paid to American bottoms. Under the present conditions the Central and South American letter mail increases at the rate of about 10 per cent. in weight a year, and the number of sailings to West Indian and Central and South American ports from the three ports of New York, New Orleans, and San Francisco increased in the fiscal year ending June 30, 1887, from 712 to 831. In addition to the compensation paid in money, all common carriers by water are greatly benefited by carrying the mail. Provision for their benefit in Brazilian ports are as follows: Mail steamers are allowed to immediately discharge their cargoes, preference being given them before any other vessel and before they have been entered at the custom-house, both on week days and on Sundays or holidays.

They may sail at any hour, day or night, after they have received the mail, and can not be detained under any pretext whatever beyond the hour fixed for sailing. Similar benefits are provided for mail steamers at other West Indian and Central and South American ports. While the Department in every case has given the preference to American ships at four times the cost of carriage on competing foreign ships as permitted by law, yet in very many cases, because of very much greater expedition or because of the absence of proper facilities in American steamers, or because of

very great delays, the other ships offering have been given the business at the lower rate on the principle that the first duty of the Department to our citizens under the law was to give them the best, most expeditious, and certain mail facilities within its resources.

If there shall be superadded to the functions of postal administration that of administering a subsidy or a bounty for the promotion of American shipping interests I can readily see why, in practice, these two offices must so conflict that, so far from being of advantage to and promoter of efficient mail service, such a subsidy, with such a purpose, in the hands of the Postmaster-General must antagonize and overbear the primary object of his office, which is to give to the correspondence of our citizens the best expedition and certain transmission. If the bounty or bonus system is to be revived, it should be done without involving this Department in the complications certain to arise from administering it, and without hampering its fundamental rule of action, which is that the mails must go at all events.

While we granted aid to the Pacific railroads, with conditions imposed that the mails should be carried for a credit on the debt, yet the Department was left free to employ better or more expeditious routes in its discretion. The proposed legislation will be in effect a mandate to the Postmaster-General to contract with American-built as well as American-registered steam-ships for the transportation of the mails to the ports of Central and South America and the West Indies for a period of not less than five years and with a compensation for each outward trip of \$1 per mile. There is no condition for advertisement, and indeed, unlike even the British subsidy acts, competition is not contemplated or permitted, as the contracts are to be limited to American ships, and as to these will be practically limited to those now in existence, between whom there is comparatively no competition because of the number which can be employed in the service.

In the present conditions the proposed law might as well have named the few persons to whom this money is to be paid. Even the laws (Revised Statutes sections 3976 and 4203) under which American ships might be compelled to carry the mails have been repealed (23 United States Statutes at Large, 58), and it goes without saying that the proposed legislation intends the Department to pay the maximum rate provided, *i. e.*, \$1 per nautical mile for five years, to these few persons, without troubling them with any negotiations as to terms, and, indeed, as you will observe, without even the lodgment of discretion in the Department to designate from what ports of the United States the mails shall sail. It may be said in passing that presumably the "terminal points" from which sailings will be made, if self-interest, as is usually the case, governs, will be those from which the greatest number of nautical miles may be computed, rather than from those at which the convenience and needs of the service would be suited. It may be noted also that the schedules of sailings are to be furnished by the contractors, and not by the Postmaster-General; altogether from an analysis of the proposed legislation it would seem to exclude the exercise of any power of any representative of this Government to provide for this mail service in the interest of the people, except after contract, which must be on the carriers' own terms and after the carriers have fixed the schedules according to their ideas of what the mail service should be to compel them to conform to their own expressed views and decision as to the public convenience and the public interests.

I beg you to believe that in this criticism of the bill I am not commenting unfavorably at this place upon a policy of granting bounties to American ships. I do think, however, that the carrying out of that policy should not be involved in the postal administration. Such gifts should be voted and given directly, if the Government shall determine to pursue a policy of engaging in this branch of private business. With very great respect, however, to the framers of the bill, I do seriously object to that provision of the proposed legislation which places the mail service at the mercy of any firm, individual, or corporation. While, indeed, the subsidized lines might be compelled to carry the mails if tendered, yet the Department should be independent, and should at all times be enabled to send the mails by the most expeditious routes and make use of the best facilities afforded for that purpose from among

all carriers offering. The Department should be free to take advantage of all sailings, of increased facilities coming from increased business, of changes for the better wrought by time, extension of commerce, and competition, and should not be tied up for a decade to single lines of communication, unstimulated to improvement and all progress by the existence of a settled, inordinate, and certain income.

Herewith I furnish you two tables, marked "A" and "B." From them you will see that the mails of this country were carried to Central and South America and the West Indies for the fiscal year ended June 30, 1887, by foreign steamers at a cost of \$7,936.27 at the single rate, and by steamers of American register at a cost of \$39,381.57. The number of miles sailed by the foreign ships employed was 666,448; the miles sailed by the ships of American register employed were 546,758. It will be seen, on the plan of payment proposed, which is fixed without regard to the amount of mail carried, that the service, which cost us in the fiscal year 1887 \$47,317.84, would have cost us, if paid for as proposed, \$1,213.206. It is estimated that the weight of mails will be for the next fiscal year increased 20 per cent. over these figures, and from what I have before shown it will be seen that the number of sailings will be increased in about the same ratio over the figures given in Tables A and B. The total cost of the sailings under this bill, predicated upon the business of 1887, can be but an approximate standard by which to estimate the cost under a provision of \$1 for every nautical mile for each outward trip.

But without regard to the cost, it is perfectly evident, from an examination of these tables and from the experience of the Department in affording the best attainable service, that "American-built ships" alone, with whom the Department can now contract under this bill, and with which it must contract for a term of years, can not perform the service absolutely essential. Heretofore, as I have said, whenever it has been possible and consistent with the best interests of the public which this Department serves, American ships have been employed to carry the mails at four times the rate paid to foreign ships; yet with this policy steadily maintained, to give proper service at all it has been necessary to employ other carriers, as shown by Schedule A. One of the most serious disadvantages from connecting the proposed subsidy with this Department will be that, even in cases where service is not furnished to certain ports by American ships at all, carriers that might be had will hardly suffer the enormous discrimination in compensation for the carriage of the mails. The conditions would certainly predispose human nature to refuse to perform the service at all.

Again, it will not commend itself to our people if, with this enormous compensation, avowedly for the carriage of the mails, frequency of transmission shall be largely curtailed, even to ports touched by American ships, as must be the case where we pay one carrier about two hundred and fifty times as much as we offer for the same service to another. In my opinion the bill would not be advantageous to the service, but the disadvantages would be positive in so far as this Department is concerned; while if it shall become a law, the Department will of course faithfully administer the fund in accordance with the spirit of the act. I feel confident that such administration will result only in a very great pecuniary benefit to a dozen individuals, at the expense and embarrassment of good service, and of inconvenience, injustice, and material injury to the great body of the people, whose money will be used in the purchase of those results.

Considering this as a subsidy pure and simple, unconnected with the postal service, it becomes a question of general policy with which this Department has nothing to do. The subject has been ably and exhaustively discussed in Congress, notably in the Thirty-fifth, Forty-fifth, Forty-sixth, and Forty-ninth. You, sir, and other distinguished members of the Post-Office Committee as at present constituted, have on the floor of the House presented the learning which the history of the subject, political economy, or the experience of legislation can teach. It has been frequently demonstrated by the experience of this and other countries that to enable one line by Government aid to carry more cheaply, and thus to destroy competition, does not

promote commerce.\* The most successful ocean steamship lines of the Continent—those of Hamburg and Bremen—receive no pay from the Government other than the moderate postage rates.† The British precedent is not in point and would not be even if Great Britain did not offer her mail service to the carriers of the world. “Her aims are political and not commercial. She must have constant communication with the colonies, and she has spent large sums for this object. She must have an efficient and capable transport service for the protection of those colonies.”‡ The views of that Government are stated in Mr. Scudemore’s report (Parl. Papers, 1867-’68 XII, 131), as follows:

“The question (mail subsidy service) can not be dealt with on commercial principles. \* \* \* For the sake of keeping up such communication with the east as the nation requires they must set commercial principles at defiance, and cost what it may the nation must either pay them what they lose thereby or forego the communication.”

Of course England may subsidize lines of ships to open up new markets for her surplus, because she freely exchanges commodities with such markets, and her policy is after establishing the commerce to steadily decrease the subsidy. If the policy of giving bounties to promote commercial relations with other countries be ever adopted again after the failures in our history, it would seem that its adoption should be deferred until closer commercial relations with those countries can be maintained, and are not antagonized by an opposing system of laws. Commerce in the very essence of its meaning is exchange. It is not to sell and never to buy. The individual or nation does not exist that will buy all one has to sell for cash with no reciprocal return in profitable exchange. Cargoes out and cargoes back are needed for the creation of a merchant marine. The cargo out will not be bought unless we buy in exchange, and it will be bought if we are willing to trade. Until these conditions come, subsidies may maintain a line so long as the subsidy lasts and then the line will go down for want of legitimate trade. If, however, the subsidy policy is to be pursued, I venture to suggest the Mexican method. When a ship arrives with a cargo the tariff tax is divided with the ship-owner, the latter taking 50 per cent. of the duty on the goods he brings in payment on account of his subsidy. The trading-ship is thus enabled to remit to the consignor, if he will employ his ship, a portion of the government duties, and thus the ship-owner is indeed enabled to promote trade with foreign countries directly. An improvement upon the Mexican method in the interest of the promotion of trade and of the building of ships to conduct it, would be to enable the owners and the builders to receive at the port of consignment in that country still a greater porportion of the duties imposed by the government upon the cargo.

In this way the Mexican ship would be enabled to get her cargo, charge a fair profit for carriage, and sell to the Mexican consumer at a price at which he could conveniently buy, take out a cargo for exchange, and repeat the process, to the cultivation of much closer commercial relations with foreign countries, and to the maintenance of Mexican shipping. Of course, the Mexican method is somewhat cumbersome, and the same end might be reached without indirection and without the payment of a subsidy by the removal or reduction of the Mexican tariff on imports.

While on the subject of closer commercial relations with South and Central America, for the promotion of which the bill under consideration is doubtless intended, I call your attention to some interesting figures.

Our total trade with Brazil for the year ended June 30, 1837, was as follows:

Total imports.....	\$52,955,591
Our total exports to Brazil were.....	8,137,794
Of the imports we imposed no tariff upon.....	47,076,473
We did impose a tariff upon.....	5,873,703

\* Mercantile marines of foreign countries, Forty-ninth Congress, Ex. Doc. No. 172.

† Forty-fifth Congress, second session, Ex. Doc. No. 38. Forty-sixth Congress, third session, House committee report No. 342.

‡ Hadley.

Our total trade with Central America for the same period was as follows :

Total imports.....	\$7,706,978
Total exports .....	3,006,714
Of the imports we imposed no tariff upon.....	7,195,705
We did impose a tariff upon.....	441,916

Our total trade with Venezuela was as follows :

Total imports.....	8,444,967
Total exports .....	5,504,215
Of the imports we imposed no tariff upon.....	8,248,450
We did impose a tariff upon.....	12,786

Our total trade with the United States of Colombia was as follows :

Total imports.....	4,771,303
Total exports .....	7,158,235
Of the imports we imposed no tariff upon .....	3,934,559
We did impose a tariff upon.....	16,594

Our total trade with the Argentine Republic was as follows :

Total imports.....	4,104,102
Total exports .....	6,364,545
Of the imports we imposed no tariff upon .....	3,347,936
We imposed a tariff upon .....	752,256

Our total trade with Chili was as follows :

Total imports.....	2,863,233
Total exports .....	2,069,138
Of the imports we imposed no tariff upon .....	2,634,396
We did impose a tariff upon.....	228,897

These illustrate the universal rule by which the limitations upon commercial relations and the carrying trade with all the countries of Central and South America may be measured. A comparison of the amount brought into the country free of tariff with what we send in exchange is instructive. It should be noted that of the Brazilian imports free of duty, the large proportion value is the item of coffee, after deducting which the lesson on exchange of trade as bearing on closer relations with all these countries is the same, and the universal one.

## SPECIAL TOPICS.

**Ownership by the Government of Post-office Buildings.**—A bill prepared in this Department and reported favorably by the committees of both houses, but not acted upon at the last session, would provide a standard fixed by returns showing the amount of business transacted at each office, which would give the Postmaster-General the power to purchase sites and erect permanent buildings for post-office purposes. I had the honor to furnish the committees with the data showing that, in my judgment, sound business principles dictated such a policy and demonstrating that it would be a measure of economy for the Government by comparison with the present system of leasing. At the expiration of leases it is almost invariably the case that strife arises among citizens of towns over the fixing of a new site for the post-office. Real estate values are, to some extent, unsettled by such changes, and it is frequently difficult for the head of the Department to determine whether the case presented for the location has strong popular support in the interest of the general convenience of the community or whether it is not made up in the interest of mere real-estate speculation. From

my experience in the matter of making new leases or of renewing old ones, I am led to present the subject to Congress with much earnestness. I am satisfied that the measure above referred to and now pending is one of the highest merit. It is known as H. R. bill No. 3319.

**Postal Telegraphy.**—If the correspondence of the country is to continue to be under the charge and protection of the Government, the vast and increasing volume conducted by telegraphy and the right of the great body of the people to be afforded facilities for the best and quickest transmission at rates within the means of all will press this subject upon the attention of the Congress with more and more urgency. The chief difficulties in the way are the great cost of present methods and the absence of safeguards which, according to the theory of the present mail service, should protect the privacy of correspondence. I have given the subject much consideration, and I believe that the inventive genius of this country has reached a stage in discovery in electric science when these problems may be solved. The subject is of such great importance to the people that I believe an opportunity should be given for the presentation and examination of inventions which have been informally presented to the committees of Congress the Department and the public, and that a stimulus should be given to inventors to turn their attention to the improvement of old methods. I recommend the appointment of a commission of competent and disinterested men, learned in the science, who may examine inventions and invite others, who shall be authorized to erect short experimental lines, and who shall report to the President or to Congress the result of their investigations.

**A Fourth Assistant Postmaster-General.**—I renew the recommendation of my immediate predecessor, as to which I have also presented an argument and information to the Congress, that this office should be created.

**Salaries.**—I also most earnestly recommend to the attention of the Congress all that is said by my predecessor in favor of an increase of the salaries of departmental officials at page 84 of his report. Many of these are paid not exceeding 50 per cent. of the market value of the required ability, and my views on the subject have been presented in several communications now on the files of the proper committees of the present Congress.

I can not omit to express my appreciation of the faithful services of all the officers, clerks, and employés of this Department. My relations with many of them with whom I have been brought in more constant contact have created attachments which will survive while I live, and my respect and regard for all have grown with my observation of their faithful service to the Government.

I have the honor to be, with great respect, your obedient servant,

DON M. DICKINSON,  
*Postmaster-General.*

The PRESIDENT.

*Appropriations, expenditures, and unexpended balances of appropriations for objects pertaining to the care of the Post-Office Department building, for the conduct of the departmental service, and for salaries of officers and employes of the Department for the fiscal year ended June 30, 1888.*

Items.	Year ended June 30, 1888.			
	Appropriations.	Expenditures.	Balance unexpended.	
			Amount.	Per cent.
Stationery .....	\$12,000.00	\$9,875.72	\$2,124.28	17.70
Fuel, etc. ....	8,000.00	7,803.32	196.68	2.49
Gas .....	5,500.00	3,867.31	1,632.69	29.68
Plumbing and gas-fixtures .....	3,000.00	1,167.40	1,832.60	61.08
Telegraphing .....	3,500.00	2,305.60	1,194.40	20.41
Painting .....	3,500.00	1,956.25	1,543.75	44.10
Carpets and matting .....	4,000.00	2,777.87	1,222.13	30.55
Furniture .....	5,000.00	1,181.12	3,818.88	70.63
Keeping horses, etc. ....	1,500.00	747.53	752.47	50.16
Hardware .....	1,500.00	547.76	952.24	63.48
Miscellaneous items .....	13,000.00	8,874.26	4,125.74	31.73
Rent:				
Topographers .....	1,500.00	1,500.00	-----	-----
Money-order building .....	8,000.00	8,000.00	-----	-----
Additional building for Auditor's office .....	4,500.00	4,500.00	-----	-----
Official Postal Guides .....	18,000.00	16,020.70	1,979.30	10.90
Post-route maps, etc. ....	15,000.00	14,442.78	557.22	3.71
Foreign postage .....	500.00	469.00	31.00	6.20
Total of items pertaining to care of building, etc. ....	108,000.00	86,036.62	21,963.38	20.33
Salaries of officers and employes of the Post-Office Department .....	711,540.00	703,155.24	8,384.76	1.17
Total of all the above .....	819,540.00	769,191.86	30,348.14	3.45

Items.	Year ended June 30, 1887.			
	Appropriations.	Expenditures.	Balances unexpended.	
			Amount.	Per cent.
Stationery .....	\$13,000.00	\$7,470.02	\$5,529.98	42.53
Fuel, etc. ....	8,000.00	6,711.95	1,288.05	16.10
Gas .....	6,200.00	3,996.40	2,203.60	35.54
Plumbing and gas fixtures .....	3,000.00	1,792.23	1,207.77	40.25
Telegraphing .....	3,500.00	1,989.46	1,510.54	43.15

Total postal revenue .....	62,508,658.12	
DEFICIENCY IN POSTAL REVENUE.		
Leaving a deficiency in the revenue of the Post-Office Department, to be provided for out of the general treasury.		
Total postal service deficiency.....	4,303,414.90	

### THE FREE-DELIVERY SYSTEM.

The estimates, appropriations, and expenditures for this service for the past two years were as follows:

	1886-'87.	1887-'88.	Increase.
Estimates .....	\$4,928,531.25	\$5,522,500.00	\$593,968.75
Appropriations .....	4,928,531.25	5,522,500.00	593,968.75
Expenditures .....	4,618,692.07	5,422,356.36	803,664.29

The large increase in expenditure for 1887-'88 over the preceding year was occasioned by the act of January 3, 1887, providing for the extension of the service, under which one hundred and sixty-nine offices were added to the system.

The appropriation for the current fiscal year is \$7,000,000, \$1,000,000 of which was appropriated to carry into effect the act approved May 24, 1888, entitled "An act to limit the hours that letter-carriers in cities shall be employed per day."

ESTIMATE FOR THE FISCAL YEAR COMMENCING JULY 1, 1889, AND  
ENDING JUNE 30, 1890.

The annual pay of carriers in service on June 30, 1889, subject to the usual changes unimportant in the aggregate, will be as follows:

3,157 carriers at \$1,000 each.....	\$3,157,000
630 carriers at \$800 each.....	504,000
2,393 carriers at \$850 each.....	2,034,050
2,070 carriers at \$600 each.....	1,242,000
<hr/>	<hr/>
8,250	6,937,050

To which is to be added—

For promotions of 2,700 carriers under act of August 2, 1882 .....	440,000
Pay of substitutes for carriers on vacation, (8,250) .....	206,250
Pay of substitutes for additional carriers on vacation (350) .....	8,750
Pay of substitutes for holidays and emergencies.....	3,000
Pay of post-office inspectors .....	15,000
Incidental expenses (of which there will be on June 30, 1889, an authorized annual charge of about \$240,000).....	275,000
Additional carriers (equal to 350 for a full year) .....	210,000
	<hr/>
	8,095,050
Allowed .....	8,000,000

The increase in the amount of appropriation required for 1889-90 is on account of the passage of the act of January 3, 1887, providing for extension of the service to additional places, which largely increases the number of offices every year, and the act of May 24, 1888, known as the "Eight-Hour Law."

In this estimate it will be seen that in addition to the amount which is required to be appropriated under existing laws, but \$253,750 is for additional carriers, the extension of the service, and expenses incidental thereto.

Yours, respectfully,

J. F. BATES,  
*Superintendent Free-Delivery System.*

Hon. A. E. STEVENSON,  
*First Assistant Postmaster-General.*

## REPORT OF THE LAW CLERK.

---

POST-OFFICE DEPARTMENT,  
OFFICE OF LAW CLERK,  
*Washington, D. C., October 6, 1888.*

SIR: I have the honor to submit herewith a statement of the number of post-offices and postal stations where premises were leased by the Government and in effect June 30, 1888, showing the annual rent paid and the total salary and allowances, and also showing the box-rents and commissions, surplus or deficiency, and gross receipts at each office, upon the basis of the annual re-adjustment of postmasters' salaries taking effect July 1, 1888.

Very respectfully,

J. W. NICHOL,  
*Law Clerk.*

Hon. DON M. DICKINSON,  
*Postmaster-General.*

*Statement of post-offices and postal stations where premises have been leased by the Government, showing the number leased, and annual rental paid; and also showing the salary of postmaster, total salary and allowances, box-rents and commissions, surplus or deficiency, and gross receipts at each office, upon the basis of the re-adjustment of postmasters' salaries, taking effect July 1, 1883.*

No.	Office.	State.	Class.	Post- master's salary.	Term of lease.		No. of years.	Rent per annum.	Fuel and light included in lease.	Total salary and allowances, June 30, 1883.	Box-rents and com- missions.	Surplus. Deficiency.	Gross receipts.

REPORT  
OF THE  
ASSISTANT ATTORNEY-GENERAL  
FOR THE  
POST-OFFICE DEPARTMENT,  
UPON  
CLAIMS OF POSTMASTERS UNDER THE ACT OF MARCH 17, 1832,  
AND THE ACT AMENDATORY THEREOF OF MAY 9, 1833.

---

# REPORT

OF THE

## ASSISTANT ATTORNEY-GENERAL FOR THE POST-OFFICE DEPARTMENT.

POST-OFFICE DEPARTMENT,  
OFFICE OF THE ASSISTANT ATTORNEY-GENERAL,  
*Washington, D. C., November 15, 1888.*

SIR: I have the honor to report to you the action taken by the Department for the fiscal year ended June 30, 1888, under the act of Congress approved March 17, 1882, entitled "An act authorizing the Postmaster-General to adjust certain claims of postmasters for loss by fire, burglary, or other unavoidable casualty," and the act amendatory thereof approved May 9, 1888.

A list of claims allowed, with statement of the reasons for action in each particular case, is herewith respectfully submitted, marked Exhibit A.

A list of the claims disallowed is also submitted, giving reason for action in each particular case, marked Exhibit B.

The total number of claims allowed during the period from July 1, 1887, to June 30, 1888, is..... 449  
The total amount of claims allowed for money-order funds lost or destroyed is..... \$3,322.65  
The total amount allowed for postage-stamps, stamped envelopes, newspaper wrappers, and postal-cards so lost or destroyed is..... 20,330.37  
The losses of money-order funds, for which claims were allowed, arose as follows:

Lost in transit.....	\$855.00
Lost by fire.....	398.76
Lost by burglary.....	2,068.89
Total.....	3,322.65

The losses of stamps, etc., for which claims were allowed during the fiscal year, arose as follows:

Lost by fire.....	\$7,171.09
Lost by burglary.....	13,057.44
Lost by storm.....	15.31
Lost by other causes.....	86.53
Total.....	20,330.37

The number of claims wholly disallowed, withdrawn, or dismissed during the year was 86, classified as follows:

For stamps, etc.—	
Lost by fire .....	\$261. 11
Lost by burglary .....	2, 733. 66
Lost by larceny .....	63. 00
Lost by other causes .....	15. 52
Total .....	3, 075. 29
For money-order funds:	
Lost by burglary .....	\$37. 79
Lost in transit .....	3, 083. 70
Lost by fire and other causes .....	245. 66
Total .....	3, 367. 15
Grand total .....	6, 442. 44

The reasons for disallowance, withdrawal, etc., are summarized thus:

Because not within the provisions of the statutes .....	6
Because not presented within the time required by statute .....	9
Because evidence as to fact or amount of loss was unsatisfactory .....	8
Because of failure to comply with instructions concerning remittances .....	13
Because of failure to exercise proper care for the protection of the property .....	22
Because withdrawn or dismissed .....	28
Total .....	86

The act of May 9, 1888, is as follows:

[PUBLIC—No. 77]

To amend an act entitled "An act authorizing the Postmaster-General to adjust certain claims of postmasters for loss by burglary, fire, or other unavoidable casualty," approved March seventeenth, eighteen hundred and eighty-two.

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,* That the act entitled "An act authorizing the Postmaster-General to adjust certain claims of postmasters for loss by burglary, fire, or other unavoidable casualty," approved March seventeenth, eighteen hundred and eighty-two, be, and the same is hereby, amended so as to read as follows:

That the Postmaster-General be, and he is hereby, authorized to investigate all claims of postmasters for the loss of money-order funds, postal funds, postage-stamps, stamped envelopes, newspaper wrappers, and postal-cards, belonging to the United States in the hands of such postmasters, resulting from burglary, fire, or other unavoidable casualty, and if he shall determine that such loss resulted from no fault or negligence on the part of such postmasters, to pay to such postmasters, or credit them with the amount so ascertained to have been lost or destroyed, and also to credit postmasters with the amount of any remittance of money-order funds or postal funds made by them in compliance with the instructions of the Postmaster-General which shall have been lost or stolen while in transit by mail from the office of the remitting postmaster to the office designated as his depository, or after arrival at such depository office, and before the postmaster at such depository office has become responsible therefor: *Provided*, That no claim exceeding the sum of two thousand dollars shall be paid or credited until after the facts shall have been ascertained by the Postmaster-General and reported to Congress, together with his recommendation thereon, and an appropriation made therefor: *And provided further*, That this act shall not embrace any claim for losses as aforesaid, which accrued more than fifteen years prior to March seventeenth, eighteen hundred and eighty-two; and all such claims must be presented to the Postmaster-General within six months from such latter date, except claims for postal funds, which may be received, considered and allowed, if presented within six months after the passage of this act, in cases where the postmaster had, at or about the time of the loss, made report thereof to the Post-Office Department or to an inspector or special agent of the Department; and no claim for losses which may hereafter accrue shall be allowed unless presented within six months from the time the loss occurred.

SEC. 2. That it is hereby made the duty of the Postmaster-General to report his action herein to Congress annually, with his reasons therefor in each particular case.

Approved, May 9, 1888.

This act worked the following changes in the law, viz :

First. In allowing credit for money-order funds remitted for deposit, and lost after arrival at the post-office of deposit ;

Second. In allowing credit for "postal funds" lost since March 17, 1867, either in transit to depositories, or by fire, burglary, or other unavoidable casualty ;

Third. In removing the bar of the statute in cases arising since March 17, 1882, upon which the statute had run.

Immediately upon the passage of the act all pending and adjusted claims were examined ; circular letters were prepared advising postmasters of the change in the law, copies of which were sent to all postmasters and late postmasters who had sustained losses which had been brought to the attention of this office ; and the act was published in the June number of the Official Postal Guide. A summary of its provisions was also furnished the Associated Press, in order that late postmasters whose addresses were not known to this office, or who had not made formal reports of losses, or filed claims for credit or reimbursement, might be advised of their rights in the premises. The result of the efforts to bring the matter to the attention of claimants has been a large increase in the number of claims filed, the greater portion of which, however, were not received until after the expiration of the fiscal year ended June 30, 1888, and are, therefore, not included in this report.

I have the honor, sir, to be, very respectfully,

Your obedient servant,

EDWIN E. BRYANT,

*Assistant Attorney-General, Post-Office Department.*

THE POSTMASTER GENERAL.

EXHIBIT A.—List of claims on account of loss by fire, burglary, etc., allowed from July 1, 1887, to June 30, 1888, under acts of March 17, 1882, and May 9, 1888.

**EXHIBIT A<sup>1</sup>.**—*Criminal statistics as shown by the records of this office for the fiscal years ended June 30, 1883, 1884, 1885, 1886, 1887, and 1888. Classification of postal officials, employés, and others arrested in said years.*

Year.	Postmasters.	Assistant post-masters.	Clerks in post-offices.	Railway post-office clerks.	Letter-carriers.	Mail carriers.	Other employés.	Burglars.	All others for various offenses.	Total.
1883.....	50	26	21	14	21	32	4	68	360	596
1884.....	36	24	31	8	25	25	4	87	516	756
1885.....	64	26	35	23	12	19	5	89	266	539
1886.....	46	31	33	14	24	27	11	79	395	660
1887.....	94	24	24	11	23	23	12	132	430	773
1888.....	90	24	32	12	34	15	6	172	406	791

Exhibit A is a condensed statement of the arrests of offenders against the postal laws, and the action taken, as shown by the records of this service, for the past six years. The number of criminals arrested has about kept pace with the increased number of postal employés and the increase in postal business, except in the burglary of post-offices. This crime has increased to an alarming extent, and, in spite of the efforts of this office, continues to grow.

As stated in my last annual report there is no fund provided for rewards, or to pay for assistance from the local authorities to suppress this crime. I deem it my duty to again ask that you bring this matter to the attention of Congress, and request an appropriation of \$10,000, to be expended under your direction in offering rewards for the arrest of criminals committing this offense. By reference to Exhibits A<sup>1</sup> and F, you will see that 683 post-offices were reported robbed during this fiscal year, for which only 172 arrests were made. This might seem a small number, but when it is considered that there are over 55,000 post-offices and only 100 inspectors, that the information of a robbery is usually twenty-four hours in reaching an inspector, often much longer, the burglars have time to escape. In my opinion if each postmaster, and through him the local authorities, were assured of a small reward, many more arrests would be made, and at a material saving of money to the Government.

**EXHIBIT B.**—*Table showing the number of recommendations made by post-office inspectors for the removal of postmasters and other employés from the postal service for violations of the postal laws and regulations, and other causes, also the number of recommendations made for the discontinuance of post-offices during the fiscal year ended June 30, 1888.*

Months when made.	Postmasters.	Assistant post-masters.	Letter-carriers.	Railway post-office clerks.	Special-delivery messengers.	Clerks in post-offices.	Discontinuance of post-offices.	Total.

Exhibit C shows the result of investigation in the 599 "A" cases which were left uninvestigated at the close of the last fiscal year, and which have received attention this year. In my last report I estimated that actual loss to remitters would result in one-third of these cases, making the total loss for 1887, 1,031 cases, but investigation shows loss in 234 out of the 599 cases, changing the result to a total of 1,065 cases in which loss occurred in 1887, and from one loss in every 11,556 to one in every

11,187 of registered pieces handled. This result strengthens and confirms the correctness of my estimate of the actual losses for the years 1883, 1884, and 1885.

EXHIBIT D.—*Number and character of complaint, by States, upon which "A" cases were made up and referred to post-office inspectors for investigation during the fiscal year ended June 30, 1888.*

Exhibit E shows the result of investigation of the complaints set forth in Exhibit D. Of the total number of complaints made (4,820), 3,978 were investigated and closed, leaving for future inquiry 842 cases. The following condensed statement taken from the footings of Exhibit E shows the result of inquiry in 3,978 cases:

Total number as shown by Exhibit D.....	4,820
Ascertained causes of complaint:	
No loss, properly delivered.....	1,772
Improper address.....	34

## Ascertained causes of complaint—Continued.

Unavoidable delay.....	31
Careless handling.....	125
Wrong despatch.....	94
Other causes.....	175
No inclosure, no loss.....	103
Not rifled, no loss.....	233
Not rifled by postal employés.....	68
Not registered.....	65
Total, no loss, no just ground for complaint.....	2,700
Cases in which the loss was recovered and paid to the proper owner.....	713
Total number of cases investigated in which no loss was sustained.....	3,413
Cases in which loss resulted from accidents, no blame attaching to postal officials:	
From burning of post-offices.....	15
From burning of postal cars.....	1
From wrecking of postal cars.....	13
From other accidental causes.....	195
From theft by postal officials.....	213
From causes not ascertained.....	128
Number awaiting attention.....	842

It is shown that loss was sustained in 565 cases of the 3,978 investigated. Add to this number 280 cases, or one-third of the 842 cases outstanding (this is the basis adopted for the past five years) and we have a total loss of 845 cases out of a total number of registered articles sent for the year of 12,957,611, or one piece out of every 15,334 pieces handled. The loss last year was placed at 1,031 pieces. Investigation of the 599 cases left over showed a loss of 234 pieces (instead of 200), estimated, increasing the actual loss for last year to 1,065 pieces out of a total number of pieces registered of 11,914,792, or one piece out of every 11,187 pieces handled.

Exhibit F clearly shows the complaints of all kinds, depredations on and accidents to the ordinary domestic mail and postal property for this fiscal year; also the place or State of depredation or accident. Forty-four thousand nine hundred and seventeen complaints were filed as compared with 42,096 last year. Considering the increased amount of mail handled, as indicated by increased number of stamps sold, this statement indicates a decided improvement in the service. The only exception is in the increased number of post-offices reported robbed. As heretofore stated this crime continues to increase and demands a remedy, which I have heretofore suggested, viz, the appropriation of a sum of money by Congress, to be used under your direction, for paying rewards for the arrest of post-office burglars. This appropriation was recommended by ex-Postmaster General Vilas in his last annual report. At the request of the House Committee on Post-Offices and Post-Roads, I appeared before that committee and urged the passage of this appropriation. I am under the impression that the need for this appropriation is conceded by the committee, but so far no action has been taken.

EXHIBIT G.—Number, nature of case, and office of original reference of miscellaneous cases (Class C) referred to post-office inspectors for investigation during the fiscal year ended June 30, 1888.

Class of cases.	Offices from which references were made for investigation.

## EXHIBIT I.—Recapitulation.

	Number.
Cases, Class C, referred to inspectors for investigation during fiscal year 1887-'88.....	34,250
Such cases on hand July 1, 1887, referred for investigation during previous years.....	5,627
Total to be accounted for.....	39,877
Number of such cases referred to inspectors, reported upon, and finally closed during the fiscal year 1887.....	26,237
Number of such cases referred to inspectors during previous years, reported upon and finally closed during the fiscal year 1887-'88.....	5,308
Total number of such cases closed.....	31,545
Number of such cases remaining in the hands of inspectors July 1, 1888 (uninvestigated)....	8,332

Exhibits G, H, and I present the miscellaneous or C cases treated by this office during the past year in as comprehensive a shape as the nature and variety of the cases will permit.

A glance at the tables gives but a faint idea of the work and time required to properly report on the various subjects treated. By special request of ex-Postmaster-General Vilas Congress appropriated \$100,000 in addition to the regular appropriation of \$200,000 for mail depredations for the purpose of inspecting the accounts of postmasters of the fourth class, and instructing them in their duties. This class of work was commenced on July 1, 1887, and during the year the greater part of the time of this force was devoted to that special work, not, however, to the detriment or neglect of current work. Previous to 1886 no general inspection of the post-offices of the country had ever been undertaken; only such offices, generally of the higher grades, as required special examination had received this attention. In my opinion, this is the true function of an inspector, the conservator and instructor of the postal service. During 1883, 1884, and 1885 only 360 offices are reported to have been inspected; during 1886, 1,030; 1887, 4,238; and the past year 24,889. The good result to the postal service in all its branches can not be accurately estimated or intelligently stated in figures or tables.

The records of every branch of the Department plainly indicate its good results—in the promptness with which reports are sent in to the Third Assistant Postmaster-General's Office and deposits of postal

funds are made; in the decrease of complaints against the conduct of postmasters in the office of the First Assistant Postmaster-General; in the saving and curtailment of expenses on mail-messenger and star-route service; the relocation of star routes in the Second Assistant Postmaster-General's Office; promptness in rendering reports and deposit of money-order funds. In the Sixth Auditor's Office a material improvement is shown in the receipts of the Department from the fourth-class offices, notably in the decreased rate per cent. of expenses to receipts from that class of offices.

There is also a marked improvement in the accuracy and safety with which the registered and ordinary mail is handled, as shown by exhibits of this report. In the prosecution of this work all offices of every grade have been inspected in Florida, Utah, Idaho, and the six New England States. In Alabama, California, Colorado, Delaware, Georgia, Illinois, Indiana, Kansas, Louisiana, Maryland, Michigan, Minnesota, Mississippi, Missouri, Nebraska, New Jersey, New York, Ohio, Oregon, Pennsylvania, Tennessee, Texas, Virginia, and Wisconsin all offices where the gross revenue or receipts amount to \$10 or more per quarter have been inspected, except 6,716 offices now receiving attention, principally in Tennessee, Illinois, Indiana, Texas, and California. In Arizona, Arkansas, Dakota, Iowa, Kentucky, Montana, Nevada, North Carolina, South Carolina, Washington, West Virginia, and Wyoming this work has not been undertaken, for the reason that the appropriation for this purpose was not renewed for this fiscal year. It is proper to state that it is the intention of this office to continue this work to as great an extent as the means at its disposal will justify. It is believed that the present force can dispose of the 6,716 cases on hand and at the same time not neglect current work during the fiscal year ending June 30, 1889. The amount of money recovered from delinquent postmasters in the course of this work, and by reason of this inspection, is greater than the whole amount expended by the Department for the performance of the work. I submit for your consideration and decision the expediency of asking a renewal of this special appropriation for next year.

NOTE.—The amount charged to account of delinquent postmasters, under section 259, Postal Laws and Regulations, 1887, fraudulent return of stamps canceled for previous years, \$205,633.37.

Amount charged as above during this fiscal year.....	\$40,991.23
Amount of money-order funds collected of and caused to be deposited by delinquent postmasters.....	133,138.44
Amount of postal funds collected from delinquent postmasters for other causes and paid into the Treasury.....	3,395.45
Total amount so collected and caused to be deposited by inspectors for the year.....	177,525.12

#### CLASS F.—FOREIGN CASES.

In this class are comprised all cases relating to alleged loss, delay, non-delivery, tampering, and other irregularities (including violations of customs regulations and of specific sections of the Postal Laws and Regulations) so far as concerns registered and ordinary mail matter passing between foreign countries and the United States.

These cases are subdivided into three general classes as regards the character of the complaints, and the treatment varies materially in the investigation of each class. These subdivisions consist of cases relating to registered mail matter, unregistered mail matter, and cases having reference to miscellaneous complaints against postmasters and postal employes in their handling and treatment of foreign mail.

Of class F cases there were reported to this office for investigation during the fiscal year ended June 30, 1888, 10,855. Of these 6,683 related to registered mail, 3,802 to unregistered mail, and 370 to miscellaneous complaints. Of the whole number 6,855 were reported from domestic sources, and 4,000 (approximately) were reported by foreign postal administrations.

The total number of registered cases treated of and closed during the year, in which no actual loss was sustained, was 5,690; while the number in which the loss was not accounted for, or when accounted for, no recovery could be effected, was only 246. The following tables, marked Exhibits K and L, will show between what foreign countries and what States the mail matter was passing, the character of the mail matter, and the localities chiefly affected.

EXHIBIT K.—States and countries between which the registered mail was passing, and number of cases in which investigation determined that no loss had been sustained.

In addition to the cases embraced in the foregoing table (Exhibit K), there were 338 cases of foreign origin, in which the mail matter was simply passing through the United States in transit to some other foreign country, and which were closed without loss to the persons interested; and in addition to those mentioned in Exhibit L there were 44 cases in which losses of foreign registered letters occurred in the United States by wrecks or burning of post-offices or cars, and in which the losses could not be made good or the exact origin or destination of the mail be ascertained. The table of losses, Exhibit L, may be summarized as follows:

Registered letters lost in which neither the facts or circumstances could be ascertained by investigation .....	55
Registered letters lost for which no recovery could be made or indemnity paid ..	40
Registered letters alleged to have been rifled in transit through the mails, in which cases the depredation could not be located either in the United States or in foreign countries .....	75
Number of cases in which the depredation was believed to have been located, but no recovery could be made .....	9
Registered letters or packets ascertained by foreign correspondence to have been confiscated, in Russia, by reason of dutiable or unmailable nature of contents ..	23

The unregistered cases treated of in Class F and disposed of during the fiscal year are indicated on the following table, marked Exhibit M. The entire number is 3,824, of which 1,253 cases were closed without loss, and in 2,578 cases the losses remained unaccounted for.

EXHIBIT M.—*States and countries between which the unregistered mail was passing which became the subject of investigation, and number of cases involved.*

The character of the mail matter embraced in the foregoing table may be stated as follows:

Unregistered packets	1,742
Unregistered letters containing inclosures	1,476
Unregistered letters without inclosures	613

3,831

From this total should be deducted seven cases, regarding mail originating in foreign countries and passing through the United States to some other foreign countries, and therefore not included in the table.

The miscellaneous foreign cases, Class F, consisted of 338 cases

treated and closed during the fiscal year, of a character indicated as follows:

Cases based upon complaints of United States collectors of customs of the non-payment of duty on mail matter imported from foreign countries, intended for delivery in this country .....	132
Complaints of the circulation of lottery circulars sent from foreign countries into the United States .....	38
Complaints originating with the Superintendent of the Money-Order System, as to wrong or irregular issue and payment of foreign money-orders, etc....	35
Miscellaneous complaints of the violation of specific sections of the postal laws by use of the mails between the United States and foreign countries, and other cases not coming under the classes previously mentioned.....	133
	<hr/> 338

## SUMMARY.

Number of F cases on hand undergoing treatment, in the hands of post-office inspectors and in the office of chief post-office inspector, on July 1, 1887...	1,940
Number of new cases reported July 1, 1887, to June 30, 1888.....	10,855
	<hr/> 12,795
Number of such cases completed and closed for the year.....	10,044
Number in the hands of inspectors July 1, 1888.....	64
Number on hand undergoing treatment in the office of chief post-office inspector, July 1, 1888 .....	2,687
	<hr/> 12,795

The number of foreign cases on hand at the end of the fiscal year is necessarily large, for the reason that it requires time to receive replies from foreign administrations. In some instances a month or six weeks is sufficient time in which to receive replies from abroad, but in other cases five or six months may be necessary, and some peculiar cases may even be under correspondence for as long a period as two years.

The number of communications received from foreign departments, intended for treatment by this office, and requiring translation, was approximately 4,500. The necessary translations were furnished by the office of the Superintendent of Foreign Mails.

Of the whole number of foreign cases (Class F) treated for the fiscal year, 897 were sent to inspectors for investigation and report, and 9,147 were treated by correspondence in the office of chief inspector.

EXHIBIT N.—*Statement of the receipt and disbursement of moneys collected and recovered on account of lost and rifled registered and ordinary letters for the fiscal year 1888.*

## RECEIPTS.

Amount appropriated .....	\$200,000.00	\$200,000.00	\$200,000.00	\$200,000.00	\$300,000.00
Total amount of money expended .....	\$187,186.00	\$199,239.57	\$194,955.39	\$197,624.63	\$290,799.66
Cases on hand at end of each fiscal year .....		46,221	13,445	18,016	*21,014

\* Of this number (21,014), 6,716 are cases of inspection of post-offices (not current work), leaving actually 14,298 cases in the hands of inspectors for investigation.

A candid consideration of Table No. 1, and comparison of the results for the different years, proves conclusively that the safety of the registered mail has materially and steadily improved for the past three years; and that its present treatment is decidedly better than hereto-

fore. In support and proof of this claim I call attention to the fact that the number of complaints this year has decreased 466, or 8 per cent.; the number of losses has decreased 220, or 20 per cent.; while the number of pieces handled has increased 1,042,819, or  $8\frac{3}{4}$  per cent.; and the ratio of pieces lost to pieces handled has decreased from 1 in 11,187 to 1 in 15,334, a decided improvement. It is thus shown, in every respect, that the registered mail is more safely handled, more accurately delivered, in 1888 than in 1887 or previous years.

Table No. 2, compiled from the records of this office, presents the depredations and casualties to the ordinary mail and postal property for the past six years. In my opinion it fully sustains the claim of improved mail service, more definitely made in Table No. 1. Unquestionably the volume of ordinary mail has largely increased, as shown by the increased revenue of the Department from the sale of postage-stamps (see foot of Table No. 2). In 1887 the total number of complaints was 42,096; in 1888, 44,917, an increase of only 2,821, while the revenue increased \$4,329,017.

Very respectfully,

WM. A. WEST,  
*Chief Inspector.*

Hon. DON M. DICKINSON,  
*Postmaster-General.*

# REPORT

## OF THE

### TOPOGRAPHER OF THE POST-OFFICE DEPARTMENT.

---

POST-OFFICE DEPARTMENT, TOPOGRAPHER'S OFFICE,  
*Washington, D. C., August 27, 1888.*

SIR: Referring to the general operations carried out in the above branch of the Post-Office Department, I have the honor to submit the following report for the fiscal year ending June 30, 1888.

A. Hoen & Co., Baltimore, Md., had the contract during the year for the production of bi-monthly editions of the post-route maps. They have faithfully fulfilled the conditions of their contract as to date of delivery and finish of work. April 11, 1888, proposals were issued, inviting bids for the reproducing and furnishing so many copies of the post-route maps every two months during the fiscal year ending June 30, 1889. Two bids were received: (1) Julius Bien & Co., of New York City, \$15,000; (2) A. Hoen & Co., Baltimore, Md., \$15,000. In all the items referred to in the proposal both bidders are alike, with the single exception of the item referring to the printing of special railway maps; in this case Julius Bien & Co. are above A. Hoen & Co.'s bid; the latter, being the lowest bidder, was awarded the contract for the current fiscal year. A. Hoen & Co. exceed their previous bid in the sum of \$500, though the number of maps allowed to each State has not been increased. I attribute this advance to the increasing number of corrections necessary to erase from the lithographic stones, and the absense of a lively and active competition among the craft. For the past four years the competition has been chiefly confined to Julius Bien and A. Hoen. Both are practical and skilled in the matter of post-route corrections transferred to lithographic stones. Lithographers have called on me for all necessary information, carefully examined the correction sheets, but, owing to the peculiar character of the work, which consists in a series of erasures (on the stones) made month after month, they declined to bid, stating that "there was no money in the work."

The 38 lithographic stones (known as the black) now in charge of A. Hoen & Co. are the property of the Post-Office Department.

The 180 color stones in use for representing the "star service" in distinct color lines are the property of A. Hoen & Co.

During the fiscal year six editions of post-route maps are received, issued every second month. Two thousand five hundred sheets form one edition, which, when placed and arranged in the order of their respective State boundaries and junction lines (allowing each State its allotted number of maps as per schedule), produce in the aggregate 930

maps, showing clearly the entire postal service throughout the country, from Maine to California.

The total number of maps received during the year amount to 5,580. In order to provide against any unforeseen mishap (through fire or otherwise) to the lithographic stones, the contractor, immediately after the printing of each edition, has to deposit two copies each of twenty-five maps with the Safe Deposit and Trust Company, Baltimore, Md.; the receipt for such deposit is sent to the topographer. The chief clerk of the Post-Office Department receives a monthly report from the topographer referring to the sales of maps, as well as the general distribution of post-route maps, official and otherwise.

All post-route maps becoming obsolete and useless are delivered over to the superintendent and disbursing clerk of the Post-Office Department. All maps leaving the topographer's office, by sale or otherwise, is through written orders emanating from headquarters.

At the close of the fiscal year ending June 30, 1888, the sales of post-route maps (authorized by law) were as follows: Two hundred and thirty maps, mounted on cotton, and trimmed with strips and rollers; 340 maps furnished in sheets. The cash receipts received for the latter (570 maps) amounted during the year to the sum of \$1,885.50. For the fiscal year ending June 30, 1887, 276 maps mounted, and 423 maps in sheets, were sold; cash received for the sale of 699 maps, \$2,291.

Hence, comparing the cash receipts of the corresponding periods, there is a decrease of \$405.50. It is respectfully suggested that, in reviewing the topographer's estimate for the production of post-route maps, renewals of lithographic stones and working material, too much reliance should not be placed in the factor, yearly derived from the sales of post-route maps. For the detailed distribution of post-route maps, I respectfully refer you to the tabular statement appended to this report.

The effective force engaged in this branch of the service number 25 employés (17 males and 8 females), and are classed as follows:

Topographer (in charge) .....	1
Skilled draughtsmen preparing sheets for lithographer (7 males, 1 female).....	8
Projector and compiler of new maps .....	1
Draughtsmen engaged in drawing new maps .....	2
Filling in detail work on new edition of sheets (females) .....	4
In charge of color routes, and examiner (female) .....	1
Clerk in charge of records .....	1
Corresponding clerk (female).....	1
Map-mounters .....	2
Office messenger .....	1
Watchmen.....	2
Charwoman .....	1

Eight draughtsmen are specially employed in preparing a series of correction sheets for the guidance and information of the lithographer; pending the issue of an edition, 240 sheets are interchanged between the topographer and lithographer. From day to day a graphic exhibit on said sheets is kept up of all post-offices established, changed, and discontinued, with their attendant and contiguous star routes, as well as the extension of additional and changed railway service, all of which have to be transferred to the lithographic stones for new impressions; hence the cause of the numerous erasures and re-erasures on the working surface of the stones, so that, after a period of five years, the life or usefulness of the latter is impaired.

In connection with the above duty the eight draughtsmen referred to have to correct, revise, and "bring up" 313 maps used for daily reference at the headquarters of the Department. During the year I have

received (through the Postmaster-General) 929 letters emanating from the Second Auditor of the Treasury Department; these letters referred to 1,456 queries as to the shortest and most practicable mail route between two given points traveled by officers and soldiers of the U. S. Army during the years 1861 to 1865 (inclusive). Replying to these queries called for the computation (from paper) of 953,020 statute miles. The following new work has been supplied during the fiscal year ending June 30, 1888:

Seven hundred lithographic sheets of Texas.

Five hundred lithographic sheets of Minnesota.

These 1,200 sheets show the Railway Mail Service with all necessary side connections, and were delivered to the General Superintendent of the Railway Mail Service.

One hundred lithographic sheets of central Florida.

Environs of San Francisco and Los Angeles, Cal.; the latter are laid down to an enlarged scale, and appear lithographed on their respective sheets for ready reference.

Two thousand lithographic index diagrams, showing the order in which the post-route maps are published, are attached to the price-list of maps.

The new map of Kentucky and Tennessee (in four sheets), referred to in previous yearly reports, is now in the hands of the lithographer. During the current fiscal year new maps of Texas and California will be prepared.

To insure accuracy in plotting the relative position of post-offices circular queries and location papers are daily sent to postmasters in order that they may be correctly shown. When instructed by the railway adjustment division concerning additional and changed railway service, special tracings are made of the immediate surrounding country and sent to superintendents or chief engineers, requesting that the correct course of their line or branch be plotted on the tracing and returned to topographer. In all such cases the railway officers referred to have cheerfully complied with the request, and in several instances have furnished special tracings of their surveys made under their immediate direction.

Report for the fiscal year ending June 30, 1887, referred to the condition of the maps and lithographic stones of Maine, New England, and New York States. The appropriation allowed for the current fiscal year provides for the renewals of the latter; the work is now in hands, and new maps will be issued before the close of the current year.

In my estimate for the fiscal year ending June 30, 1890, I provide for the renewals of the following maps: Illinois, Iowa, Missouri, Texas, Indian Territory, and California. To assist in the preparation of the latter, the services of an additional draughtsman will be required. The lithographic stones referred to in this report are in use since 1883, subject every second month to a series of erasures and re-erasures injurious to the working faces of the stones. In connection with the latter I respectfully direct your attention to the appended report from A. Hoen & Co., Baltimore.

I take pleasure in reporting that the employés in this office during the year have been attentive, careful, and steady in the discharge of their respective duties.

I have the honor to remain, very respectfully, your obedient servant,

DAVID ENRIGHT,  
*Topographer.*

Hon. DON M. DICKINSON,  
*Postmaster-General, Washington, D. C.*

*Detailed statement of the distribution of post-route maps during the fiscal year ending June 30, 1888.*

### CONDENSED STATEMENT OF THE TOPOGRAPHER'S OFFICE, POST-OFFICE DEPARTMENT, DURING THE FISCAL YEAR ENDING JUNE 30, 1888.

Number of correction sheets brought up (every two months) for lithographer.	240
Number of color sheets, showing star service (every two months), sent to lithographer .....	60
Number of maps kept up in detail (monthly) for reference at the headquarters of the Department .....	313
Number of post-offices established, their relative location plotted on maps thus: — — ○ .....	3,454
Number of post-offices changed, their relative location plotted on maps thus: ○ .....	1,376
Number of post-offices discontinued, marked on maps thus: ⊗ .....	1,450
Number of star-route changes plotted on maps .....	9,698
Number of railway tracings prepared in the office and sent out .....	221
Number of miles of railway service extension plotted on maps .....	11,873
Number of new counties established, their respective boundaries and names obtained from State records .....	10

*Computation of mileage distances by the shortest and most practicable mail-route between two given points traveled during the years 1861 to 1865, inclusive.*

For the Second Auditor of the Treasury Department .....	953,020
For the Director of the Mint .....	21,758
For the War Department .....	10,325

#### *Post-route maps—epitome of distribution.*

Mounted:		In sheets:	
Official distribution .....	748½	Official distribution .....	3,101
Complimentary distribution .....	489½	Complimentary distribution .....	260½
Purchasers .....	229½	Purchasers .....	340
Total .....	1,467½	Total .....	3,701

#### *Official letters sent out.*

Letters to railway officers with prepared tracings inclosed .....	238
Circular queries for location of post-offices sent to postmasters .....	1,633
Letters replying to 1,456 queries from the Second Auditor of the Treasury Department .....	929
Letters to Hoen & Co., lithographers .....	173
Miscellaneous letters referring to the work .....	1,498
	4,158

*Official letters received.*

Answers from postmasters to queries in location papers.....	869
Letters received from Second Auditor of the Treasury Department.....	929
Letters from the lithographer on the work .....	159
Miscellaneous letters (including returns and tracings from railway officers)....	1,715

---

 3,672
*Establishment and changes in post-offices.*

Reported from appointment office daily and entered in record (by draughtsmen), 6,280 items.

*Reports of changes in service received.*

Monthly reports from corresponding clerks of contract office compared by draughtsmen with their route books. Total received during the year .....	150
Special reports from railway adjustment division of contract office, concerning additional and changed railway service. Total received during the year.....	344
Daily reports (printed bulletins). Total received during the year .....	304

All of the items enumerated have been promptly transferred to the working maps, sample sheets, and to the correction sheets for the lithographer, and on 313 maps in use at headquarters of the Department.

---

 BALTIMORE, MD., July 28, 1888.

SIR: In reply to yours of the 26th instant, we have to report as to the condition of the post-route lithographic stones, the property of the Post-Office Department, in our charge; they are in a bad state from the long use and great amount of handling they have been subjected to since 1883. In this connection we beg to say that it is our belief that the stones have been in use longer and subjected to a greater amount of handling than any stone or stones ever used in lithography, and should be replaced by new transfers.

Respectfully,

A. HOEN & Co.,  
Lithographers.

Mr D. ENRIGHT,  
Topographer, Post-Office Department.

---

REPORT

OF THE

FIRST ASSISTANT POSTMASTER-GENERAL

FOR THE

FISCAL YEAR ENDING JUNE 30, 1888.

---

# REPORT

## OF THE

### FIRST ASSISTANT POSTMASTER-GENERAL.

#### POST-OFFICE DEPARTMENT, OFFICE OF THE FIRST ASSISTANT POSTMASTER-GENERAL, Washington, D. C., November 17, 1888.

SIR: I have the honor to submit the following report of the work of this Bureau for the year ended June 30, 1888:

#### APPOINTMENT DIVISION.

*Statement showing the number of post-offices established and discontinued, the number of postmasters appointed, and the increase or decrease as compared with the previous year.*

Post-offices.	June 30, 1887.	June 30, 1888.	Increase.	Decrease.
Number of post-offices established during the year.....	3,043	3,864	821	.....
Number of post-offices discontinued.....	1,500	1,645	145	.....
Net increase over previous year.....	1,543	2,219	676	.....
Whole number of post-offices.....	55,157	57,376	2,219	.....
Number filled by appointment of the President.....	2,336	2,488	152	.....
Number filled by appointment of the Postmaster-General.....	52,821	54,888	2,067	.....

#### *Appointments during the year.*

Appointments.	June 30, 1887.	June 30, 1888.	Increase.	Decrease.
On resignations and commissions expired.....	6,863	6,521	.....	342
On removals.....	2,584	1,244	.....	1,340
On deaths of postmasters.....	589	659	70	.....
On establishment of new post-offices.....	3,043	3,864	821	.....
Total.....	13,079	12,288	891	1,682

Total number of appointments during the year.....	12,288
Number of post-offices discontinued.....	1,645
Names and sites changed, with retention of incumbents.....	1,493
Total number of cases acted upon during the year.....	15,426

It will be observed from the above statement that there was an increase during the last fiscal year, both in the number of post-offices established and discontinued, as compared with the previous year, there having been 821 more post-offices established and 145 more discontinued than during the year ended June 30, 1887.

The increase in the whole number of post-offices was likewise greater than for the previous year, it having been 2,219, as against 1,543 for that ended June 30, 1887. The increase in the number of offices whose

names or sites were changed during the past fiscal year largely exceeded those of the preceding year, the number having been 1,493, as compared with 696 for the year ended June 30, 1887. These changes occurred mainly in the Western States, particularly in Kansas, whose railroad facilities have been greatly increased within the last twelve months.

The increase and decrease in the number of offices, arranged by sections, States, and Territories, were as follows:

	Increase.	Decrease.	Net increase for 1888.	Net increase for pre- vious year.
<i>New England States.</i>				
Maine.....		4		
New Hampshire.....		1		
Vermont.....	1			
Massachusetts.....	5			
Rhode Island.....	3			
Connecticut.....	1			
Total.....	10	5	5	45
<i>Middle States and District of Columbia.</i>				
New York.....	26			
New Jersey.....	8			
Delaware.....	8			
Maryland.....	39			
Pennsylvania.....	100			
District of Columbia.....	2			
Total.....	183		183	202
<i>Southern States and Indian Territory.</i>				
Virginia.....	126			
West Virginia.....	105			
North Carolina.....	158			
South Carolina.....	80			
Georgia.....	96			
Florida.....	43			
Alabama.....	106			
Mississippi.....	65			
Louisiana.....	50			
Texas.....	138			
Arkansas.....	104			
Missouri.....	94			
Tennessee.....	74			
Kentucky.....	126			
Indian Territory.....	41			
Total.....	1,406		1,406	785
<i>The three States and Territories of the Pacific slope.</i>				
Oregon.....	36			
California.....	106			
Nevada.....	5			
Washington.....	27			
Arizona.....	9			
Alaska.....	7			
Total.....	190		190	115
<i>The ten States and six Territories of the West and Northwest.</i>				
Ohio.....	74			
Indiana.....	41			
Michigan.....	34			
Illinois.....	34			
Wisconsin.....	12			
Iowa.....	32			
Minnesota.....	28			
Kansas.....	28			
Nebraska.....	11			
Colorado.....	59			
Dakota.....	33			
New Mexico.....	12			
Montana.....	35			
Wyoming.....	25			
Idaho.....		6		
Utah.....		17		
Total.....	458	23	435	396

There was an increase in the number of offices of one hundred or more in each of the following States during the year: North Carolina, 158; Texas, 138; Virginia, 126; Kentucky, 126; Alabama, 106; California, 106; West Virginia, 105; Arkansas, 104, and Pennsylvania, 100.

The decrease in the number of offices was as follows: In Maine, 4; in New Hampshire, 1; in Idaho, 6, and in Utah, 17.

The following statement shows the number of States in which there were, on the 30th of June last, two thousand or more post-offices, together with the number of Presidential and money-order offices in each on that date:

States.	Whole number of post-offices.	Number of Presidential offices.	Number of money-order offices.
Pennsylvania .....	4, 219	183	448
New York .....	3, 274	224	531
Ohio .....	2, 908	138	513
Virginia .....	2, 481	35	128
Illinois .....	2, 300	187	630
North Carolina .....	2, 268	25	130
Missouri .....	2, 211	79	369
Texas .....	2, 045	78	315
Tennessee .....	2, 044	28	229

It will be observed from the above that while Pennsylvania ranks first in the whole number of its post-offices, it is only third in the number of Presidential, and fourth in money-order offices. New York is first in the number of its Presidential offices, but second in the whole number of post-offices, and also second in its money-order offices. Illinois is first in rank in the number of money-order offices, second in the number of its Presidential offices, and fifth in the whole number of offices.

As a result of the annual adjustment of postmasters' salaries, which took effect July 1, 1888, 28 of the third class were reduced to the fourth class, and 42 offices of the fourth class were assigned to the third class, leaving 2,502 Presidential offices in operation on the first day of the present fiscal year. Divided into classes, the numbers are as follows: First, 97; second, 497; and third, 1,908.

The number of money-order offices in operation June 30, 1888, was 8,111, an increase of 366 over the number reported the previous year.

The number of postmasters appointed during the year was 12,288.

The total number of cases acted upon, including discontinuances and names and sites changed, with retention of incumbents, was 15,426. The number of appointments made to fill vacancies caused by deaths of postmasters was 659.

For further detailed information upon the subject of the establishment, discontinuance, and change of names and sites of post-offices and the appointment of postmasters, reference is made to tables marked A, B and C, appended to this report.

#### BOND DIVISION.

To this division belongs the work of recording the appointments of all postmasters, the establishment, discontinuance, and changes of names and sites of post-offices, and the preparation and transmission of the necessary letters of appointment, together with blank bonds and oaths to be executed by newly-appointed postmasters.

The aggregate of the work performed during the fiscal year ending June 30, 1886, compares favorably with that of the preceding year. The changes, contrasting one year with the other, are, in the main, so uniform as to excite no remarks.

The number of post-offices actually established during the past fiscal year was 3,501, a number never exceeded, except in the fiscal year ending June 30, 1884, and June 30, 1886, respectively. The net increase in the fiscal years ending June 30, 1885, and June 30, 1887, was 1,235 and 1,543, respectively.

The following is a statement of the operations of the bond division for the fiscal year ended June 30, 1888:

Number of Presidential cases recorded and upon which appointment papers, bonds, etc., were mailed.....	749
Number of cases of the fourth class recorded and upon which appointment papers, bonds, etc., were mailed.....	14,575
Number of appointment bonds examined, indorsed, and submitted to the Postmaster-General for approval.....	12,044
Number of bonds returned for correction.....	3,408
Number of appointment bonds filed.....	12,044
Number of new bonds required under the Postmaster-General's order of May 21, 1885.....	2,407
Number of new bonds required upon request of surety to be released.....	645
Number of new bonds required at the instance of the Third Assistant Postmaster-General.....	197
Number of new bonds required upon recommendations of post-office inspectors.....	165
Number of new bonds required in consequence of the extension of the money-order business.....	504
Number of new bonds required in consequence of the establishment of the postal-note business.....	278
Number of new bonds sent upon requests from postmasters.....	961
Total number of new bonds required.....	5,157
Number of new bonds received, examined, indorsed, and submitted to the Postmaster-General for acceptance.....	4,383
Number of new bonds reported to the Third Assistant Postmaster-General...	909
Number of new bonds reported to the Auditor.....	4,383
Number of bonds reported to the Money-Order Office.....	2,731
Number of new bonds filed.....	4,383
Number of jackets prepared in sending new bonds.....	5,157
Number of commissions prepared and mailed to postmasters.....	12,066
Number of commissioned postmasters reported to the Auditor.....	12,044
Number of commissioned postmasters reported to the Third Assistant Postmaster-General.....	12,044
Number of commissioned postmasters reported for publication in the Postal Bulletin.....	12,044
Number of commissioned postmasters reported to the Money-Order Office...	1,436
Number of blank designations and oaths mailed to acting postmasters.....	625
Number of designations and oaths of acting postmasters received, examined, indorsed, recorded, and filed.....	593
Number of acting postmasters reported to the Auditor.....	593
Number of circular letters sent on appointments, establishments, changes of names and sites, and discontinuances of post-offices.....	66,651
Number of circulars sent with new bonds.....	10,314
Number of circulars sent to appointees delinquent in the execution of their bonds.....	694
Number of circular letters accompanying bonds returned for correction.....	3,408
Number of circulars accompanying commissions sent to postmasters.....	12,044
Number of surety circulars sent to Chief Post-Office Inspector.....	2,697
Number of circulars sent to postmasters delinquent in furnishing new bonds.	2,071
Number of circular letters sent notifying sureties of death of postmasters....	625
Number of manuscript letters written.....	4,979
Number of post-office inspectors' reports on responsibility of sureties received, examined, and filed.....	3,023
Number of blank oaths for assistant postmasters, clerks, and employes mailed.	27,112
Number of oaths of assistant postmasters, clerks, and employes received, examined, indorsed, and filed.....	27,179

Number of establishments, discontinuances, and changes of names and sites of post-offices reported to the Second Assistant Postmaster-General.....	6,548
Number of establishments, discontinuances, and changes of names and sites of post-offices reported to the Third Assistant Postmaster-General.....	5,585
Number of establishments, discontinuances, and changes of names and sites of post-offices reported to the equipment division.....	5,585
Number of new offices reported to the division of post-office supplies.....	3,501
Number of discontinuances reported to the Auditor.....	1,499
Number of entries made on the books of the division.....	78,076
Number of current records in use.....	35
Number of blank forms in use.....	72

## DIVISION OF CORRESPONDENCE.

To this division is assigned the miscellaneous correspondence of the Department, controversies as to the proper delivery of mail, inquiries as to the construction of the postal laws and regulations, and other points of general information, correspondence in relation to which is not assigned to other offices.

This division was also charged with the classification of mail matter until September 15, 1887, when that duty was assigned to the office of the Third Assistant Postmaster-General.

The following is a summary of the work performed by this division during the fiscal year ended June 30, 1888:

Number of letters written to postmasters and private individuals involving decisions under postal laws and regulations.....	12,707
Number of telegrams sent in reply to communications requiring the immediate action of the Department.....	48
Number of newspaper and periodical publications claiming the right of admission to the mails as second-class matter examined and admitted from July 1, 1887, to September 15, 1887.....	645
Number of newspaper and periodical publications claiming the right of admission to the mails as second-class matter examined and rejected from July 1, 1887, to September 15, 1887.....	66
Amount of money collected from publishers of second-class matter for violations of law in mailing third-class matter inclosed with their publications at second-class rates, from July 1, 1887, to September 15, 1887.....	\$393.41

The collections, amounting to \$393.41, were made through the office of the Third Assistant Postmaster-General, and were the result of decisions made in this division.

The work of this division was assigned to the office of the Assistant Attorney-General for this Department by order of the Postmaster-General, dated September 15, 1888.

## DIVISION OF POST-OFFICE SUPPLIES.

This division supplies offices of the fourth class with 8 ounce letter-balances, facing-slips, canceling ink, stamping-pads, post-marking, rating, and canceling stamps, thirty-eight forms of blanks, and, if the salary of the postmaster be \$50 per annum or more, with twine and wrapping paper.

Offices of the third class are furnished, in addition to the above, with thirty-two forms of blanks, 4-pound scales, and, when necessary to weigh second-class matter, 62 and 240-pound scales.

Offices of the first and second classes are furnished, in addition to the above, with test weights, 600-pound scales when necessary, thirty forms of blanks pertaining to the free-delivery system, and with seventy-seven items of stationery.

The Department proper is furnished with eighty items of stationery, blanks, blank-books, labels, records, registers, etc.

## WORK DONE BY DIVISION.

The number of requisitions briefed, filled, and filed for the various classes of articles furnished for the fiscal years ended June 30, 1885, June 30, 1886, June 30, 1887, and June 30, 1888, is shown by the following:

TABLE 1.

Class of articles.	1884-'85.	1885-'86.	1886-'87.	1887-'88.
Twine and wrapping paper.....	34,600	39,506	51,357	57,847
Marking and rating stamps.....	17,529	21,537	24,885	30,872

Sacks.....	11,000	15,557	27,884	29,209
Cases.....	427	550	1,600	2,613
Total.....	171,962	216,607	297,055	308,755

The following table shows quantity of the principal contract articles furnished for the fiscal years ended June 30, 1885, June 30, 1886, June 30, 1887, and June 30, 1888. Owing to the absence of complete records prior to the year ended June 30, 1887, the comparative statement as to articles of stationery, etc., furnished is incomplete:

TABLE 3.

Articles.	1884-'85.	1885-'86.	1886-'87.	1887-'88.
Blanks.....	51,494,447	57,674,302	60,468,000	65,566,850

Sponge.....pieces.....			5,280	7,340

The large increase of facing slips shown as issued in the year 1887-'88 over the amount issued in the year 1886-'87 (see Table 3) arises from the fact that an accurate account has been kept of the number of reams of facing-slip paper sent to the larger offices of the first and second classes and to superintendents of the Railway Mail Service for the purpose of cutting into facing slips, amounting to 116,363,120 slips, which amount, added to the slips sent direct from this division, makes the amount equal to that shown in the above table. The amount given of facing slips issued in previous year represents only the amounts mailed from this division as given in itemized statement of wrapping paper in last year's report.

The amount of the more important portions of clerical labor performed for the fiscal years ended June 30, 1885, June 30, 1886, June 30, 1887, and June 30, 1888, is shown by the following table. Minor duties, though occupying considerable time of the employes, are omitted for the sake of brevity:

The appropriations and expenditures for the fiscal years ended June 30, 1885, June 30, 1886, June 30, 1887, and June 30, 1888, are shown by the following, omitting cents for convenience:

TABLE 5.

	Appropriations, 1884-'85.	Expenditures, 1884-'85.	Appropriations, 1885-'86.	Expenditures, 1885-'86.	Appropriations, 1886-'87.	Expenditures, 1886-'87.	Appropriations, 1887-'88.	Expenditures, 1887-'88.
Wrapping-paper.....	\$35,000	\$34,997	\$35,000	\$28,916	\$30,000	\$29,971	\$44,000	\$43,997
Twine.....	82,277	79,149	85,000	69,632	80,000	63,413	80,000	71,175
Balances and scales.....	25,000	17,802	20,000	1,302	10,000	1,043	17,000	16,999
Ink, pads, and stamps.....	25,000	10,233	20,000	12,576	30,000	20,938	50,000	29,999
Stationery, Post-Office Department.....	9,000	7,756	12,600	8,590	12,600	7,514	12,000	9,875
Stationery, first and second class offices.....	65,000	46,914	65,000	41,039	55,000	46,456	50,000	49,836
Printing.....	180,000	169,000	178,612	174,055	180,000	162,403	278,000	232,569
Total.....	421,277	365,851	416,212	336,110	397,600	331,738	511,000	454,450

The sum of the appropriations for the fiscal year ended June 30, 1888, amounted to \$511,000, and the expenditures were \$454,454.58—about 89 per cent. of the appropriations. This left at the end of the fiscal year \$56,545.42 unexpended, in addition to which there was on hand stock amounting as per inventory to \$54,703.40.

## WRAPPING-PAPER.

The appropriation of \$30,000 for wrapping and facing-slip paper was practically exhausted in February, and an urgency appropriation of \$14,000 was granted by Congress, making a total appropriation of \$44,000 for the fiscal year. This additional appropriation was necessitated by the increased demand for facing-slip paper by postmasters and the Railway Mail Service and the additional price paid for the paper under contract. By direction of the Postmaster-General, facing-slips are being substituted for wooden tags for the purpose of addressing packages and sacks of mail matter, making an increase in the consumption of this class of paper, but with better results to the service and at a less cost to the Department. It was also found that 4 cents a ream additional had to be paid for the paper over the price paid under contract when estimates were made. From the total appropriation of \$44,000 there has been expended the sum of \$43,997.55 (see Table 5), leaving to the credit of the appropriation \$2.45. There was on hand as per inventory of July 1, 1888, paper amounting to \$6,576.54.

As shown by Table 3, there were furnished to post-offices and the Railway Mail Service 25,460 reams of wrapping and facing-slip paper, as against 21,747 reams for the previous year, an increase of 3,713 reams. Of this amount 13,034 reams were facing-slip paper, which, cut into slips, equaled 311,627,520 facing-slips (see Table 3). The same table shows that only 193,091,700 slips were furnished for the year ended June 30, 1887, which is somewhat misleading in the comparison of the amount of slips furnished for the two years, for this reason: As stated in the report for the year ended June 30, 1887, no account was kept of the number of slips cut by postmasters and the Railway Mail Service from the flat paper furnished them, whereas an accurate account has

been kept this year, amounting to 116,368,120 slips, which, deducted from the 311,627,520 slips shown in Table 3, leaves 195,259,400 slips as the amount furnished direct from the Department. Of the above amount, 108,581,000 have been furnished printed to postmasters of the first and second classes, contract having been made for the printing at 4 cents per thousand. For the year ending June 30, 1889, the contract price for this work is  $3\frac{1}{2}$  cents per thousand, a great reduction in price as compared with the price paid four years ago without contract—the price paid by the Department at that time ranging from 8 to 15 cents per thousand. The largely increasing demand for wrapping and facing-slip paper for the fiscal year ended June 30, 1888, as shown by Table 3, over previous years shows a large and steady increase in the demand for these papers.

It is estimated that an increase of this appropriation to \$50,000 will be required to meet the demands of the service for the fiscal year ending June 30, 1890.

#### TWINE.

There was expended from the appropriation of \$80,000 for wrapping-twine the sum of \$71,175.77 (see Table 5), leaving a balance unexpended of \$8,824.23. There was on hand as per inventory of July 1, 1888, twine amounting to \$10,437.40. The amount of wrapping-twine issued for the fiscal year ended June 30, 1887, was 778,152 pounds (see Table 3), while the amount issued for the present year was 832,404 pounds. By the substitution of a coarse jute twine at a much less price in place of the hemp twine heretofore used, and the issue of a small jute in place of cotton twine, there has been a great saving to the Department in the expense of this item. The change was in the line of economy, and without detriment to the service.

The amount of coarse jute furnished for the fiscal year ended June 30, 1887, was 115,452 pounds (see Table 3), and of cotton twine 102,700 pounds, while for the present fiscal year only 34,617 pounds and 61,732 pounds, respectively, have been issued. This shows a reduction in the issue of coarse jute (called hemp in Table 3) and cotton—the expensive twines—of 121,803 pounds. The complaint made in the last report of the delay in delivery of jute twine by the contractor has been entirely overcome, a sufficient quantity being furnished and at regular stated intervals. Taking into consideration the increased demand for this twine by the natural growth of the service, it is considered prudent to increase the appropriation.

It is estimated that the sum of \$85,000 will be required to meet the demands of the service for wrapping-twine for the fiscal year ending June 30, 1890.

#### LETTER BALANCES AND SCALES.

Table 5 shows that from the appropriation of \$17,000 for letter balances and scales the sum of \$16,999.92 was expended, leaving to the credit of the appropriation \$0.08. Owing to the general inspection of fourth-class post-offices, ordered by the Postmaster-General, and the furnishing of the 903 scales, orders for which were held up the previous year, as no contract had been made for 8 ounce letter balances, the original appropriation of \$10,000 was entirely exhausted, and an urgency appropriation of \$7,000 was granted by Congress March 30, 1883, making the total appropriation for the year \$17,000. There were purchased and issued during the year 7,047 letter balances and scales, and there were remaining on hand as per inventory of July 1, 1888, scales amounting in value to

\$518.41. As shown by Table 3, there were issued 2,180 scales for the fiscal year ended June 30, 1887, while for the year ended June 30, 1888, 7,047 scales were required. This is an excess in issue of 5,867 scales.

A great saving has been made during the year by the issue of 4-pound scales to offices of the fourth class, in place of the 8-ounce letter balance. The custom, heretofore, has been to furnish post-offices of the fourth class, not exchange offices, with an 8-ounce balance with metric system, the scale costing \$2.65. It was found that by the issue of a 4-pound scale, costing \$1.56 and weighing from one-half ounce to 4 pounds, a great saving would be made, and the post-offices be better equipped, as the scale answered equally as well for a letter balance, and could also be used to weigh second-class matter. Under section 469, page 203, Postal Laws and Regulations of 1887, only post-offices whose gross receipts exceeded \$400 per annum were entitled to 4-pound scales. An order was made authorizing the issue of such scales to fourth-class post-offices as seemed advisable to the First Assistant Postmaster-General, and under that order 4-pound scales were issued to fourth-class offices, as stated above, as the inspection will be completed during the coming fiscal year.

It is estimated that the demands of the service will require an appropriation of \$15,000 to carry the Department through the fiscal year ending June 30, 1890.

#### STAMPS, INK, AND PADS.

The appropriation for stamps, ink, and pads for the fiscal year ended June 30, 1888, was \$30,000, and the expenditures were \$29,999.71 (see Table 5), leaving a balance of 29 cents. There were purchased and issued during the year 39,863 stamps, 26,530 pads, and 22,579 pounds of ink (see Table 3). Of these amounts there remained on hand stamps, ink, and pads amounting in value to \$3,510.73, as per inventory of July 1, 1888. This was an increase of issues over the previous year of 22,363 stamps, 16,119 pads, and 9,004 pounds of ink. This large increase in the demand for these articles is accounted for, as in the case of balances and scales, by the inspection of fourth-class post-offices, a very large number of them being found poorly equipped or entirely unsupplied with the proper postmarking stamps, ink, and pads, for the postmarking of letters and canceling of postage-stamps. Owing to the large demand, the appropriation was exhausted during the early part of the fourth quarter of the fiscal year, and requisitions had to be held up until the appropriation for the fiscal year beginning July 1, 1888, became available. As the special inspection of post-offices will be practically finished during the fiscal year ending June 30, 1889, it is estimated that an appropriation of \$35,000 will be required for the fiscal year ending June 30, 1890.

In this connection, I desire to call your attention to the article of canceling ink, used both for postmarking letters and canceling postage-stamps. It has long been known to the Department that unprincipled persons have made a business of collecting canceled postage-stamps, and by the use of chemicals entirely removing the cancellation, thereby rendering the stamps fit to be used again. Numerous devices for the cancellation of postage-stamps without the use of ink have been submitted to the Department, none of which would, upon test, meet the requirements of the service, either by reason of complicated machinery or of liability to destroy the contents of packages in the act of canceling stamps. Owing to the volume of letters passing through the post-offices it became a necessity to devise some instrument that would both post-

mark and cancel stamps at the same time. Such a device is now in use; and the canceling ink furnished by the Department is used for both postmarking and canceling.

In response to advertisements by the Department for samples and prices for canceling ink, numerous samples have been received and submitted to chemists as to the indelibility, and to postmasters as to the practical working of the same on postmarking stamp and canceler. In no case has the chemist found an ink that was indelible that would do satisfactory work for postmarking. As a combined stamp has become a necessity in order to avoid a very large increase in the clerical force of post-offices, the indelibility of the ink used, taken with its qualities for postmarking purposes, becomes of great importance.

I would therefore recommend that a committee be appointed to thoroughly investigate the matter of a combined postmarking and canceling ink that will meet the requirements of the service; and in case they fail to find such an ink, that they report on the feasibility of having the coloring matter in postage-stamps of such a chemical mixture that when it comes in contact with an ink of certain chemical ingredients the color of the stamp will be destroyed.

#### STATIONERY, FIRST AND SECOND CLASS OFFICES.

The appropriation for stationery for offices of the first and second classes for the year ended June 30, 1888, was \$50,000. From this amount there has been expended \$49,836.73 (see Table 5), leaving a balance to the credit of the appropriation of \$163.27. Owing to the appropriation being exhausted, vouchers for the printing of facing slips and card slide labels ordered by postmasters for the second quarter of the current year 1888 had to be disallowed. During the fiscal year 1886-'87 there was expended the sum of \$46,456.19, leaving stock on hand valued at \$22,658.94. During the year 1887-'88 there were purchased and paid for out of this appropriation stock and miscellaneous supplies to the amount of \$49,836.73, and there was on hand July 1, 1888, stock valued at \$29,695.84. Comparing the amounts expended for the two years, 1886-'87 and 1887-'88, amounting to \$46,456.19 and \$49,836.73, respectively, it will be seen that there was expended in the year 1887-'88 \$3,380.54 in excess of the amount expended the previous year, and it would seem that a greater sum was used during the year 1887-'88 than was necessary to perform the same service during the year 1886-'87; but by contrasting the inventories of stock on hand at the close of each year, \$22,658.94 and \$29,695.84, respectively, it will be seen that there was stock on hand in excess of the previous year amounting to \$7,036.90, while only \$3,380.54 had been expended in excess for purchases. This shows a saving to the Department of \$3,656.36.

When it is taken into consideration that during the past fiscal year the nine divisions of the railway mail service, the twelve post-office inspectors in charge (heretofore only partially supplied), and the thirty-five additional second-class offices established not heretofore furnished have been supplied with stationery, together with the natural growth of the service, it will be shown that a better and more extended service has been performed during the last named period, at a reduced cost to the Department. It was also found necessary to have a full stock of stationery on hand July 1, in order to fill promptly the semi-annual requisitions of postmasters of the first and second classes. By a comparison of the number of requisitions filled during the first quarter of each year, it is found that in the first quarter of the fiscal year ended

June 30, 1887, only 17 per cent. were filled, while 90 per cent. were filled during the same period this year. Taking as a basis the increase in the number of offices of the second class for the present year which have to be supplied with stationery in addition to those already furnished, and the natural growth of the service, it is estimated that it will require \$57,500 to meet the exigencies of the service for the fiscal year ending June 30, 1890.

#### STATIONERY, POST-OFFICE DEPARTMENT.

The appropriation and expenditures for stationery and free penalty envelopes for the Department for the year ended June 30, 1888, were \$12,000 and \$9,875.72, respectively (see Table 5), leaving a balance of \$2,124.28 unexpended. During the year 1886-'87 there was expended \$7,514.35, and on hand June 30, 1887, supplies valued at \$3,065.29. For the year 1887-'88, there was paid out of the appropriation \$9,875.72, the stock on hand at the close of the year amounting to \$3,964.48. By comparing the amounts expended for the two years 1886-'87 and 1887-'88, \$7,514.35 and \$9,875.72, and the stock on hand as shown by the inventories at the close of the same periods, \$3,065.29 and \$3,964.48, it will be shown that there was an increase of the expenditures this year over the fiscal year ended June 30, 1887, of \$2,361.37, and also an increase of stock on hand amounting to \$899.19, making an excess of expenditures over the previous year of \$1,462.18 in the amount of stationery and free penalty envelopes furnished to the Department. This slight increase in the amount of supplies furnished is accounted for by the natural growth of the service.

The satisfactory showing made of expenditures from the appropriations for stationery for offices of the first and second classes and for the Post-Office Department is the result of the economical selection of the eighty-three articles issued, the advantageous contracts made for this year, the painstaking manner in which the supplies have been cared for and distributed, and the economical use of articles issued to post-offices and to the different bureaus and divisions of the Post-Office Department.

It is estimated that it will require \$12,600 to meet the demands of the Post Office Department for stationery and free penalty envelopes for the fiscal year ending June 30, 1890.

#### PRINTING AND BINDING.

The regular appropriation for printing and binding for the fiscal year ended June 30, 1888, was \$180,000. On February 13, 1888, the Government Printer notified the Department that its allotment for printing and binding was exhausted, and an urgency appropriation of \$98,000 was granted by Congress March 30, 1888, making a total appropriation of \$278,000 for the fiscal year. The additional appropriation was required to meet the demands for printing and binding caused by the printing of postal account-books for third and fourth class post-offices, printing a new form of quarterly postal accounts, occasioned by the change in the manner of keeping postmasters' accounts in the Sixth Auditor's Office, and to cover the amount held up by the Government Printer out of the appropriation for the year ended June 30, 1887, and transferred to and to be deducted from the appropriation for this year, amounting altogether to the sum of \$47,377.92; and also to meet the demand caused by the general increase in the business of post-offices throughout the country, and to cover the Post-Office Department's

proportion of the current expenses of the Government Printing-Office for the fiscal year ended June 30, 1888.

From the total appropriation of \$273,000 there have been furnished by the Government Printer 69,971,183 blanks, books, etc. (see Table 3), at a cost of \$232,569.98 (see Table 5), or 83.65 per cent. of the appropriation, leaving apparently an unexpended balance of \$45,430.02. Requisitions amounting to \$22,580.56, in addition to the amount shown above as furnished, were made upon the Government Printer before the expiration of the fiscal year, but were held up by that officer and carried to the appropriation for the fiscal year ending June 30, 1889. The amount retained for current expenses is 16.35 per cent. of the total appropriation. There was an actual increase of 6,165,240 blanks, books, etc., furnished for the year ended June 30, 1888; and if the number were added for which requisitions were made and held up by the Government Printer, a large increase would be shown.

Great inconvenience is caused by the lack of facilities for printing blanks and forms which are required by the Department for immediate use. The Government Printer requires sixty days in which to fill all requisitions for blanks. It is almost of daily occurrence that either the Department or postmasters of the first or second classes require, at once, small blanks to meet the demands of the service arising from orders issued by the Postmaster-General, which can not be received from the Government Printer under sixty days, unless made special; and when made special, which is a serious inconvenience to him, the regular delivery of blanks is delayed, often to the great detriment of the service. For the past fiscal year 5,048 requisitions were made on the Government Printer, covering 69,971,183 blanks, books, etc. Of this amount there were 69,791,470 blanks; fully one-quarter of these were small blanks, a large proportion of which could have been printed in the Department had it been supplied with the necessary facilities, as other departments of the Government are supplied, thus saving largely in the time taken to fill requisitions, and at the same time being prepared to fill promptly orders of an urgent nature. When requisitions are filled in their regular order, as much time is required for a small quantity, say 500, of a blank needed for immediate use and which could not have been anticipated, as is required to furnish 1,000,000 blanks kept in stock, orders for which can be anticipated. I would therefore recommend that a branch of the Government Printing-Office be established in this division, or that an appropriation of \$10,000 be asked for to properly equip the stationery section of this division with presses and material for doing this class of work.

It is estimated that an appropriation of \$284,000 will be required to meet the demands of the service for the fiscal year ending June 30, 1890, in view of the increased demands likely to be made upon the appropriation for printing and binding from the natural growth of the service, and from the fact that the Government Printer requires about 17 per cent. of the appropriation for his current expenses.

*Estimate of appropriations for fiscal year ending June 30, 1890.*

Wrapping and facing-slip paper .....	\$50,000
Wrapping twine .....	85,000
Letter balances and scales .....	15,000
Postmarking, rating, and canceling stamps, ink, and pads .....	35,000
Stationery, first and second class post-offices .....	57,500
Stationery and free penalty envelopes, Post-Office Department .....	12,600
Printing and binding .....	284,000
Total .....	539,100

The present clerical force of this division consists of 21 clerks, messengers, and laborers. During the year a new and complete system has been adopted in the manner in which accounts are kept with postmasters, covering the articles issued to them out of the several appropriations for which the superintendent is held responsible, by which it is possible to tell at once the quantity and value of articles furnished to each of the 58,000 post-offices, thereby preventing duplicate orders being filed, and excessive demands being made from carelessness or otherwise, and enabling a better knowledge of the wants and requirements of the different post-offices. Receipts are required from postmasters for supplies furnished (excepting blanks); and, in the case of stationery issued to post-offices of the first and second classes, itemized receipts are furnished, thereby enabling postmasters to know at all times how their accounts stand at the Department for these articles, and preventing any claim from being afterwards made that they did not receive certain articles, as was frequently done before the adoption of this system. To handle an account for the articles representing this amount, a large increase over the last fiscal year, and consisting of thousands of tons and millions of articles, in a prompt and accurate manner, requires an amount of manual labor and clerical work that the present force will be inadequate to perform for the year ending June 30, 1890.

The lack of sufficient storage room adds greatly to the amount of clerical work and manual labor required to meet the demands made upon this division for supplies. In my report for the fiscal year ended June 30, 1887, and again under date of June 6, 1888, the matter of storage room was urgently brought to your attention. The rapidly increasing business of the postal service makes extra demands for supplies, and what a year ago seemed an urgent necessity becomes now an imperative duty. The present space is entirely inadequate to keep in hand a sufficient stock of the articles required by the postal service. Owing to this lack of room the Department is required to make orders for small quantities of the various articles contracted for, thus adding largely to the clerical work, and in case of contractors furnishing inferior supplies, owing to the limited amount of these articles enabled to be kept on hand, the inspection committee is obliged to accept the same, at a reduction, instead of rejecting them, as should be done in all cases when the supplies do not come up to the contract requirements. This course is detrimental to the service and costly to the Department. Often when contractors are delayed in their delivery of supplies, owing to the breaking of machinery or negligence in filling orders, or when railroads fail to deliver promptly, from accident or otherwise, the Department is unable to furnish postmasters with the necessary supplies to properly conduct their business and the postal service of the country is embarrassed. For nearly four years no additional storage room has been furnished, while during that time and up to June 30, 1888, 12,510 new post-offices have been established, which, taken together with the natural growth in the business of the service, have completely overrun the storage capacity of the division. Every available space is now occupied to its fullest extent, even to the corridors, and heavy articles like twine and wrapping paper have to be piled to such a height that the lives of visitors to the Department and of employes are often endangered. Forced to adopt this course, additional help is required to perform the manual labor. Action should at once be taken to procure storage room sufficient to carry at least a three months' supply of the various articles furnished.

Taking as a basis the increased demands made upon the division for

the past fiscal year (see Table 3) over those made for the fiscal year ended June 30, 1887, there will be required to properly conduct the business an additional force of four clerks and two laborers.

The division of post-office supplies differs materially from the other divisions of the Department. It furnishes the Post-Office Department, the Railway Mail Service, the twelve inspectors in charge, and the 58,000 post-offices throughout the country with the supplies which are necessary to properly conduct the business of the postal service. It represents in every respect a mercantile concern doing an annual business equal in amount to the sum expended from the several appropriations granted by Congress for this purpose, aggregating for the past fiscal year \$454,454.58. Contracts have to be made yearly for the vast number of articles required to meet the demands of the service; these articles have to be ordered as required, received and inspected, and if accepted the various appropriations under which they are purchased are charged with the money valuation of the order and the contractor credited with the same, and when papers are forwarded for payment, the contractor's account has to be charged, and the business is carried on in every respect as would be required in a mercantile concern of this magnitude. It necessitates keeping in stock at all times sufficient supplies to meet the demands made by the various branches of the service that are supplied from this source. Although nominally attached to the office of the First Assistant Postmaster-General, from the very nature of the business it practically acts independently. In addition to conducting the business coming under the appropriations made to the office of the First Assistant Postmaster-General, it conducts the business covered by the appropriations made to the Postmaster-General for stationery for the Post-Office Department and for printing and binding, thus virtually being under the direction of two offices.

When the Postmaster-General was authorized to establish a blank agency for the Department, June 8, 1872 (see Statutes, volume 17, page 289, section 30), appropriations were made to the amount of \$132,500 (see Statutes, volume 17, pages 89 and 200) for the purchase of supplies. Since that date, by the addition of supplies required to be furnished by this division and by the natural growth of the service, the appropriations have rapidly increased, until for the past fiscal year the total amount of the appropriations for which the superintendent of the division was held accountable was \$511,000, an increase of 285.66 per cent.

As an illustration showing the increase in the volume of business done by this division, reference is made to Table 1, which shows that the average yearly increase in requisitions made for wrapping-paper and twine for the fiscal years ended June 30, 1887, and June 30, 1888, was 24 per cent., and for blanks and books for the same time the increase averaged 32 per cent., while for the six items covered by that table the average increase per year was 40 per cent.

Table 2 will show that for the same period there was a yearly increase of 18 per cent. in the number of packages sent out from this division, and for the four items covered by that table an average increase of 23 per cent. per year. A much larger showing is made for the various contract articles furnished (see Table 3). For blanks furnished the yearly increase was  $7\frac{1}{2}$  per cent., for marking, rating, and canceling stamps 85 per cent., and for wrapping paper 11 per cent., while the yearly increase of the eleven principal articles was 44 per cent. An equally large increase in the entries of record was made (see Table 4), amounting to 63 per cent. yearly. This clearly indicates the rapid growth of the service and the increased demands made upon this division. In view of the above

facts, and of the increase of business that may naturally be expected from year to year, every endeavor should be made to facilitate the business of this division; and as it is now virtually conducted as an independent division (from force of business considerations), it should be detached from the office of the First Assistant Postmaster-General.

I therefore recommend that it be made an independent division, under the control of a superintendent with a salary of \$3,000 per annum.

#### SALARY AND ALLOWANCE DIVISION.

As many of the accounts for the quarter ended June 30, 1888, are not closed at present, a complete statement of the transactions of this division for the fiscal year can not be furnished at this time. This data will be submitted with the estimates for the appropriations for the next fiscal year.

In order to understand clearly the operations of the division, the duties assigned to it may be briefly stated as follows:

#### DUTIES ASSIGNED TO THE SALARY AND ALLOWANCE DIVISION.

The most important duties are the adjustment of the salaries of Presidential postmasters, or postmasters of the first, second, and third classes; consideration of applications for allowances for clerk-hire, rent, fuel, light, furniture, miscellaneous and incidental expenditures; examination of the quarterly returns or accounts of postmasters at offices of the first and second classes before they are finally passed by the Auditor of the Treasury for the Post-Office Department; the regulation of the salaries and duties of the employés necessary for the proper transaction of the postal business in the larger post-offices; the supervision and regulation of the box-rent rates, and the deposits for keys for lock-boxes, and the management of the large and constantly increasing correspondence relative to the subject-matter stated.

In addition to the important duties as above outlined, the work of reviewing and re-adjusting the salaries of postmasters and ex-postmasters of the third, fourth, and fifth classes, under the act of Congress approved March 3, 1883, was assigned to the salary and allowance division, by verbal order of Postmaster-General Gresham, April 7, 1884. This large and important work, involving an examination and review of the records, accounts, and salaries of the postmasters of the third, fourth, and fifth classes, from 1864 to 1874, has been carried on under the supervision of the chief, as rapidly as possible consistent with accuracy and the limited clerical force at command. This work is now practically completed, as the act of Congress approved August 4, 1886, limited the presentation of original applications to January 1, 1887, and all applications made prior to the date stated have been reviewed, and all amounts found due, under the law, included in the third schedule of claims, have been transmitted to the Auditor. Detailed information relative to this work will be hereinafter stated.

The act of Congress approved March 3, 1883, which requires an annual adjustment of the salaries of Presidential postmasters to take effect at the beginning of each fiscal year (July 1), instead of a biennial adjustment, as heretofore authorized, has largely increased the duties of the salary and allowance division. The *fifth annual* adjustment of the salaries of Presidential postmasters was made upon the basis of the gross receipts accruing at the respective offices for the four quarters ended March 31, 1888.

Additional duties have also been imposed upon the division by the act of Congress approved June 29, 1886, which took effect July 1, 1886, providing that clerks doing money order business at offices of the first

and second classes shall be compensated from the allowance for clerk-hire as made by this office; and that the commissions accruing on money-order business from the date stated shall be returned as a part of the revenue of the Department.

The work of the salary and allowance division has also been further increased by the act of Congress approved July 24, 1888, which provides for allowances for rent, fuel, and light for third-class post-offices, or offices whereat the salaries of postmasters are fixed from \$1,000 to \$1,900 per annum. By the adjustment made in accordance with the requirements of the act of March 3, 1883, the third-class offices, July 1, 1888, numbered 1,908. These will be increased, quarterly, at the average rate of 45 offices.

The various operations of the salary and allowance division during the past year are submitted in tabulated form as follows:

*Tabulated statement of the operations of the salary and allowance divisions for the fiscal year ended June 30, 1888.*

Items.	Fiscal year, 1887-'88.	
	Total number.	Aggregate allowance.
Number of letters received .....	31,456	.....
Number of letters written .....	37,441	.....
Number of circular-letters sent out .....	28,019	.....
Number of allowances for clerk-hire made .....	5,477	.....
Total amount allowed for clerks in post-offices .....		\$5,603, 110.42
Number of allowances for clerk-hire declined .....	2,148	.....
Number of allowances for rent, fuel, and light made .....	2,142	.....
Total amount allowed for rent, fuel, and light .....		532,900.87
Number of allowances for rent, fuel, and light declined .....	787	.....
Number of allowances for miscellaneous items made .....	8,125	.....
Total amount allowed for miscellaneous items .....		58,551.71
Number of allowances for miscellaneous items declined .....	2,788	.....
Number of allowances for furniture made .....	748	.....
Total amount allowed for furniture .....		21,301.86
Number of allowances for furniture declined .....	919	.....
Number of allowances for stationery declined .....		.....
Number of allowances for advertising made .....	226	.....
Total amount for advertising allowed .....		10,733.90
Number of allowances for advertising declined .....	342	.....
Number of cases sent to chief post-office inspector for information .....	459	.....
Number of fourth-class offices reported by the auditor, where the annual compensation of the postmaster amounts to \$1,000, exclusive of money-order commissions .....	210	.....
Number of fourth-class offices assigned to the Presidential class .....	197	.....
Aggregate amount required to pay the salaries of postmasters at the above Presidential offices (197) for one year .....		212,900.00
Number of special adjustments of postmasters' salaries .....	201	.....
Aggregate sum required to pay the above increased salaries for one year .....		213,400.00
Number of postmasters' salaries reduced and discontinued .....	3	.....
Aggregate amount saved by salaries reduced and discontinued as above .....		4,200.00
Total number of salaries of postmasters adjusted during the year .....	2,746	.....
Aggregate amount of salaries involved in the (2,746) adjustments as above .....		4,420,400.00
Number of first-class post-offices (salary of postmaster, \$3,000 to \$6,000 a year) .....	97	.....
Number of second-class post-offices (salary of postmaster, \$2,000 to \$2,900 a year) .....	497	.....
Number of third-class post-offices (salary of postmaster, \$1,000 to \$1,900 a year) .....	1,908	.....
Total number of Presidential post-offices June 30, 1888 .....	2,502	.....
Total amount required for salaries, Presidential postmasters, as above (2,502), for one year .....		4,202,800.00
Allowances for clerk-hire reduced and discontinued .....	552	.....
Amount saved by clerk-hire reduced and discontinued .....		71,958.00
Allowances for rent, fuel, and light reduced and discontinued .....	107	.....
Amount saved by rent, fuel, and light reduced and discontinued .....		16,121.00
Number of applications for re-adjustment of postmasters' salaries under act of March 3, 1883, received and placed on file .....	68,725	.....
Number of applications under act of March 3, 1883, received to date .....	68,725	.....
Number found below the 10 per cent. requirement of law .....	42,487	.....
Total number allowed to date .....	26,238	.....
Aggregate amount allowed for back pay of postmasters to date .....		1,221,009.69
Number of employes (average) .....	6.0	.....
Number of employes, review of postmasters' salaries (average) .....	9.5	.....

The number of letters received during the fiscal year ended June 30, 1888, amounted to 31,456, an increase of 1,622, or 5.4 per cent., as compared with 1887. The number of letters written amounted to 37,441, an increase of 1,873, or 5.3 per cent., as compared with the number written in 1887. Twenty-eight thousand and nineteen circular-letters were sent out, being an increase of 2,705, or 10.7 per cent., as compared with 1887.

Five thousand four hundred and seventy-seven allowances for clerk-hire were made, an increase of 740, or 15.7 per cent., as compared with 1887. The number of applications for clerk-hire declined was 2,148, a decrease of 307, or 12.5 per cent., as compared with the year 1887. These applications were declined chiefly on account of the inadequate appropriation for clerks in post-offices. A special appropriation of \$100,000, as requested by the Postmaster-General, was approved by the Congress under date of March 30, 1888.

Two thousand one hundred and forty-two allowances for rent, fuel, and light were made, being an increase of 783 allowances, or 57.6 per cent. as compared with 1887. This increase was occasioned by the inadequate appropriation for rent, fuel, and light for post-offices, which required a careful revision of all the allowances for the items stated. The said allowances were reduced as far as practicable from January 1, 1888, in order to keep the expenses within the limited appropriation as fixed by the Congress. At the request of the Postmaster-General, an additional appropriation of \$25,000 was made by the Congress under date of March 30, 1888, to be immediately available. With this additional appropriation, the allowances for rent, fuel, and light were again adjusted to meet the needs of the service. Seven hundred and eighty-seven applications for allowances for rent, fuel, and light were declined, being an increase of 104, or 15.2 per cent., as compared with the year 1887. This increase was occasioned, chiefly, by requests for rent, fuel, and light from postmasters at offices of the third class, who thought that authority to make allowances for the items stated at third-class offices had been granted by the Congress.

Eight thousand one hundred and twenty-five allowances for miscellaneous items were made, an increase of 1,399, or 20.8 per cent. as compared with 1887. Two thousand seven hundred and eighty-eight applications for allowances for miscellaneous items were declined, being a decrease of 343, or 11 per cent. as compared with 1887.

Seven hundred and forty-eight allowances for furniture for post-offices were made; and 919 applications for furniture was declined.

Two hundred and twenty-six allowances for advertising were made, the aggregate amount allowed being \$10,733.90; and 342 applications for advertising were declined. This increase was occasioned by the circular notice to postmasters calling attention to the requirements of section 590 P. L. & R., edition of 1887, from the Superintendent of the Dead-Letter Office, under date of December 1, 1887.

Two hundred and ten post-offices of the fourth class were reported by the Auditor where the annual compensation of the postmaster amounted to \$1,000 for four quarters, exclusive of money-order commissions. Of this number 197 offices were assigned to the third class; the aggregate of the salaries of the postmasters thereat making a total of \$212,900, an increase of 79 offices, and \$88,700 for compensation of postmasters, as compared with 1887.

The special adjustments of postmasters' salaries numbered 201, involving the aggregate amount of \$213,400 for salaries of postmasters. There were three salaries of postmasters reduced or discontinued,

making a saving of \$4,200. The total number of salaries of Presidential postmasters adjusted during the year amounted to 2,746, and the aggregate amount involved for salaries in all the adjustments amounted to \$4,420,400. Allowances for clerk-hire reduced or discontinued during the year numbered 552, making a saving of \$71,958. One hundred and seven allowances for rent, fuel, and light were reduced or discontinued during the year, making a saving of \$16,131.

The work of reviewing and re-adjusting the salaries of postmasters, and ex-postmasters of the third, fourth, and fifth classes, under the act of March 3, 1883, which was assigned, verbally, to the Salary and Allowance Division by Postmaster-General Gresham April 7, 1884, has been practically completed. All applications received prior to January 1, 1887, the date fixed as the limitation of presentation of claims by the act of Congress approved August 4, 1886, have been reviewed and acted upon. The total number of cases reviewed amounted to 68,725. Of this number 26,238 were allowed, involving the aggregate additional amount for compensation or back pay of postmasters of \$1,221,009.69; 42,487 applications were reviewed and found to be below the 10 per cent. requirement of law, or for periods outside the dates defined by the act.

A tabulated statement is herewith respectfully submitted showing the operations of the Salary and Allowance Division for the fiscal years 1880, 1881, 1882, 1883, 1884, 1885, 1886, 1887, and 1888, with the increase of work since 1880:

*Table showing volume of business transacted in the salary and allowance division, office of the First Assistant Postmaster-General, for the fiscal years ended June 30, 1880, 1881, 1882, 1883, 1884, 1885, 1886, 1887, and 1888, and increase of work since 1880.*

<sup>5</sup> 9+ employés on review of postmasters' salaries (1888).

#### ADJUSTMENT OF PRESIDENTIAL POSTMASTERS' SALARIES.

The act of Congress approved March 3, 1883, provides for an annual instead of biennial adjustment of the salaries of Presidential postmasters, or postmasters at offices of the first, second, and third classes. In compliance with the requirements of this act, the fifth annual adjustment of the salaries of Presidential postmasters was made upon the basis of the gross receipts which accrued at the respective offices for the four quarters ended March 31, 1888, to take effect July 1, 1888. It should be observed that this adjustment was made, as usual, upon the gross receipts for one year, or four quarters, at the new or reduced rate of postage. The salaries of postmasters of 2,530 post-offices were reviewed. As required by law, 97 post-offices were assigned to the first class, 497 to the second class, and 1,908 to the third class. This was a net increase of 15 first-class post-offices, 61 second-class offices, and a net decrease of 63 third-class offices. Forty-two new offices (third class) were added to the Presidential list from July 1, 1888, and 28 offices (third class) were relegated to the fourth class from the same date, making the total number of Presidential offices July 1, 1888, 2,502, an increase of 166, or 7.1 per cent. as compared with the number of offices July 1, 1887.

The classification of Presidential post offices in accordance with the requirements of the act of Congress approved March 3, 1883, in effect July 1, 1888, may be concisely stated as follows:

<b>First class:</b>			
Total number June 30, 1888.....			82
Number relegated to second class, July 1, 1888.....	1		
Number of second advanced to first, July 1, 1888.....	16		
Net increase, first class, July 1, 1888.....		15	15
Total number, first class, July 1, 1888.....			97
<b>Second class:</b>			
Total number June 30, 1888.....			436
Number of second advanced to first, July 1, 1888.....	16		
Number of second relegated to third, July 1, 1888.....	3		
Number of first relegated to second, July 1, 1888.....	1		
Number of third advanced to second, July 1, 1888.....	79		
Net increase, second class, July 1, 1888.....		61	61
Total number, second class, July 1, 1888.....			497
<b>Third class:</b>			
Total number June 30, 1888.....			1,970
Number of third advanced to second, July 1, 1888.....	79		
Number of third relegated to fourth, July 1, 1888.....	28		
Number of second relegated to third, July 1, 1888.....	3		
Number of fourth advanced to third, July 1, 1888.....	42		
Net decrease, third class, July 1, 1888.....		62	62
Total number, third class, July 1, 1888.....			1,908
Grand total Presidential post-offices (first, second, and third classes), July 1, 1888.....			2,502

The number of offices, aggregate of salaries of postmasters, and aggregate gross receipts arranged by classes, July 1, 1888, is stated as follows:

Class.	Offices.	Aggregate of salaries.	Aggregate gross receipts.
First class.....	97	\$241,200	\$23,816,337
Second class.....	497	1,160,100	7,480,076
Third class.....	1,908	2,701,500	7,202,575
Totals.....	2,502	4,202,800	38,498,988

The aggregate amount required to pay the salaries of Presidential postmasters was \$4,202,800, an increase of \$322,500, or 8.3 per cent., as compared with the same item July 1, 1887. The aggregate of the salaries of postmasters will absorb 10.92 per cent. of the revenue of the Presidential offices, being 0.11 per cent. less than the percentage shown by the adjustment of 1887. The average amount allowed for salary of a Presidential postmaster by the adjustment of 1888, is \$1,680. The grand total of gross receipts which accrued at the Presidential offices for the four quarters ended March 31, 1888, amounted to \$38,498,987.80, being an increase of \$3,322,826.13, or 9.4 per cent., as compared with the receipts as shown by the adjustment which took effect July 1, 1887. The grand total of the gross receipts which accrued at these offices for the four quarters ended March 31, 1888, is 74.09 per cent. of the revenue of the Department for the same period.

The several adjustments of the salaries of Presidential postmasters made in accordance with the requirements of the act of March 3, 1883,

to take effect October 1, 1883, July 1, 1884, July 1, 1885, July 1, 1886, July 1, 1887, and July 1, 1888, are herewith stated, viz :

Date.	Number of Presidential offices.	Aggregate salaries of Presidential postmasters.	Average salary of Presidential postmasters.	Aggregate receipts which accrued at Presidential offices.	Per cent. of aggregate receipts absorbed for postmasters' salaries.	Per cent. of entire revenue of Department which accrued at Presidential offices.
October 1, 1883.....	2, 195	\$3, 707, 500	\$1, 689	\$33, 535, 253. 95	11. 06	74. 28
July 1, 1884 .....	2, 323	3, 828, 700	1, 648	33, 031, 697. 33	11. 59	74. 80
July 1, 1885 .....	2, 233	3, 630, 600	1, 625	31, 792, 220. 55	11. 42	75. 36
July 1, 1886 .....	2, 244	3, 685, 500	1, 642	32, 491, 551. 58	11. 34	74. 07
July 1, 1887 .....	2, 336	3, 880, 300	1, 661	35, 176, 161. 67	11. 03	74. 84
July 1, 1888 .....	2, 502	4, 202, 800	1, 680	38, 493, 987. 86	10. 92	94. 09

A summary of the adjustments of salaries of Presidential postmasters July 1, 1887, and July 1, 1888, showing in detail the net increase of salaries, is submitted as follows :

The grand total of gross receipts of Presidential offices for the four quarters ended March 31, 1888 amounts to 74.09 per cent. of the revenue of the Post-Office Department for the same period.

REVIEW OF SALARIES OF POSTMASTERS OF THE THIRD, FOURTH, AND FIFTH CLASSES,  
UNDER THE ACT OF MARCH 3, 1883.

The review of the salaries of postmasters and ex-postmasters of the third, fourth, and fifth classes, under the act of March 3, 1883, as construed by the Attorney-General of the United States, under date of February 13, 1884, and re-affirmed June 14, 1884, has been, since the report of last year (see pages 364 to 366, Report of the Postmaster-General for the fiscal year ended June 30, 1887), continued, and practically completed. Since the report mentioned was made, the second schedules of claims for the States of Ohio, Pennsylvania, Tennessee, Texas, Virginia, West Virginia, and Wisconsin, and the third schedules for all the States and Territories from Alabama to Wyoming, inclusive, have been completed and certified to the Auditor of the Treasury for the Post-Office Department. The total number of claims reviewed was 68,725. Of this number 26,238 claims have been allowed, and 42,487 claims were found below the 10 per cent. requirement of the law, or for periods outside the dates defined by the act. The total amount allowed as additional compensation, including the amount required by the series of third schedules, is \$1,221,009.69. This sum exceeds the aggregate of the amounts appropriated by the Congress, to date, by \$76,697.71, the several amounts appropriated by the Congress for the payment of these claims being as follows:

Under act approved July 7, 1884 .....	\$45,213.80
Under act approved March 3, 1885 .....	178,281.23
Under act approved August 4, 1886 .....	380,209.46
Under act approved February 1, 1888 .....	160,286.05
Under act approved March 30, 1888 .....	380,321.44
Total .....	<u>1,144,311.98</u>
Total amount allowed to date .....	<u>1,221,009.69</u>
Unappropriated for to date .....	<u>76,697.71</u>

A summary of the work of reviewing the salaries of postmasters and ex-postmasters of the third, fourth, and fifth classes, as required by the act of Congress approved March 3, 1883, is stated in the annual reports of the Postmaster-General for the fiscal years ended June 30, 1885, pages 217, 218, and 219; June 30, 1886, pages 155, 156, and 157, and June 30, 1887, pages 364, 365, and 366.

A tabulated statement showing the progress of the work of reviewing the said salaries from April 7, 1884, the date the said work was assigned to the salary and allowance division, to date, is herewith respectfully submitted, viz:

Statement showing progress of the work of reviewing the adjustment of the salaries of postmasters at offices of the third, fourth, and fifth classes, in compliance with the requirements of the act of March 3, 1883.

Date of schedule.	States and Territories.	No. of schedule.	Total number of cases reviewed.	No. of cases allowed.	Aggregate amount heretofore allowed postmasters.	Aggregate amount allowed under act of March 3, 1883.

## BOXES AND BOX-RENTS.

Boxes are classed as call-boxes, lock-boxes. and lock-drawers. They are provided by the following methods:

- (1) In Government buildings.
- (2) At first and second class post-offices, the lessor by agreement in the lease often provides them.
- (3) Under existing law (R. S., Sec. 4052, and Sec. 490, P. L. and R., edition of 1887) individuals may provide lock-boxes or lock-drawers for their own use, under conditions stated.
- (4) In all other cases boxes must be furnished and kept in repair by the postmaster.

Boxes are provided as an accommodation to the patrons of the office, as a convenience to the postmaster, and as a source of revenue. At Presidential post-offices, or offices of the first, second, and third classes, box-rents are included in the gross receipts accruing at the offices in making the annual adjustment of salaries of Presidential postmasters, and the said postmasters, therefore, indirectly receive a part of the box-rents in the sum allowed as compensation. At fourth-class offices the box-rents, under existing law, are, practically, allowed as a part of the compensation of the postmaster.

Box-rent rates are supervised by the Department, securing thereby a greater uniformity of prices, better accommodation to the box-renters, and an increase of revenue from box-rents. This supervision of box-rent rates has improved this branch of the postal service during the past year. The revenue from box-rents would be increased if the deposit of 50 cents for each key delivered to box-renters were reduced to 25 cents for each key, as recommended last year, and as now charged for key-deposits at post-offices located in Government buildings under the control of the Treasury Department.

## KEY-DEPOSITS.

The regulations relative to key-deposits should be modified to conform to the recent instructions relative to key-deposits at post-offices located in public buildings under the control of the Treasury Department, fixing the deposit for each key delivered to a box-renter at 25 cents, instead of 50 cents, as heretofore required. As stated last year, I am of opinion that the reduction of the key-deposit rate from 50 cents to 25 cents will enable postmasters to rent more boxes, and thereby increase the revenue from box-rents. The modified regulations of the Treasury Department require a deposit of 25 cents for each key at the present time, while at offices in buildings leased by this Department, with box outfits covered by the lease, postmasters are required to collect a deposit of 50 cents for each key. At offices where postmasters provide their own boxes, under present regulations they are permitted to exercise their discretion in collecting a deposit for keys, and where so collected the rate is 50 cents for each key. A reduction of the amount of deposit for keys from 50 cents to the uniform rate of 25 cents for each key will improve this branch of the service, and enable postmasters to rent boxes to many would-be patrons who have heretofore refused to rent boxes where required to make a deposit of 50 cents for each key.

The key-deposit is exacted as security against the loss of keys. The fund so collected is held by the postmaster as a trust fund. When a key is lost by the renter of the box, or while he is responsible therefor, or through his fault it is broken so as to be rendered useless, or

is withheld over thirty days after the box to which it belongs has been vacated, the key-deposit therefor becomes forfeited and is transferred to the fund called "key-deposit forfeiture fund." This forfeiture fund is expended: (1) For the purchase of new keys to replace those lost, broken, or withheld. (2) For necessary repairs to locks. (3) For keeping the lock-boxes in serviceable condition.

Box-renters who provide their own boxes are not required to make deposits for keys furnished by themselves.

ALLOWANCES FOR RENT, FUEL, AND LIGHT FOR THIRD-CLASS OFFICES.

The recommendation heretofore made by this office that allowances for rent, fuel, and light be made at post-offices of the third class (see reports of the Postmaster-General for 1883, page 105; 1884, pages 20 and 79; 1885, pages 56 and 225; 1886, pages 48, 49, 50, 51, 158, and 159; and 1887, pages 18, 19, 132 to 151, inclusive, and 367) has been favorably considered by the Congress, act approved July 24, 1888. The text of the act is as follows:

For rent, light, and fuel to post-offices of the third class, \$450,000: *Provided*, That there shall not be allowed for the use of any third-class post-office for rent a sum in excess of \$300, nor more than \$60 for fuel and lights in any one year. The Postmaster-General may hereafter allow rent, light, and fuel at offices of the third class in the same manner as he is now authorized to do in the case of offices of the first and second class: *Provided*, That no contract for rent for a third-class post-office shall be made for a longer period than one year, nor shall the aggregate allowance for rent made in any year exceed the amount appropriated for such purpose.

The appropriation as made by the Congress is \$200,000 less than the estimates for rent, fuel, and light as made by the Department. The limitation of allowances for rent at the maximum rate of \$300 a year, and fuel and light at the maximum rate of \$60 a year, is not in the interest of good service. The Postmaster-General should have discretionary authority to fix allowances for rent, fuel, and light for third-class post-offices in the same manner as he is now authorized by law to do in case of offices of the first and second classes, fixing allowances in accordance with the requirements of the service and the local conditions and surroundings of the respective offices. I therefore recommend that the limitation of allowances, as fixed by the act approved July 24, 1888, be repealed, and that the Postmaster-General be given full discretionary authority to make allowances for rent, fuel, and light for third-class post-offices.

By the adjustment of the salaries of Presidential postmasters, in accordance with the requirements of the act of March 3, 1883, to take effect July 1, 1888, 1,908 offices were assigned to the third class. I submit herewith a tabulated statement of these offices, arranged to exhibit the offices and grades (salary \$1,000 to \$1,900, inclusive) in the several States and Territories, in effect July 1, 1888, viz:

Statement showing the number of third-class post-offices in each State and Territory, arranged to exhibit the number of each grade (salary \$1,000 to \$1,900, inclusive) to July 1, 1888.

## LEGISLATION RECOMMENDED.

*Allowances for rent for third-class offices.*—As hereinbefore stated, I recommend that the limitations of the act of Congress approved July 24, 1888, fixing the maximum annual rental at \$300, and the maximum amount for fuel and light at \$60, be repealed, and the Postmaster-General be given full discretionary authority to fix the allowances for rent, fuel, and light for third-class post-offices in accordance with the best interests of the postal service, having in view the local conditions and surroundings of the respective offices.

*Classification and salaries of clerks in the larger offices.*—I recommend that the clerks attached to the first-class offices be classified, and that the salaries of the clerks be fixed by law. This important subject has been considered by a commission appointed by the Postmaster-General, and the result is embodied in a report printed in the Report of the Post-

master-General for the fiscal year ended June 30, 1887, pages 177 to 182, inclusive. I am of opinion that the clerks in the larger offices should be classified with compensation ranging from a minimum salary of \$600 a year to a maximum salary of not exceeding \$1,400 a year. This classification, with salaries as stated in even hundreds of dollars, should not include assistant postmasters, cashiers, superintendents of divisions, or other employés directly responsible to the postmasters; nor to stampers, messengers, porters, carpenters, watchmen, or laborers. The reasons for the exceptions as above stated are shown in the report of the commission, which very properly and wisely recommends compensation for clerks in accordance with their duties, responsibilities, experience, and the time required for a proper performance of their work.

On the first of January, 1888, at the 82 first-class offices there were employed a total of 4,601 clerks. By the adjustment of salaries of Presidential postmasters, made in accordance with the requirements of the act of March 3, 1883, which took effect July 1, 1888, 97 offices were assigned to the first class, making a net increase of 15 first-class offices. These additional first-class offices, with the additional clerks required for the increased service, will make a total of 5,000 clerks, in round numbers, about January 1 next.

I am of the opinion that it is in the interest of good service to classify and fix by law the compensation of the clerks attached to the first-class offices. The letter-carriers are not only classified by law, with fixed salaries, but under recent legislation their hours of duty are limited to eight hours per day. The clerks in the larger offices, who work early and late, with practically no limitation to their hours of labor, deserve consideration, and I strongly urge that some action for their relief and the improvement of the clerical service at first-class offices be taken by the Congress.

*Compensation to postmasters of the fourth class.*—Attention is earnestly invited to the need of legislation relative to the compensation of fourth-class postmasters. The rates of compensation as provided by the act of Congress approved March 3, 1883, are not sufficient to enable the Department to secure good service at fourth-class offices. This matter has been called to the attention of the Congress, but no measure has been provided to meet the requirements of the service.

It is respectfully suggested that the subject-matter of compensation of fourth-class postmasters be considered with a view of formulating a measure that would provide a reasonable increase of compensation to be fixed in even tens and hundreds of dollars for a specified period on the basis of the business of the respective offices for the preceding year. I am of opinion that a bill framed to include the suggestions herein made, with such additional provisions as may be deemed advisable by the Congress, will be in the interest of good service.

#### THE FREE-DELIVERY SYSTEM.

The fiscal year closed with 358 free-delivery offices, an increase of 169 over the number in operation June 30, 1887. The new offices established were:

The number of carriers had increased from 5,310 to 6,346.

The unusually large increase in the number of new offices established was caused by the Act of Congress, approved January 3, 1887, which provides that the system may be extended to places containing a population of 10,000 within their corporate limits, according to the last general census taken by authority of State or United States law, or at any post-office which produced a gross revenue for the preceding fiscal year of not less than \$10,000.

The appropriation for the service was \$5,522,500. The total cost thereof was \$5,422,356.36, leaving an unexpended balance of \$100,143.64.

The following table gives the aggregate results of the operations of the free-delivery system for the fiscal year, and the comparison of the results with the preceding year:

*Aggregate results of the free-delivery service for the fiscal year ended June 30, 1888.*

Statistics of free delivery.	1887.	1888.	Increase.	Per cent.
Number of offices.....	189	358	169	84.12
Number of carriers.....	5,310	6,346	1,036	19.51
Registered letters delivered.....	3,706,346	4,271,105	564,759	15.23
Letters delivered.....	783,393,058	873,760,692	90,367,634	11.53
Postal-cards delivered.....	215,924,009	212,426,703	*3,507,306	*1.60
Newspapers, etc., delivered.....	342,361,621	428,710,933	86,349,312	25.22
Letters collected.....	617,016,182	760,113,963	143,097,781	23.19
Postal-cards collected.....	170,079,592	223,980,437	53,900,885	31.69
Newspapers, etc., collected.....	102,073,888	127,597,925	25,524,037	25.00
Whole number of pieces handled.....	2,234,564,656	2,630,861,758	396,297,102	17.73
Pieces handled per carrier.....	420,822	415,563	*5,259	*1.25
Total cost of service, including post-office inspectors.....	\$4,618,692.07	\$5,422,356.36	\$803,664.29	17.40
Average cost per carrier.....	†\$867.67	\$852.06	*15.61	*1.79
Average cost per piece, in mills.....	†2.2	2.0	*.2	*9.09
Amount of postage on local matter.....	\$6,691,253.69	\$7,721,689.16	\$1,030,435.47	15.39
Excess of postage on local matter over total cost of service.....	\$2,072,561.62	\$2,299,332.80	\$226,771.18	10.94

\* Decrease.

† Based on the aggregate, \$5,407,200.16, paid carriers, and for incidental expenses, and not including \$15,156.20 paid post-office inspectors.

The receipts from local postage exceeded the cost of service in 38 of the 358 offices (an increase of 8 over the previous year), as shown by the following table:

*Post-offices at which the local postage exceeded the cost of the service.*

Name of office.	Receipts from local postage.	Cost of carrier service.	Net gain.
Atchison, Kans.....	\$6,652.35	\$5,360.80	\$1,291.55
Atlanta, Ga.....	19,867.32	16,852.13	3,015.19
Baltimore, Md.....	198,501.15	144,336.52	54,164.63
Birmingham, Ala.....	12,460.15	5,211.36	27,248.79

1886-'87	189	5,310	4,618,692.07	6,691,253.69	-----	2,072,561.62
1887-'88	358	6,346	5,422,356.36	7,721,689.16	-----	2,299,332.80

Additional information concerning the operations of this service at every free-delivery office will be found in tabulated statement marked Table D.

Since the close of the fiscal year twenty-one additional offices have been established and a large number of applications are now pending.

The popularity of this service where it has been established, its usefulness to the people, and the great demand for its extension to additional cities prove the wisdom of its founders.

The diverse results at different offices as shown by the table, in regard to number of pieces handled, cost per piece in mills, cost of the service, disproportionate number of carriers to the population and business done, and other irregular features of the service which appear, are due to a variety of causes, among which may be mentioned the following:

The physical and geographical conditions of the territory to be served, such as streams to cross and hilly and broken ground to traverse; the amount of sparsely settled country and the number of large estates on the carriers' routes; the time of arrival and departure of mails and the quantity to be handled; the number of individual letters and pieces, and of packages of mail containing numerous letters and other matter to one address and delivered in bulk to business houses and manufacturing establishments; the failure in perhaps a majority of cases to obtain a correct count, rather than a very liberal estimate of pieces handled; the time required to make the service efficient at offices recently established; the compactness of some cities where a large business is done, and the number of dwellings in other cities more particularly occupied for residences, where a small amount only of business mail is handled.

An earnest effort is being made by the aid of competent inspectors and by correspondence to improve the service in every city.

In concluding, I desire earnestly to commend the chiefs of division and the clerks of this Bureau for faithful and efficient service.

Very respectfully,

A. E. STEVENSON,  
*First Assistant Postmaster-General.*

Hon. DON M. DICKINSON,  
*Postmaster-General.*

TABLE A.—Statement showing the number of Presidential post-offices in each State and Territory June 30, 1887, and June 30, 1888, with increase and decrease; also the number of post-offices of each class, together with the number of money-order post-offices and stations by States and Territories June 30, 1888.

States and Territories.	Presidential post-offices June 30, 1887.	Presidential post-offices June 30, 1888.	Increase.	Decrease.	Post-offices of the first class.	Post-offices of the sec- ond class.	Post-offices of the third class.	Post-offices of the fourth class.	Money-order post-offices June 30, 1888.	Money-order post-office stations June 30, 1888.

REPORT  
OF THE  
SECOND ASSISTANT POSTMASTER-GENERAL  
FOR  
1888.

---

# REPORT

## OF THE

### SECOND ASSISTANT POSTMASTER-GENERAL.

POST-OFFICE DEPARTMENT,  
OFFICE OF SECOND ASSISTANT POSTMASTER-GENERAL,  
*Washington, D. C., November 10, 1888.*

SIR: The annual rate of expenditure for inland mail transportation on June 30, 1888, was:

For 14,146 star routes, aggregating 225,607.53 miles in length.....	\$4,959,192.00½
For 5,906 mail messenger routes, aggregating 4,645.05 miles in length..	883,718.67
For 127 steam-boat routes, aggregating 11,053.49 miles in length....	438,942.27
For 1,995 railroad routes, aggregating 143,713.32 miles in length.....	17,528,599.80
For railway post-office car service.....	1,996,359.35
For railway post-office clerks.....	5,034,517.00
For mail equipments.....	269,530.73½
For necessary and special facilities on trunk lines.....	295,987.53
Total.....	31,456,847.35¾

Comparison with the report for June 30, 1887, shows:

For the star service, an increase of 286 routes, a decrease of 5,988.75 miles in length of routes, and a decrease of \$140,341.42¾ in the annual rate of expenditure.

The number of miles traveled per annum was 83,683,998.99, at a cost of 5.92 cents per mile, a decrease of 575,285.28 in the number of miles traveled per annum, and a decrease of 0.13 cent in the rate of cost per mile.

In the regulation wagon service (included in the star service) there were 30 routes, aggregating 397.47 miles in length, the annual rate of expenditure was \$404,796.74, the number of miles traveled per annum, 1,514,136.29; the rate of cost per mile, 26.73 cents; an increase of 9.72 miles in length of routes, an increase of \$532 in the annual rate of expenditure, an increase of 94,914.16 in the number of miles traveled per annum, and a decrease of 1.75 cents in the rate of cost per mile.

For the mail messenger service, an increase of 388 routes, an increase of 344.41 miles in length of routes, and an increase of \$54,170.06 in the annual rate of expenditure.

The number of miles traveled per annum was 10,595,355.22, at a cost of 8.34 cents per mile; an increase of 693,549.61 in the number of miles traveled per annum, and a decrease of 0.03 cent in the rate of cost per mile.

In the special office service there were 2,695 routes, aggregating 18,952.56 miles in length, an increase of 261 in the number of routes, and an increase of 3,520.70 miles in the length of routes.

The number of miles traveled per annum (estimated on a basis of 2.16 trips per week for each route) was 4,269,882.24, an increase (over the estimate for June 30, 1887) of 1,060,055.36 in the number of miles traveled per annum.

For the steam-boat service, an increase of four routes, an increase of 461.37 miles in the length of routes, and an increase of \$5,753.09 in the annual rate of expenditure.

The number of miles traveled per annum was 3,216,035.98, at a cost of 13.64 cents per mile, an increase of 103,752.66 in the number of miles traveled per annum, and a decrease of 0.28 cent in the rate of cost per mile.

For the railroad service, an increase of 168 routes, an increase of 12,764.51 miles in the length of routes, and an increase of \$1,353,908.58 in the annual rate of expenditure for transportation.

The number of miles traveled per annum was 185,485,783.33, at a cost of 9.45 cents per mile for transportation, an increase of 15,795,917.48 in the number of miles traveled per annum, and a decrease of 0.08 cent in the rate of cost per mile for transportation.

For the railway post-office car service, an increase of \$114,778.85 in the annual rate of expenditure.

The annual rate of expenditure for the railroad service (including the railway post-office car service), was \$19,524,959.15, an increase of \$1,468,687.43.

The rate of cost per mile traveled for railroad service (including the cost for railway post-office car service), was 10.52 cents, a decrease of 0.12 cent in the rate of cost per mile.

For railway post-office clerks, an increase of \$257,051 in the annual rate of expenditure.

For mail equipments, a decrease of \$5,383.09½ in the annual rate of expenditure.

For necessary and special facilities on trunk lines, an increase of \$10,401.43 in the annual rate of expenditure.

The sums actually disbursed appear in the Auditor's report.

The number of contracts drawn in duplicate during the year was 4,454, a decrease of 912 from the number for the preceding year.

#### CONDENSED STATEMENT OF WHOLE MAIL SERVICE.

A condensed statement of the whole service for the fiscal year ended June 30, 1888, shows that the total number of routes in operation on that date was 24,869, being an increase over the previous year of 1,107 routes, or 4.65 per cent; that the length of these routes aggregated a mileage of 403,976.95, being a net increase in mileage of 11,102.24, the percentage of increase in length of routes being 2.82; that the number of miles traveled during the year was 287,251,055.76, being an increase of 17,077,989.83 miles of travel, equivalent to an increase of 6.32 per cent. in miles traveled; that the cost per mile traveled was 10.95 cents, being a decrease of 0.72 per cent. in the cost per mile traveled from the previous year; that the annual rate of cost of this service on the same day, to wit, June 30, 1888, was \$31,456,847.35¾, being a total increase over the previous fiscal year of \$1,650,338.48¾, or 5.53 per cent. in the annual rate of expenditure.

Comparison of the star and steam-boat service for the year ended June 30, 1888, with the annual average of said service for the eight years next preceding develops the following results:

TABLE 1.—Comparison of star and steam-boat service.

	Star service.			Steam-boat service.		
	Miles traveled.	Rate of expenditure.	Cost per mile.	Miles traveled.	Rate of expenditure.	Cost per mile.
Average for years 1880 to 1887, inclusive.	80,271,915	\$5,691,080	7.09	4,051,527	\$607,651	15.00
For year ended June 30, 1888.....	83,683,999	4,959,292	5.92	3,216,036	4.8,942	13.64
Increase (per cent.).....	4.25					
Decrease (per cent.).....		12.86	15.09	20.62	27.76	9.06

TABLE 2.—Percentage of increase and decrease in estimates for inland transportation.

Statement showing the percentage of increase or decrease in the estimates of cost for in and mail service for the years 1881 to 1890, inclusive, as compared with the appropriation for the year preceding each of them.

Appropriation.		Estimate.		Percentage of increase or decrease.	
Year.	Amount.	Year.	Amount.	Increase.	Decrease.
1880.....	\$20,845,000.00	1881.....	\$24,125,000.00	15.73	
1881.....	23,326,000.00	1882.....	25,715,032.00	10.24	
1882.....	24,376,032.00	1883.....	25,738,000.00	5.59	
1883.....	26,067,000.00	1884.....	25,494,120.00		2.20
1884.....	24,387,120.00	1885.....	27,441,503.00	12.52	
1885.....	26,401,000.00	1886.....	30,294,269.50	14.74	
1886.....	28,510,090.00	1887.....	30,363,735.64	6.50	
1887.....	30,100,432.00	1888.....	30,137,750.15	.12	
1888.....	30,137,750.15	1889.....	31,816,682.74	5.58	
1889.....	31,653,777.74	1890.....	34,878,942.02	10.18	

The first of the above tables (1) shows a decrease in the rate of expenditure for the star service of 12.86 per cent. and in the cost per mile of 15.09 per cent.; in the steam boat service a decrease in the rate of expenditure of 27.76 per cent., and in the cost per mile of service of 9.06 per cent., while there has been an increase in the number of routes in both classes of service.

## STAR SERVICE.

The annual rate of expenditure for this class of service, including regulation wagon service, on June 30, 1888, was \$4,959,192.00 $\frac{1}{4}$ .

The number of routes was 14,146, of an aggregate length of 225,607.53 miles, and an annual travel of 83,683,998.99 miles.

The cost per mile traveled was 5.92 cents.

The average number of trips per week was 3.56.

A comparison with the last annual report shows, for the fiscal year ended June 30, 1883, an increase of 286 routes, a decrease of 5,988.75 miles in the length of routes, a decrease of \$140,341.42 $\frac{3}{4}$  in the annual rate of expenditure, a decrease of 575,285.28 in the number of miles traveled per annum, a decrease of 0.13 cent in the rate of cost per mile traveled, and an increase of .07 in the average number of trips per week.

The appropriation for the last fiscal year was \$5,400,000.

The sum actually expended was \$5,015,178.22, leaving an unexpended balance of \$384,821.78.

The annual rate of expenditure for service on July 1, 1888, under contracts made during the last fiscal year for the performance of star service from July 1, 1888, to June 30, 1892, in the second contract section, embracing the States of North Carolina, South Carolina, Georgia, Florida, Alabama, Mississippi, Tennessee, and Kentucky, was \$569,746.21, a decrease from the annual rate of expenditure for service in the same States on June 30, 1888, of \$4,201.42; representing a saving of \$16,805.68 for the ensuing contract term of four years from July 1, 1888.

The total number of star routes in operation on June 30, 1888, was 14,146; on July 1, 1888, 14,923, an increase of 777.

The annual rate of expenditure for all the star service in operation was—

July 1, 1888.....	\$5,040,172.14½
August 31, 1888.....	5,134,636.94½
September 30, 1888.....	5,151,802.08½

The appropriation for the current fiscal year is \$5,400,000, the sum estimated as necessary for the current fiscal year is \$5,400,000.

The amount estimated as necessary for the fiscal year ending June 30, 1890, is \$5,750,000, being \$350,000, or 6.48 per cent., more than the appropriation for the current year.

#### REGULATION WAGON SERVICE.

This service is performed in cities in wagons of a uniform character prescribed by the Department, and is a most important and necessary arm of the service for the dispatch and transfer of the mails in the great centers of business and population. It is awarded by contract, as star-route service, and is estimated for in the appropriation for that service, and paid out of that appropriation.

The statement following shows the cities in which it has been established, and the annual rate of expenditure therefor:

*Annual rate of expenditure for the regulation-wagon, mail-messenger, mail-station, and transfer service in operation June 30, 1888.*

Place.	Amount.	Place.	Amount.
Baltimore, Md.....	\$8,875.20	New Orleans, La.....	\$4,098.00
Boston, Mass.....	34,960.00	New York, N. Y.....	165,600.00
Brooklyn, N. Y.....	16,800.00	Omaha, Nebr.....	2,995.00
Buffalo, N. Y.....	4,900.00	Philadelphia, Pa.....	27,200.00
Burlington, Iowa.....	1,298.00	Pittsburgh, Pa.....	6,880.00
Charleston, S. C.....	2,100.00	Providence, R. I.....	2,890.00

Memphis, Tenn.....	4,000.00		
Nashville, Tenn.....	2,792.00	Total.....	404,796.74

#### STEAM-BOAT SERVICE.

The annual rate of expenditure for this class of service on June 30, 1888, was \$438,942.27.

The number of routes was 127, of an aggregate length of 11,058.49 miles, and an annual travel of 3,216,035.98 miles. The cost per mile

traveled was 13.64 cents. The average number of trips per week was 2.79.

A comparison with the last annual report shows, for the fiscal year ended June 30, 1888, an increase of four routes, an increase of 461.37 miles in length of routes, an increase of \$5,753.09 in the annual rate of expenditure, an increase of 103,752.66 in the number of miles traveled per annum, a decrease of .28 cent in the rate of cost per mile traveled, and a decrease of .03 in the average number of trips per week.

The appropriation for the last fiscal year was \$450,000; the sum actually expended was \$409,872.56, leaving an unexpended balance of \$40,127.44

The annual rate of expenditure for service on July 1, 1888, under contracts made during the last fiscal year for the performance of steam-boat service, from July 1, 1888, to June 30, 1892, in the second contract section, embracing the States of North Carolina, South Carolina, Georgia, Florida, Alabama, Mississippi, Tennessee, and Kentucky, was \$134,963.25, a decrease from the annual rate of expenditure for service in the same States on June 30, 1888, of \$299.35; representing a saving of \$1,197.40 for the ensuing contract term of four years from July 1, 1888.

The total number of steam-boat routes in operation on June 30, 1888, was 127, and on July 1, 1888, the same number.

The annual rate of expenditure for all of the steam-boat service in operation was—

July 1, 1888 .....	\$446, 119. 92
August 31, 1888 .....	453, 725. 87
September 30, 1888 .....	456, 653. 52

The appropriation for the current fiscal year is \$450,000.

The sum estimated as necessary for the current fiscal year is \$475,000.

The amount estimated as necessary for the fiscal year ending June 30, 1890, is \$500,000, being \$50,000, or 11.11 per cent., more than the appropriation for the current year.

#### MAIL-MESSENGER SERVICE.

The annual rate of expenditure for this class of service on June 30, 1888, was \$883,718.67; the number of routes was 5,906, of an aggregate length of 4,645.05 miles, and an annual travel of 10,595,355.22 miles. The cost per mile traveled was 8.34 cents. The average number of trips per week was 21.93.

A comparison with the last annual report shows, for the fiscal year ended June 30, 1888, an increase of 383 routes, an increase of 344.41 miles in length of routes, an increase of \$54,170.06 in the annual rate of expenditure, an increase of 693,549.61 in the number of miles traveled per annum, a decrease of .03 cent in the rate of cost per mile traveled, and a decrease of .20 in the average number of trips per week.

The appropriation for the last fiscal year was \$900,000. The sum actually expended was \$851,709.39, leaving an unexpended balance of \$48,290.61.

The number of routes in operation on June 30, 1888, was 5,906; on July 1, 1888, 5,908; an increase of 2.

The annual rate of expenditure for all service in operation was—

July 1, 1888 .....	\$883, 942. 67
August 31, 1888 .....	896, 959. 54
September 30, 1888 .....	901, 251. 31

The appropriation for the current fiscal year is \$950,000. The sum estimated as necessary for the current fiscal year is \$950,000.

The amount estimated as necessary for the fiscal year ending June 30, 1890, is \$1,050,000; being \$100,000, or 10.52 per cent. more than the appropriation for the current year.

## RAILROAD MAIL SERVICE.

*Increase in length of railroads over which the mails were carried during each of the years from 1882 to 1888, inclusive; also, showing the number of miles of railroad service on which the pay was unadjusted on June 30, of each of said years.*

1888 .....	1,996,359	114,779		6.10	

ESTIMATES FOR RAILWAY POST-OFFICE CAR SERVICE AND FOR RAILWAY POST-OFFICE CLERKS, FOR THE FISCAL YEAR ENDING JUNE 30, 1890.

The appropriation for the railway post-office car service for the year ending June 30, 1889, was \$2,000,000. The estimate for the fiscal year ending June 30, 1890, exclusive of the amount to accrue to the Pacific railroads, is \$2,260,000, being an increase of \$260,000, or 13 per cent. over the appropriation for the current fiscal year. For railway post-office clerks the appropriation for the current fiscal year is \$5,246,790.21. The estimate for the fiscal year ending June 30, 1890, is \$5,676,728.74, being an increase of \$429,938.53, or 8.19 per cent. over the appropriation for the current fiscal year. The increase in these two branches of the service has been rendered necessary not only by the great extension of railroad mail transportation, hereinafter mentioned, but by the large increase in the weight of the mails carried, the necessity for greatly increased facilities for distributing the mails in transit, especially in the Northern and Western States, and the additions which have been made to the lines of fast mail:

For a more particular statement of the reasons of these increased estimates I refer to the report of the General Superintendent of the Railway Mail Service.

## MISCELLANEOUS.

Amount of appropriation for the current year .....	\$1,000.00
Amount expended during current year .....	294.50
Balance unexpended .....	\$705.50
Estimate for next fiscal year ending June 30, 1890 .....	1,000.00

## SPECIAL FACILITIES.

The appropriation for special facilities on trunk lines for the fiscal year ending June 30, 1889, is \$295,987.53, and the current expenditure on account of this fund is as follows:

Number of route.	Termini.	Railroad company.	Miles.	Pay.
5005.....	New York—Springfield.	New York, New Haven and Hartford.	136	\$17,647.06
6011.....	4.35 a.m. train .....	New York Central and Hudson River.	144	25,000.00
10001.....	Philadelphia—Bay View.	Philadelphia, Wilmington and Baltimore.	91.80	20,000.00
10013, 11001 (part) ..	Bay View—Quantico ..	Baltimore and Potomac.....	79.80	21,900.00
11001 (part) ..	Quantico—Richmond ...	Richmond, Fredericksburgh and Potomac.	81.50	17,419.26
11008.....	Richmond—Petersburgh.	Richmond and Petersburg .....	23.39	4,268.67
11009.....	Petersburgh—Weldon ..	Petersburgh .....	64	11,680.00
13002.....	Weldon—Wilmington ..	Wilmington and Weldon.....	162.07	29,541.27
14002.....	Wilmington—Florence ..	Wilmington, Columbia and Augusta.	110	20,075.00
14005.....	Florence to Charleston Junction.	Northeastern .....	95	17,337.50
14004.....	Charleston Junction to Savannah.	Charleston and Savannah.....	108	19,710.00
15009.....	Savannah to Jacksonville.	Savannah, Florida and Western ...	171.50	31,309.70
10006.....	Baltimore to Hagerstown.	Western Maryland .....	86.60	15,804.50
16018, 16007.....	Jacksonville to Tampa..	Jacksonville, Tampa and Key West and South Florida.	242.57	43,962.42
Total .....	.....	.....	.....	295,655.38

I recommend an appropriation of the above total amount, \$295,655.38, for a continuance of this important service for the next fiscal year.

Attention is invited to the tables accompanying this report for full details respecting railroad service.

Table C shows the railroad service in operation on the 30th of June, 1888.

Table H shows the re-adjustment of the rates of pay per mile on railroad routes in States and Territories in which the contract term expired June 30, 1888, and also on certain new routes in other States and Territories; the re-adjustment of the rates based upon returns of the weight of mail, and the speed at which they are conveyed, the accommodations for railway post-office clerks, and the number of trips per week, in accordance with the acts of March 3, 1873, July 13, 1876, and June 17, 1878.

Table I shows the rate of pay per annum for the use of railway post-office cars for the fiscal years ended June 30, 1887, and June 30, 1888, and the increase or decrease of 1888, as compared with 1887, and the reasons therefor.

Table K is a statement of expenditures on account of special facilities for the fiscal year ended June 30, 1888, out of \$295,987.53 appropriated by the act approved March 3, 1887.

Table L shows the number of miles of railroad mail service ordered from July 1, 1887, to June 30, 1888.

Table M gives statistics of mileage, increase in mileage, and annual transportation, and cost of the railroad service from 1836 to June 30, 1888.

#### ESTIMATES FOR RAILWAY MAIL TRANSPORTATION FOR FISCAL YEAR ENDING JUNE 30, 1890.

In my letter of estimates I have placed the appropriation required for railroad mail transportation for the fiscal year ending June 30, 1890, at \$19,105,557.90. This is a large increase upon the estimates for last year for this branch of the service, the increase being \$2,105,557.90, or 12.38 per cent. The grounds for this increased estimate are given in

my letter of estimates, and they are briefly these: The increase in the length of routes of new service for the next fiscal year has been estimated by me at 7,000 miles, and it is not believed from present information that it is likely to exceed that amount. It is true that during the past fiscal year the increase in miles of railroad mail transportation was 12,764.51, but that was an unprecedented, and, I may say, phenomenal increase in that branch of the service, not to be anticipated for any one year for sometime to come. The source of the increase in the cost of this service is rather to be looked for in the large increase in the weight of the mails carried, and the consequent increase in the rate of cost therefor and the extension of the fast mail service. The section to be weighed next year, and in which the railroad service is to be adjusted for four years beginning on the 1st of July, 1889, is the eastern section, embracing the New England States and the States of New York, New Jersey, Pennsylvania, Delaware, Maryland, Virginia, and West Virginia, and the District of Columbia.

This section embraces some of the great trunk lines on which the largest weights of mails are carried. The weighing of the mails in the second section, embracing the Southern States and the States of Ohio, Indiana, and Michigan, last year, resulted in an increase in the rate of cost of 18.75 per cent. in those States. The character of the service, particularly in the States of Ohio and Indiana is similar to the character of the service in the States of New York, New Jersey, and Pennsylvania, and the increase in the weight of mails carried in the former States furnishes an approximate criterion by which to gauge the probable increase in the weight of mails in the latter-named States. As it was 18.75 per cent. in the second section, it is safe to conclude that it will be larger in the first therefore, and I put that increase at 21 per cent. I have therefore placed the estimates in this service for the next fiscal year at the sum above named, to wit, \$19,105,557.90.

The increase in the mileage of railway post-office car service was 9,701.61. The expansion of this important branch of the service is also without a parallel in any one year since its establishment.

These increases were ordered in response to the demands and requirements of the public, whose business and commercial interests were thereby greatly promoted, and in discharging that great obligation which the Department is under to furnish the people the best mail facilities and to supply the highest grade of service attainable.

#### FAST MAIL.

Several most important lines of fast mail have been established. The fast mail between Chicago and Omaha has been made daily, and now runs both ways, instead of simply west, as before.

This fast mail connects with the fast mail between New York and Chicago at Chicago, which has also been increased to run east as well as west.

A fast mail has been established between Portland, Oregon, and Chicago, and between Chicago and New Orleans, via Cincinnati, Chattanooga, and Meridian, Miss.

It will thus be seen that every part of our country has been made to share in the benefits of this fast mail service, and a wider and more liberal policy in its distribution has characterized the administration of this Department during the last fiscal year.

North, South, East, and West have been dealt with in this regard

with an equal and impartial hand. The fast mail along the Atlantic coast from Portland, Me., to Havana, Cuba, via New York, Baltimore, Washington, and Key West, which has been established for many years, needed no additional facilities to augment its present general efficiency.

These improvements may be briefly summed up as having effected a reduction in the transit of the mails between New York and the Pacific coast, both east and west, one full day, and between Chicago, via Cincinnati and Chattanooga, and New Orleans and all points south to eight hours, or the equivalent to a full commercial day.

The advantage to the business community of this reduction in time of transit of the mails is incalculable, and the increase in rate of cost by which it has been accomplished is not at all disproportionate to, but is entirely justified by, the results achieved and the benefits which will accrue to the public. For a full and detailed statement of these improvements in the service I refer to the report of the General Superintendent of the Railway Mail Service, herewith transmitted.

Before leaving this subject I invite your attention to the recommendations submitted in the report of the General Superintendent of the Railway Mail Service for increased appropriations for additional clerical force for his office and also for an increase in the salaries of the clerks in the Railway Mail Service who are charged with conducting the examination of postal clerks.

I think the salaries of the last-named clerks should be increased to \$1,500 per annum, and that a sum not exceeding \$300 per annum for each of these clerks should be appropriated to meet the expenses which they are obliged to incur while traveling for the purpose of conducting examinations and other work incumbent upon them.

The amount asked for is moderate and is justified by the responsible and laborious duties which they discharge. Some provision should certainly be made to indemnify them for expenses incurred by them while traveling on business of the Department.

I also concur in the recommendation of the General Superintendent of the Railway Mail Service for the appointment of a chief clerk to the General Superintendent of the Railway Mail Service at such salary as should be deemed just and reasonable.

#### INCREASES IN STAR SERVICE.

I have also asked for an increase in the appropriation for star service amounting to \$350,000.

The extension of railroad construction has enabled the Department to dispense with many long lines of this branch of the service, especially in the Western States and Territories, and to replace them with the superior facilities which railroad transportation furnishes; but while doing this, this great extension of the railroad system of our country has contributed to spread and build up the populations in those regions of the country to such an extent as to very greatly augment the demand not only for new and short lines of star service, but for a great increase of frequency in the number of trips, thus entailing very considerable and additional expenditure.

#### MAIL MESSENGER SERVICE.

The mail messenger service, which is a complement and an outgrowth of the railroad mail service, and which necessarily increases in propor-

tion to the extension of railroad mail transportation, has been so largely augmented during the last year as to render an increased appropriation necessary. The amount of this increase I have placed at \$100,000. This estimate of increase is justified by the rapid extension of railroad construction, the growth of the population, and the requirements and demands of an intelligent, enterprising, and commercial people.

#### DIVISION OF INSPECTION.

The gross amount of fines and deductions from postal contractors and others during the year ended June 30, 1888, was .....	\$354, 139. 85
The amount of remissions on deductions on account of satisfactory explanation was .....	\$77, 205. 10
The amount of remissions of fines was .....	19, 710. 03

Making total remissions of fines and deductions.....	96, 915. 13
--	-------------

Leaving the net amount of fines and deductions for the fiscal year ended June 30, 1888 .....	257, 224. 72
--	--------------

The above amounts are classed as follows:

Deductions and fines, railroad service .....	\$279, 874. 47	
Deductions and fines, star service .....	44, 685. 02	
Deductions and fines, steam-boat service .....	22, 124. 02	
Deductions and fines, mail messengers .....	2, 909. 08	
Deductions and fines, postal clerks .....	4, 547. 26	
Total deductions and fines .....		\$354, 139. 85
Remissions, railroad service .....	87, 162. 72	
Remissions, star service .....	7, 610. 83	
Remissions, steam-boat service .....	1, 749. 16	
Remissions, mail messengers .....	254. 74	
Remissions, postal clerks .....	137. 68	

Total remissions .....	96, 915. 13
------------------------	-------------

Leaving net amount of fines and deductions for the fiscal year ended June 30, 1888 .....	257, 224. 72
--	--------------

#### MAIL EQUIPMENTS.

Appended herewith is a tabular statement (O) of the number, description, prices, and costs of all mail bags and mail catchers purchased and put into service during the last fiscal year ended June 30, 1888, and a tabular statement (P) of all mail locks purchased or repaired for service during the same period; also a tabular statement (N) of all contracts for mail equipments in operation on June 30, 1888.

The total cost of mail bags and mail catchers, with their appurtenances and repairs, during the year ended June 30, 1888, was \$247,030.19, against a cost for the same items during the previous fiscal year ended June 30, 1887, of \$255,483.63.

The appropriation for these items for the last fiscal year was \$275,000.

The total number of new mail bags purchased and put into service during the year was 196,300, of which number 24,300 were locked mail bags of various kinds and sizes, used chiefly for letters and registered mail matter; 172,000 were tied bags, used for mail matter of the second, third, and fourth class, when not registered.

The balance of the appropriation shown to have been unexpended (\$27,969.80½, statement O) resulted from a new system pursued in the repair shops, whereby an increased force does more repairing, and from the amount reserved out of the appropriation for disbursements to postmasters for expenses necessarily incurred, and paid by them for repairs

of mail bags, the cost of which is contingent and variable and can not be definitely and accurately ascertained until some time after the end of the fiscal year, when all postmasters' accounts shall have been settled by the Auditor of the Post-Office Department.

The total cost of mail catchers, and brackets for same, was \$1,300. The total cost of mail locks and keys, and repairs of the same, was \$22,500.54; the appropriation being \$23,000.

After careful consideration the amount needed for the necessary equipments for the year ending June 30, 1890, is estimated as follows:

For mail bags and catchers and repairs.....	\$225,000
For mail locks and repairs .....	15,000

Being a reduction of \$70,000 on the estimates for these articles for the current fiscal year. The total number of mail locks and keys on hand and in the service on June 30, 1888, was as follows:

Mail-bag locks.....	263,003
Street letter-box locks .....	47,374
Total number of locks.....	310,377

Keys to mail-bag locks.....	67,416
Keys to street letter-box locks.....	6,487

Total number of mail keys.....	73,903
--------------------------------	--------

The number of mail bags in the service, estimated by adding the number of bags bought during the fiscal year to the number reported in service at the close of the fiscal year 1886-'87, and then deducting the condemned reported by the repair shops, and from the remainder subtracting 10 per cent. for bags destroyed by fire, robbery, or other accidents, is as follows:

Locked mail bags of every kind .....	170,972
Tied mail sacks of every kind .....	624,850

Shortly after the appointment of the new chief of the mail equipment division the discovery was made by him that in the post-offices in the cities of Washington and New York a very large amount of bags and sacks had been suffered to accumulate for want of repairs and which could be used in the service to good advantage.

After an investigation it was discovered that from 250,000 to 300,000 bags, jute, canvas, and leather, had been allowed to thus accumulate in those two offices.

These repair shops had been placed, by the regulations of the Department, under the charge of the postmasters of those respective places, who submitted monthly reports of the condition of those shops, the amount of bags received, the number repaired, and the cost of such repair.

It is plain from the results of this investigation that for some years proper attention had not been given to this surplus stock of damaged mail bags.

By an order issued by you the repair shop in the city of Washington was placed under my immediate direction, and a general order was passed instructing that all the bags to be repaired should be sent to that office for such repair.

The working force of the repair shop in the city of Washington was, from time to time, increased until it now numbers ninety-one persons.

All this accumulated stock in New York and elsewhere was sent to this repair shop in the city of Washington. The result has been a saving of at least \$60,000 per annum.

No requisitions for new jute bags, sacks or leather bags have been issued from this office since last February, and none for leather sacks since last December, and the service has been amply supplied out of this surplus damaged stock, which has been put in good and serviceable repair.

In view of these results I have to recommend that a permanent repair shop be established in the city of Washington under the direction of the chief of the mail equipment division of this office, and that all the bags and sacks damaged shall be sent to the city of Washington for repair.

I further recommend that in connection with this shop for repairing sacks and bags there shall also be established a shop for repairing mail locks and keys. The economy achieved, as above stated, by the repair of all damaged mail bags and sacks in the city of Washington justifies the opinion that a great saving will be effected to the Government by repairing its own locks and keys.

To this end I recommend a special appropriation of \$10,000 to enable the Postmaster-General to make a permanent lease of some place in the city of Washington to furnish and equip it with the tools, implements, and machinery and other material which may be necessary to repair mail bags and sacks and mail locks and keys.

It is believed that a place in every way adapted for this purpose at a rent certainly not exceeding \$5,000 a year can be secured.

As the saving effected already in repairing mail bags and sacks has resulted in a decreased estimate for mail equipments for the next fiscal year of \$70,000, it will be seen that the expenditure of this sum is justified.

I append a table showing the quantity of the sacks and bags repaired in the Washington repair shop since May 1, 1888. The work done there has enabled the Department, as I have heretofore observed, to keep the service abundantly supplied with these articles of mail equipment without making a single requisition for any new sacks or bags, canvas or leather, since it has been under my charge.

Before closing this part of my report it is proper to mention that under your instructions I renewed the contracts for another period of four years with the contractors for the supply thereof, for inside street letter-box locks, general iron locks and the repair of the general iron locks, and also for furnishing street letter-box locks. But in doing so, and under your instructions, I availed myself of the stipulations in these contracts authorizing the Postmaster-General, in his discretion, to extend such contracts for another period of four years. •

Inside street letter-box locks are hereafter to be furnished for 80 cents each, instead of 85 cents each, being a reduction of 6 per cent.

General iron locks are hereafter to be furnished at 45 cents each, instead of 52 cents each, being a reduction of  $13\frac{1}{2}$  per cent.

The repairing of these general iron locks is to be done at 33 cents each, instead of 35 cents each, being a reduction of 6 per cent.

An agreement has also been entered into with the same contractors for furnishing the service with street letter-box locks for a term of four years, beginning September 1, 1888, and terminating September 1, 1892. These locks, which cost \$1.25 each, will be furnished for the said contract term for 50 cents each, being a reduction in the cost of this article of mail equipment of 60 per cent.

Before the expiration of these contracts and the renewal of them, as above stated, the question as to the advisability of advertising for entirely new locks and keys was fully considered by this office. As the

service requires that all locks and keys shall be the same, and as it was estimated that the replacing of the general mail lock with key attached would cost about \$150,000, it was deemed in the line of a proper and wise economy to continue these locks in the service for another period of four years, to use the opportunity above stated for a reduction in the cost thereof.

The stock of these articles of mail equipment on hand being very large, and the number of new locks and keys which would be required in the service would not, it was estimated, exceed 10,000, and the mail locks in present use being generally in good order and very serviceable, it was deemed to be in the line of economy to renew these contracts for another period of four years. If my recommendation for the establishment of a shop for the repair of these locks be carried out the cost of this article of mail equipment for the next four years will be comparatively small.

The number of pouches and sacks at the Washington, D. C., repair shop from May 1 to October 1, 1888, was as follows :

Jute sacks.....	214, 381
Leather pouches.....	20, 236
Catcher pouches.....	5, 021
Horse bags.....	680
Registered pouches.....	451
Inner registered sacks.....	1, 113
Total.....	241, 882

#### PROPOSED CHANGE IN THE BASIS OF PAY OF RAILROAD COMPANIES FOR MAIL TRANSPORTATION.

Before closing this report I desire to again call your attention to the necessity of a revision of the present method of compensating railroads for mail transportation. In my report of 1886 I had the honor to submit a full and detailed report on this subject and to suggest a change in the basis of pay by which space occupied, instead of weight of mails carried, should be the standard and criterion of compensation.

The reasons for this opinion are given in that report fully and exhaustively, and it is not necessary to repeat them here.

In my last annual report I called attention to this subject. The large increase in the estimates submitted to meet the expenses of railroad mail transportation for the fiscal year ending June 30, 1890, furnishes an additional reason, if any were needed, for again inviting your attention and the attention of Congress to this most important subject. It becomes more and more apparent every year that the present method is what I declared it to be two years ago, in my report of 1886, cumbersome, inequitable, and unsatisfactory, and ill-adapted to the present condition of the service. Under the present system of adjustment the Department is sometimes paying for what it does not get and gets sometimes what it does not pay for.

I am more than ever convinced, the more reflection I give to this subject, that when a reform takes place, as it must take place sooner or later, in the method or basis of pay to railroads for mail transportation, it will be on the lines suggested by me in my report of 1886, and referred to in my last annual report, and in which I followed, with important modifications, it is true, as to the additional payment for increased speed and frequency, the conclusion which has been reached by those who have preceded me in this most important field of investigation, namely, that the only proper and just basis of pay to railroads

for mail service is the amount of space occupied by the mails in transit, and not their weight. It is not claimed, it is proper to add, for this proposed method of adjustment of railroad compensation that it will prevent a steady increase in the absolute cost of this service proportionate to its steady and uniform increase throughout the country, but it is confidently believed that the proposed system, substituting space for weight as the gauge or basis of pay, will enable the Department to keep the annual rate of that increase in cost within more reasonable and economical limits than it is possible to do under the existing system, and that it can be more easily adjusted to the changes that are daily taking place in the distribution of the mails and establish a more equitable proportion between the service rendered and the compensation given.

In conclusion I desire to express my acknowledgments to the chief clerk, the heads of the various divisions, and to the clerical force generally of this office for the faithful and efficient manner in which they have discharged their duties.

Very respectfully,

A. LEO KNOTT,  
*Second Assistant Postmaster-General.*

Hon. DON M. DICKINSON,  
*Postmaster-General.*

## ADDENDUM.

Exhibit 1.—Statement of business disposed of during the fiscal year.

Table A.—Shows annual rate of expenditure, appropriation, and estimates.

Table B.—Shows length of routes, annual rate of expenditure, and number of miles traveled per annum, in star, steam-boat, and railroad service.

Table C.—Statement of railroad service.

Table D.—Statement of steam-boat service.

Table E.—Statement of increase and decrease in star, steam-boat, and railroad service.

Table F.—Statement of deductions, fines, and remissions.

Table G.—Statement of inland mail service, with increase and decrease and percentages of increase and decrease for fiscal year.

Table H.—Statement of weight of mails, speed and accommodations for mails, and R. P. O. clerks, and re-adjustment of pay on railroad routes, with an index.

Table I.—Statement of the annual rate of expenditure for R. P. O. cars, showing increase and decrease since last annual report.

Table K.—Statement of expenditures for necessary and special facilities on trunk lines.

Table L.—Statement of railroad service established since last annual report.

Table M.—Statement of railroad service from 1836 to June 30, 1888, showing increase and decrease in length of routes.

Table N.—Statement of all contracts for mail equipments and for use of patents.

Table O.—Statement of expenditures for certain mail equipments.

Table P.—Statement of expenditures for mail locks and keys.

EXHIBIT 1.—Statement showing the amount of current business disposed of during the year ended June 30, 1888, in the office of the Second Assistant Postmaster-General.

OFFICE OF GENERAL SUPERINTENDENT OF  
RAILWAY MAIL SERVICE,  
*Washington, D. C., November 1, 1888.*

SIR: I have the honor to present to you herewith the annual report of the operations of the Railway Mail Service for the fiscal year ended June 30, 1888, which may be summarized as follows: Up to the close of the fiscal year ended June 30, 1888, service had been authorized by the Department upon 143,713.42 miles of railroad. Postal clerks were employed in the distribution of the mail on 126,310.73 miles; service on the remainder, namely, 17,402.69 miles, being performed by closed pouches. On the same date there were in operation 41 inland steam-boat lines, aggregating 5,972.80 miles, on which postal clerks were employed.

There were employed in handling and separating the mails while in transit on railroad routes 4,641, and on steam-boat routes 54 railway postal clerks, making a total of 4,695 men.

While in the performance of their duty the postal clerks on railroads traveled (in crews) 122,031,104 miles, and those employed on steam-boats 1,767,649 miles.

While so traveling they distributed 6,528,772,060 pieces of ordinary mail matter, and receipted for, recorded, protected, and properly distributed 16,001,059 registered packages and cases and 1,103,083 through-registered pouches and inner-registered sacks.

During the year 12,764.42 miles of new railroad service have been added, being an increase of 9.74 per cent. The lines on which service was performed by clerks show an increase of 9,701.61 miles, or 8.32 per cent. Lines supplied by closed pouches were increased from 14,350.05 miles at the close of the fiscal year 1887 to 17,402.59 miles on June 30, 1888, being an increase of 3,052.54 miles, or 21.27 per cent. The annual mileage of this class of service for 1887 was 14,489,613 miles; for 1888 17,436,819 miles, an increase of 2,947,206 miles, or 20.34 per cent.; and the number of pouches exchanged daily increased from 11,714 for the year 1887 to 13,059 at the close of 1888, being a daily increase of 1,345, or 11.48 per cent.

Compared with 1887 the number of clerks employed on steam-boat lines decreased from 57 to 54, and the length of routes increased from 5,864.89 miles to 5,972.80, being an increase of 107.91 miles, or 1.84 per

cent.; while the number of miles run by clerks dropped from 1,868,747 miles in 1887 to 1,767,649 in 1888, being a decrease of 101,098 miles, or 5.41 per cent.

The total number of clerks in the service at the close of the fiscal year ended June 30, 1887, was 4,851; on June 30, 1888, 5,094, being an increase of 243, or 5.01 per cent.

The following exhibit shows the nature of service, the number of clerks engaged in each class of work, and the increase over 1887:

Fiscal year ended—	Employed on rail-road lines.	Employed on steam-boat lines.	Detailed to transfer service.	Detailed to office duty.	Total.
June 30, 1888 .....	4,641	54	219	180	5,094
June 30, 1887 .....	4,403	57	218	173	4,851
Increase.....	238	*3	1	7	243

\* Decrease.

During the year ended June 30, 1887, 5,851,394,057 pieces of all classes of mail matter were handled, and 1,734,617 errors checked, showing that .99.971 per cent. of all mail handled was correctly distributed, or, in other words, of every 3,374 pieces handled, 3,373 were correctly dispatched and 1 incorrectly. In 1888 the number of pieces handled was 6,545,876,202, and the number of errors checked 1,765,821, being a correct distribution of .99.973 per cent. of all mail handled, or one error to every 3,707 pieces.

The increase in the number of pieces of ordinary mail handled was 8.76 per cent., while the increase in the number of errors was but 1.79 per cent.

As will be seen by table K<sup>k</sup>, facilities for the handling of mail in transit have been increased since June 30, 1887, on 19,145 miles of railway post-office routes. These betterments include new railway post-office lines established or extended, additional trips over old lines, together with the miles of routes covered by full railway post-office car service on lines where apartment car service was in operation at the close of the previous fiscal year.

Division.	Comprising the States of—	Miles.
First.....	New England.....	451.40
Second....	New York, New Jersey, Pennsylvania, Delaware, and the Peninsula of Maryland and Virginia.....	369.51
Third.....	Maryland (excluding the eastern shore), part of Virginia, West Virginia, North Carolina, and the District of Columbia.....	412.52

	Total.....	19,145.85

## CASE EXAMINATIONS.

A marked improvement is shown this year in the record of case examinations of the permanent railway postal clerks, the average per cent. of cards correctly distributed having increased from 87.50 in 1887 to 90.50 in 1888.

The subjoined table is inserted to show the record of case examinations of permanent clerks made during the year under review, compared with similar examinations held during 1887:

Division.	Examinations.	Cards handled.	Cards correct.	Cards incorrect.	Cards not known.	Average per cent. correct.
First.....	705	444,240	439,744	4,482	14	98.99
Second.....	1,088	1,534,224	1,182,912	107,982	243,330	77.10

\* Decrease.

It may not be out of place to explain here that the reason why the average per cent. of cards correctly handled by probationers approaches so near to the percentage attained by the permanent clerks each year is owing to the fact that while the former have many examinations on a small number of offices the latter, who are required to make a much wider distribution, have many more cards to handle at each examination.

The above tables show that the clerks holding permanent appointments increased their percentage of cards correctly handled from 87.50 in 1887 to 90.50 in 1888, and there was an increase from 85.34 in 1887 to 85.87 in 1888, shown in the record made by probationary clerks who received permanent appointments during the year.

The average number of cards handled at each examination by each probationary clerk during the year ended June 30, 1888, was 726, and the average number handled by each permanent clerk was 1,014.

In 1887 950,613 through registered pouches (including inner-registered sacks) were handled by postal clerks, and in 1888 1,103,083, being an increase of 152,470 pieces, or 16.03 per cent., while the registered packages and cases handled increased from 15,752,569 in 1887 to 16,001,059 in 1888, being an increase of 248,490 pieces, or 1.57 per cent.

For many years past postal-cards and stamped envelopes, issued to postmasters for sale to the public, have been forwarded from the manufactories as registered matter through railway post-offices to the post-offices ordering them. In order to relieve postal clerks of the care and handling of these heavy cases of supplies and allow sufficient room on several of the more important railway post-office lines for the storage and distribution of the legitimate mail, Congress, at its last session, granted authority to the honorable Postmaster General to forward a portion of this bulky matter by freight lines to depots of distribution. This measure, so far as the postal-cards are concerned, was put into operation early in the current year by the establishment of distributing depots at Chicago, Ill., and Saint Louis, Mo., to which points postal-cards, to meet the demand in certain Western and Southwestern States, are now forwarded by the car-load as freight, thereby relieving the main railway post-office lines between New York and Chicago and New York and Saint Louis of the handling of much of this matter and allowing room and time for the storage, separation, and distribution of the ordinary and registered mails, as well as in saving to the Government a considerable sum of money.

#### MAIL FOR CITY DELIVERY.

In addition to the number of letters, etc., distributed during the year, there were separated for city delivery 143,091,750 pieces of letter and 19,575 pieces of paper mail.

The number of pieces of this matter has decreased somewhat from the number reported last year, owing, mainly, to changes of schedules, which resulted in the arrival of railway post-offices at destination at earlier hours, thereby allowing the post-office, through which the mail is to be delivered, to make its own distribution in time for the first carrier delivery.

The following is a comparative statement of city letters distributed by railway post-offices:

Year ended—	Packages distributed.	Incorrect slips.	Errors.	Letters distributed.	Papers distributed.
June 30, 1887 .....	1,966,858	6,117	18,705	147,537,232	22,882
June 30, 1888 .....	1,907,890	11,342	23,559	143,091,750	19,575
Decrease .....	58,968	*5,225	*4,854	4,445,482	3,307

\*Increase.

## CASUALTIES.

The casualties during 1887-'88 were more numerous than for any preceding fiscal year, there having been 248 accidents to trains upon which postal clerks were employed. In the wrecks on lines 4 clerks were killed, 63 seriously and 45 slightly injured. Sixty-four were so severely injured as to require the employment of acting clerks to keep up their runs. The sum of \$9,922.48 was paid such acting clerks during the fiscal year for the services rendered by them. Acting clerks had also to be provided for 12 postal clerks who were injured in 1886-'87 and not able to resume service at the commencement of the fiscal year; the amount paid by the Department during the year on account of the casualties in 1886-'87 being \$2,840.64.

## INSURANCE.

In view of the fact that no action has ever been taken by Congress in reference to providing for the care of clerks permanently injured in this service, and those dependent upon them in case of death, which humane action has so often been recommended by the Department, I am led to believe that there are insurmountable objections on the part of the people's representatives to the creation of anything of the nature of a civil pension roll, and it would therefore seem to be useless for me to renew the recommendations of my predecessors. I believe, however, that some steps should be taken in the direction of affording aid to the families of those who may be killed while in the discharge of their duties, and beg to invite your attention to the following outlines of a plan for relief in such cases which, I think, will commend itself to every railway postal clerk, and which, I trust, may meet with the sanction of Congress.

For the purpose of insuring the lives of railway postal clerks while in the actual performance of duty, there shall be deducted from the pay of each and every railway postal clerk the sum of 10 cents per month, which sum shall be withheld by the paying office upon the payment of monthly salaries; and the total amount accrued from this source shall be passed quarterly to the credit of an account to be known as "The railway postal clerk's insurance fund," by the proper accounting officer of the Treasury of the United States. Upon the death of a railway postal clerk from injuries received while in the actual performance of his duties as such, provided his death occurs within the period of one year from the date of injury, there shall be paid to his heir, or heirs, out of such fund the sum of \$1,000, by United States Treasury warrant; that a committee of three, consisting of the General Superintendent and two division superintendents of the railway mail service, be authorized to pass upon the evidence of death, etc., and upon whose joint certificate payment by warrant is to be based.

Before any plan of this character can be carried into effect it will, of course, be necessary to obtain the consent of all who are to be affected thereby, and as it is desirable to have the consent of every railway postal clerk borne on the roll of the Department, it is suggested, as an inducement to those clerks who are detailed to office duty and do not run the risk attending travel in R. P. O. cars, to enter into this arrangement, that, in the event of the death of any one of the latter class from injury or natural causes during their term of service, a sum equal to one-third of the amount to be allowed in cases of death resulting from

accidents on the line be paid in the same manner as is prescribed for that class of cases.

Under this plan of insurance it will be noticed (1) that the Government is not called upon to contribute to the fund; (2) that the amount deducted from the pay of the clerks for the fund need not be drawn from the Treasury by paying offices; (3) that the security is ample; (4) that the rate of assessment is merely nominal, and (5) that the creation of any additional offices for the supervision or management of the fund will be unnecessary.

#### REGISTERED PACKAGES, ETC.

In the matter of handling registered matter in transit, I desire to call attention to the necessity for the employment of registry clerks in certain railway post-office lines running between the more important commercial centers of the country, who should be required to take charge of the registered matter that may be received on their trains, and become solely responsible for its safety and proper disposition; thereby relieving the clerk in charge so that he may have sufficient time to see that his subordinates properly perform their duties, and that the ordinary mail is properly pouched and dispatched. Under existing arrangements, and owing to the enormous quantity of ordinary mail delivered to the larger railway post-offices on each trip, the clerk in charge, into whose custody registered matter is placed, can not give such an examination to each separate piece of this valuable matter as is required by the Department and which it should receive when the transfer is made.

These clerks in charge are now compelled, on account of the limited time allowed for the exchange of mails at stations, to give receipts for packages, pouches, and cases of this matter, representing large amounts in value, which they have no time to verify or even cursorily examine until their trains are miles away from the place of transfer. The number of pieces delivered is, of course, counted upon delivery; but while the total number delivered may be correct, there can be no certainty on the part of the receiving clerk that he gave receipts for the same numbered packages as it is claimed were delivered to him, or that this mail is moving to destination in the right direction. The Chief Post-Office Inspector, in a letter to this office concerning the custom of receipting for through-registered pouches without checking or verifying the lists, says:

This reprehensible practice \* \* \* is against the regulations, good administration, honest treatment of the patrons of the mails; subjects good clerks to suspicion and totally prevents the object and theory of the registry system.

With this opinion I fully concur and believe that the evils referred to can be remedied by the appointment of registry clerks, whose runs could be so arranged as to lap over several miles of the route, thereby giving sufficient time to enable a hand-to-hand delivery to be made, and a descriptive list of the articles turned over to be exchanged and checked. These clerks would be required to perform all and every duty in connection with the registered mail to insure its safety while in the custody of this service, and would render unnecessary the detention of the mail at any point en route, for the purpose of verification. I regret that, owing to the condition of the current appropriation, this plan can not be put into operation at once. I have, however, entered, in my estimates for the fiscal year ending June 30, 1890, submitted herewith, an

item to cover the expense of employing additional railway postal clerks for the performance of this special service, which I trust will meet with the approval of Congress.

## IMPROVEMENTS.

The improvements in this service during the past fiscal year and up to date have been more extensive than perhaps during any previous year in its history. A noticeable feature in the improvements is that they have been more general and distributed over a greater area of country than has heretofore been found practicable, embracing New England, the Southern and Middle States, the transcontinental service between Chicago and San Francisco, and also the northwestern section traversed by the Northern Pacific Railroad.

Following are brief statements of the new service ordered, with date of establishment, chronologically arranged:

*September 20, 1887.*—A line of 40-foot postal cars was authorized between Chicago, Ill., and North McGregor, Iowa, this new service taking up and discontinuing the old apartment car line between Milwaukee and Prairie du Chien, Wis., and establishing a through railway post-office line of 40-foot cars the whole distance between Chicago and North McGregor, thereby furnishing an additional and independent line between Chicago and Milwaukee, and securing to the old line between Milwaukee and Prairie du Chien a greatly improved service by the additional space afforded for the proper and speedy distribution of the mails, and greatly enhancing its importance to the country local to it by the extension to Chicago, thereby affording the country dependent upon the entire line all possible facilities for direct communication with that important business center.

*December 20, 1887.*—New service was on this date ordered between Ashland, Oregon, and Henley, Cal., thereby opening a new line between Portland, Oregon, and Sacramento, Cal. The establishment of this new service followed immediately the completion of the Oregon and California Railroad, and resulted in an advance in delivery of twenty-four hours of all ordinary mails passing between Portland and Sacramento, and in the advance of valuable registered mails from two to three days, as previous to the opening of the through line all registered mails were forwarded via Ogden, Utah, and the Green River and Huntington railway post office.

This is looked upon by the Department as one of the most important pieces of new service established during the present fiscal year, as the advantages above detailed fully indicate.

A further slight change in this railway post-office has been made by extending it to San Francisco, so that the railway post-office cars now run direct to and from Portland and San Francisco.

*January 1, 1888.*—An important change in the service, affecting New England, was the change of schedule on the Boston and Albany Railroad, to leave Boston at 6.30 p. m. instead of 6 p. m., and connect at Albany at 1.35 a. m. with the fast mail leaving New York at 9 p. m., thereby affording an opportunity for a more complete close of the p. m. business mails and connections from Boston.

*January 17, 1888.*—Under this date an order was issued establishing a line of 40-foot postal cars between Cincinnati, Ohio, and Chattanooga, Tenn. This additional space became absolutely essential to meet the demands of the public servable by or dependent upon this railway post-office for the transmission of the mails from and to Cincinnati and Chat-

tanooga via the Cincinnati, New Orleans and Texas Pacific Railroad; but the demands were not satisfied until long after the Department fully realized the needs in the premises, because of more urgent demands elsewhere and insufficient appropriation. These 40-foot cars were placed on the new fast through run, and the apartment cars formerly used were placed on a later train, thereby providing an additional line for local and intermediate service, which was not possible with previous facilities.

*February 14, 1888.*—An order was issued substituting a line of 50-foot postal cars between Pacific Junction, Iowa, and McCook, Nebr., for the line of 40-foot cars before in operation, and establishing a 40-foot line between Kansas City, Mo., and Oxford, Nebr., for the apartment cars previously in use on this line.

The above increase in space was an absolute necessity to complete the establishment of a through R. P. O. line between Chicago and Denver via Omaha, Nebr., and between Saint Louis and Denver via Kansas City, Mo., and the Burlington and Missouri River Railroad system, to constitute a through direct line to run in connection with the fast mail between Chicago and Omaha. This new service affords improved facilities for the satisfactory and expeditious handling of the mails for the country traversed by the above line, and one that fully compensates the Department for the expense incurred, by insuring to the public the more rapid transmission of its mails.

*March 3, 1888.*—Arrangements were completed between the Department and the Chicago, Burlington and Quincy Railroad Company for increasing the fast-mail service between Chicago, Ill., and Council Bluffs, Iowa, from six to seven times a week, so as to make the service between those points daily, Sundays included, instead of daily except Sundays, as was the schedule previous to the change. This change affected the trains moving in both directions, east and west. The benefits of this new service are very far-reaching in their effects, being equally advantageous to Boston, New York, and other points in the east as to Chicago and vicinity. Previous to this change there was no through direct connection for points west of Chicago via the fast mail for such mails as accumulated for dispatch on Fridays from Boston, New York, and the east for the Pacific coast; but now, the service being daily, there is no interruption or delay to the regular course of transmission.

Prior to the date above mentioned there was no fast-mail service east from Council Bluffs, although the Department had the privilege of utilizing the fastest trains in operation between San Francisco and Council Bluffs. But from the latter point east no special provision existed for advancing the mails delivered at Council Bluffs from the west. In connection, however, with the increase of the service west-bound from daily except Sundays, to daily, Sundays included, arrangements were also completed with the Chicago, Burlington and Quincy Railroad for a fast mail east-bound between Council Bluffs and Chicago, taking up at the former point the through fast connection from San Francisco in the p. m. and delivering the same at Chicago in the early a. m. of the following day. This fast mail had the effect of reducing the transit time one full day between the Pacific coast and Chicago stand-point, securing the arrival at Chicago on Fridays at 7.50 a. m. of the mails dispatched from San Francisco the previous Monday at 3 p. m., instead of arriving at Chicago, as by previous schedule, Saturday at 6.55 a. m.

*March 30, 1888.*—It seems proper in this place to mention that facilities for exchanging mails with Mexico have been greatly improved during the past year by the completion of the Mexican International Railroad

between Eagle Pass, Tex. (Piedras Negras, Mexico), and Torreon, Mexico. This line was completed about the 1st of March last, and immediately upon official notification of the same a general order was issued March 30, 1888, directing the dispatch of all foreign closed mails for the City of Mexico, and also the domestic accumulation destined for the interior of Mexico, to be dispatched via Eagle Pass. By this change an advance of one full day is secured to all mails from New York and the Northern, Middle, and Southern States to the City of Mexico. Under the former schedule of dispatch via El Paso, Tex., the transit time from New York to the City of Mexico was as follows:

Leave New York 4.30 a. m. Monday; arrive Mexico City 7.15 a. m. following Monday.

The present schedule is: Leave New York 4.30 a. m. Monday; arrive Mexico City 7.15 a. m. Sunday.

A net gain of one full day from New York and the East to Mexico City, and a similar gain is also made for correspondence from Mexico City destined for New York and the East.

*May 6, 1888.*—A line of 60-foot postal cars was ordered in lieu of the 50-foot cars then in use on the R. P. O. line between Washington, D. C., and Charlotte, N. C. This is the north end of the trunk line between Washington, D. C., and New Orleans, La. The increased space has long been needed to admit of the correct handling and distribution of the heavy mails passing over this line to and from New York and New Orleans.

*May 27, 1888.*—An important item is the improved service via the Chicago and Louisville R. P. O. (Louisville, New Albany and Chicago R. R.). Frequent demands were made for an earlier dispatch from Louisville in the a. m. of mails for the South via the Louisville and Nashville road, but a compliance with these demands had always been impracticable for the reason that no sufficient quantity of mail was available for dispatch in the early a. m. from Louisville, owing to the schedules between Chicago and Cincinnati, the hour of arrival at Louisville being about 9 a. m. This was too late to justify the expense of a fast train from that point south. Now, however, the fast train is had, leaving Chicago at 8.30 p. m., and arriving at Louisville at 6.29 a. m., and leaving Louisville at 6.50 a. m., and arriving at Nashville at 12.20 p. m., Montgomery 9.45 p. m., and New Orleans 7.55 following a. m. This is a very advantageous arrangement of schedule, as it places the p. m. Chicago mails in Louisville for first carrier delivery the following morning, and delivers the Louisville morning papers same day of publication, for all points south of Louisville to Montgomery, Ala., reaching New Orleans the next morning at 7.55, instead of next night at 7.20, as by the old schedule; reaching Montgomery at 9.45 p. m., instead of 7.10 following a. m., by old schedule; reaching Nashville at 12.20 p. m., instead of 7.40 p. m., and advances the connections for southern Texas from twelve to twenty-four hours, by making the connection at New Orleans in the a. m., by the new schedule, instead of in the p. m., as was the case by the old schedule.

*May 29, 1888.*—A new schedule was put into operation between Portland, Oregon, and Chicago, Ill., via the Northern Pacific and the Chicago, Minneapolis and Saint Paul railroads. Previous to the introduction of this new schedule the transit time east-bound between Portland and Chicago was five days three hours and thirty minutes, but by the introduction of the new schedule the time was reduced one full day, so as to leave Portland at 11 a. m. Monday and arrive at Chicago 7 a. m. Friday, instead of leaving Portland at 11.55 p. m. Monday, and arriving

at Chicago at 7 a. m. Saturday, under the old schedule. This is a very important improvement because of the commercial relationship existing between Chicago and all points via the Northern Pacific road, even to Portland, and furnishes a fast-mail service east and west, between Chicago and Portland, which fully meets all reasonable demands for the expeditious transmission of the mails. The present schedule between these points is three days thirteen hours west, and three days twenty hours east.

*June 1, 1888.*—Growing out of the improved service between Chicago and Louisville, an order was issued June 1, 1888, for a line of 40-foot postal cars to run between Nashville, Tenn., and Montgomery, Ala., in lieu of the line of apartment cars at that time in operation. The gradual natural increase in the volume of mail going forward via the R. P. O. from Cincinnati, Ohio, to New Orleans, La., via the Louisville and Nashville trunk-line system, together with the new connection from Chicago via the Louisville, New Albany and Chicago Railroad to Louisville, resulted in a volume of mail of such proportions that it was found absolutely necessary to furnish increased space and facilities to meet the requirements of storage and distribution in order to fully secure all the advantages of lateral connections between Nashville and Montgomery and beyond.

*June 3, 1888.*—Taking effect this date an important change was made in the schedule of the trains between New York and Boston via the New York, New Haven and Hartford and Boston and Albany Railroads (Boston, Springfield and New York R. P. O.), so as to leave New York at 11 p. m. instead of 10.30 p. m., and arriving at Boston at 6.01 instead of 6.20 a. m., thereby shortening the time east-bound 49 minutes; and to leave Boston at 11.01 instead of 10.31 p. m., and arrive at New York at 6 instead of 6.25 a. m., decreasing the transit time between Boston and New York 55 minutes.

This is one of the most important changes made for many years for the transmission of the heavy mails from and to New England and New York. The later dispatch from New York insures the heavy and important connection from the southwest via the Pennsylvania Railroad and the south via the Washington and Jacksonville and Washington and New Orleans railway post-offices, which two latter connections reached New York at 9.15 p. m. Heretofore (as above stated in connection with the Pennsylvania arrival at Jersey City) the important connections from Jacksonville and New Orleans were frequently missed for New England at New York because of slight delay in the arrival at Jersey City. This, however, by the new schedule leaving New York at 11 p. m., is entirely overcome. The arrival at Boston and New York at an earlier hour than heretofore insures all connections previously made, and makes some additional connections which, under the old schedule, it was impossible to make. The later departure from Boston admits of a sure and complete dispatch from that point of mails from all sections of northern New England destined for New York and points in the West, Southwest, and South.

These expedited trains between Boston and New York meet a want that has long been felt, as the Department has frequently been petitioned by the business communities of Boston and the East to afford some facilities for a later dispatch from Boston and an earlier arrival at New York; also for a later departure from New York and an earlier arrival at Boston, with a view to expediting the important commercial mails between the two cities. These demands the Department has heretofore

been unable to satisfy, for the reason that it would involve compensation for special facilities.

*June 16, 1888.*—A line of 40-foot postal cars was ordered under this date between Cincinnati and Toledo, Ohio, via the Cincinnati, Hamilton and Dayton and Dayton and Michigan Railroads. It had been apparent to the Department for a long time that the needs of this route demanded greater space and facilities for the proper distribution and dispatch of local mails and connections at the two important terminal offices, and the failure to furnish increased facilities before has deprived the public dependent upon this line of postal conveniences which they were justly entitled to expect.

*June 24, 1888.*—A schedule change was made by the roads constituting the Boston, Providence and New York R. P. O., between Boston, Mass., and New York, N. Y., via Providence, R. I., so as to leave New York at 11.31 instead of 11.01 p. m. and arrive at Boston at 7 instead of 6.50, a gain of twenty minutes; to leave Boston at 11.30 instead of 11 p. m. and arrive at New York the following a. m., the time of the old schedule.

While this change is a move in the direction of improvement, the advantages resulting are rather local to the country directly dependent upon this R. P. O. for its mail supply. The bulk of the mail between Boston and New York is moved via the Boston, Springfield and New York R. P. O., because of its superior facilities as to equipment and space; and further, because it is not liable to obstructions by ferries and otherwise which frequently interfere with the movement on schedule time of trains via the Boston, Providence and New York line.

*July 15, 1888.*—Specially improved facilities for the movement of mails via the Detroit and Grand Rapids R. P. O. were secured by a change of schedule so as to leave Detroit at 3.45 a. m. and reach Grand Rapids at 10 a. m., instead of leaving Detroit at 7.30 a. m. and reaching Grand Rapids at 3.15 p. m. This change, to leave Detroit at 3.45 a. m., is one that for a long time has been badly needed in order to place the early a. m. Detroit mails and connections at that point throughout the lower peninsula of Michigan before a late hour in the day. The new schedule advances mail for all points between Detroit and Grand Rapids from four to six hours, and in addition secures connection at Jackson for all points on the Bay City and Jackson line, reaching Lansing at 8.20 a. m. and Saginaw at 10.50 a. m. In fact, it advances mail for all points in central, southern and western Michigan, and even to Fort Wayne, Ind.

*September 15, 1888.*—Under this date service was ordered between Des Moines, Iowa, and Saint Joseph, Mo., via the Chicago, Saint Paul and Kansas City Railroad, completing the line between Saint Paul, Minn., and Saint Joseph, Mo., via the system of road above mentioned. This is a very important new service and affords greatly improved facilities via Des Moines, Iowa, for the transmission of the important mails accumulating in the north Minnesota country for the Southwest to Saint Joseph and Kansas City, Mo., and connections at these points.

*September 21, 1888.*—A single daily line of 40-foot postal cars was ordered on the Alabama and Great Southern Railroad (Chattanooga and Meridian R. P. O.). This increase in space followed as a necessity upon the improved service via the Cincinnati, New Orleans and Texas Pacific before described, as by the improved facilities between Cincinnati and Chattanooga a considerably increased quantity of mails was diverted to the latter line because it was found a more expeditious transmission of mails from a Cincinnati stand-point could be attained for the

Mississippi and Louisiana country, including New Orleans, via the Alabama and Great Southern as a direct connection, and consequently increased space on the Chattanooga and Meridian was found necessary to handle in a proper manner the additional volume of mail to be distributed. It should be remembered that this line in connection with the Cincinnati and Chattanooga run constitutes the shortest trunk line between Cincinnati and New Orleans, running via Chattanooga, Tenn., and Meridian, Miss., and thence via the New Orleans and Northeastern Railroad to New Orleans.

*September 22, 1888.*—An order was issued for a line of 40-foot postal cars between Atlanta and Way Cross, Ga. This additional space was found necessary to afford proper facilities for the distribution of the increased volume of mail going forward from Atlanta and connections from that point for Florida and southeastern Georgia. This increase in volume was largely due to the fact that gradually the channel for the transmission of mails from Chicago to Florida has been fixed via Louisville, Ky., Chattanooga, Tenn., and Atlanta, Ga.

*October 1, 1888.*—Taking effect October 1, a further addition to the fast-mail service of the country was made by changing the schedule of the line between Saint Louis, Mo., and New York, N. Y., via the Pennsylvania Railroad.

For more than a year the Department has had a fast mail via the Pennsylvania Railroad, leaving New York at 7.40 p. m., and reaching Saint Louis at 2.45 a. m., second morning, connecting at the latter point with the fast mail via the Missouri Pacific Railroad, leaving Saint Louis at 3 a. m. By experience it was found that this service was far from satisfactory; first, because the important a. m. connections from Pittsburgh, Pa., could not be secured, and, secondly, because the margin for connection at Saint Louis being so small, the heavy mails from the East for the Southwest were frequently delayed from twelve to twenty-four hours at Saint Louis, owing to some slight delay preventing the Pennsylvania train from reaching that city in time to connect the 3 a. m. train departing. To remove these two causes of complaint the new schedule by the Pennsylvania road leaves New York at the same hour as formerly, 7.40 p. m., but reaches Pittsburgh at 8.30 a. m., instead of 9.30, as was the case under the old schedule. By this arrival one hour earlier a forenoon carrier delivery is secured at Pittsburgh and all the important connections from that point for Pennsylvania and Ohio are made, which under the old schedule it was impossible to do.

It has been the effort of the Department for some years to secure to the people of Pittsburgh the advantages which they were justly entitled to, and which they now have, of an earlier a. m. arrival of the important business mails from New York and Philadelphia; and from reports received I am convinced that the recent change fully meets the desires of the people of that city.

Under this schedule the train reaches Saint Louis at 1.45 a. m., leaving a margin of one hour and fifteen minutes in which to make the connection with the Missouri Pacific departing at 3 o'clock a. m. Previous to the introduction of this schedule the connection at Saint Louis was very frequently missed with the fast mail departing, but since it went into effect not a single failure has occurred, and I am confident that the connection at that point between the fast mail from the East and the fast mail departing for the West may be considered secure, except for unavoidable causes.

The putting into effect of this new schedule was only a part of the scheme for the improvement of the facilities between Saint Louis and

New York. Heretofore, while there was a fast mail west, the Department has had no facilities for the expeditious transmission of the important mails from the Southwest to the East via this line. Now, however, taking effect October 8, 1888, a fast train is had, leaving Saint Louis at 8.10 a. m., reaching Philadelphia at 1.25 p. m. and New York at 4 p. m. the following day, instead of leaving Saint Louis at 7.30 a. m. and reaching Philadelphia at 6.50 and New York at 9.40 the following evening.

This is by far the most important change that has been made on the Pennsylvania Railroad in recent years, as it admits of the a. m. dispatch of mails from Saint Louis being delivered in the early p. m. of the following day at Philadelphia and a full carrier and box delivery at New York. Under the old schedule neither of these deliveries could be made until the following a. m., showing a gain of one full business day by the introduction of this fast mail. The system of separating the city mails by the clerks in the cars is also a very advantageous feature of this new Saint Louis and New York run, so that the city carrier delivery is made at Philadelphia and New York immediately upon the arrival of the train, thus avoiding the delay necessary to make the separation at the post-offices before furnishing the mail to the carriers for delivery.

The important p. m. connections at Philadelphia and New York are entirely secured by the new schedule, while under the old one the arrival at Philadelphia was too late for mail to be utilized until the next day, either for local delivery or connections; and the connections at New York for the New England country at 10.30 p. m. were frequently broken because of the time required to make the transfer between Jersey City and the Grand Central Depot. So that the slightest delay in the arrival at Jersey City would result in a failure to connect the departing trains for Boston and the East. Frequent efforts had been made by the Department to overcome this difficulty, but it was always found impossible, for the reason that no arrangements could be made with the Pennsylvania Company to arrive at Jersey City earlier than 9.30 p. m., nor could any satisfactory arrangement be made with the companies running the New England trains to delay their departures from New York. The new fast mail, however, overcomes this difficulty entirely and insures the connection at New York for New England, the importance of which can not be overestimated, as it involves all the mails from the Southwest via Saint Louis and the accumulation between Saint Louis and New York for the New England country, both of which are very important and heavy mails.

*October 11, 1888.*—In order to fully secure the advantages of the improved service west of Chicago for the East, arrangements were completed taking effect October 11, 1888, with the New York Central and Hudson River and the Lake Shore and Michigan Southern Railroads between New York and Chicago for a daily fast mail east-bound, to leave Chicago at 8.30 a. m. and reach New York at 12.30 p. m. next day, being twenty-seven hours between Chicago and New York.

This last mentioned fast service is one of the most important improvements yet made in the east-bound mail facilities, the advantages of which to commercial and other correspondence it is hardly possible to estimate too highly. At Chicago this fast mail receives connection from the fast mail arriving from San Francisco via the Central and Union Pacific roads, and also from Portland, Oregon, via the Northern Pacific and Chicago, Milwaukee and Saint Paul roads, thus constituting a fast mail from the Pacific to the Atlantic coast, resulting in a

saving of one full day for all correspondence from the Pacific Coast States for all points in the East. Previous to the establishment of this fast mail east-bound between Chicago and New York, the a. m. dispatch of Monday from Chicago did not reach New York until 7 p. m. Tuesday, instead of 12.30 noon as at present. The arrival at 7 p. m. via the old schedule rendered the mail unavailable at New York until the next day. This was a very serious delay to commercial correspondence and mercantile paper, the latter being thereby deprived of treatment at the banks and clearing-house until the next day. Under the present schedule, however, arriving at 12.30 p. m., ample time remains for treatment day of receipt. And then, too, the fact should not be lost sight of that the intermediate country partakes of the advantages of this fast service equally with the terminal points.

The advantages of the fast mail are further increased by having a separation of city mails made on the cars by the postal clerks, so that immediately upon the arrival of the car at New York the mail is properly separated for immediate carrier delivery without necessitating the delay in the post-office which was formerly required to make the separation. This is a very important item, as on the arrival in the late p. m., by the system above described, an opportunity is had for a carrier delivery the same day, while if the mail had to be separated at the office the separation would not in many cases be completed until too late to secure the last carrier delivery.

In connection with this new fast mail service between Chicago and New York, an order was issued authorizing a line of 60-foot postal cars in lieu of the 50-foot cars that were in use on the former run which the fast mail east was intended to replace. These new cars will be constructed and fitted with all the latest improvements contributing to the expeditious distribution of the mails and are, in many respects, better adapted to the general purposes for which they are used, including comfort and ease for the clerks engaged in the trying and laborious work incident to the handling and distribution of mails on the cars. If the newly constructed cars prove entirely satisfactory, it is agreed by the railroad companies that all the remaining cars on this line shall be reconstructed and fitted with such improvements as the experience of the Department shall determine best adapted to secure the fullest possible results to the public.

Under the present arrangements for the transmission of the mails between San Francisco and New York, the schedule is as follows: Leave New York, 9 p. m. Monday, arrive San Francisco, 8.15 a. m. Sunday. Leave San Francisco 9 a. m. Monday, arrive New York 12.30 p. m. Saturday.

There are two other trains between these points, but the two first mentioned are the trains upon which the mails are forwarded, as they are the most expeditious.

In connection with this trans-continental service it will appear clear that no further improvement is possible with the facilities at the command of the Department, and when it is considered that the distance covered is over 3,340 miles it does not appear that any further improvement could be reasonably expected.

## PRINTING.

Printing offices have been in operation during the year at the headquarters of the first, fourth, fifth, sixth, seventh, eighth, and ninth divisions of the service, and in the office of the General Superintendent. These offices have furnished such printed matter as was required for immediate use by the divisions in which they are located.

The subjoined table shows the output of the several printing offices during the year:

Division.	General orders.			Facing slips.		
	No. of forms.	No. of ems set.	No. of impressions.	No. of forms.	No. of slips on a form.	No. of slips printed.
Office of General Superintendent*	141	752,000	20,700	367	12	3,145,080
First division.....	206	956,062	61,291	165	8	6,544,560
Fourth division.....	179	537,845	37,305	306	12	9,621,000
Fifth division.....	108	671,600	49,725	1,364	9 & 15	16,907,500
Sixth division.....	130	953,740	146,100	818	4, 8 & 16	19,476,000
Seventh division.....	98	859,234	39,500	233	4, 5, 10 & 12	2,365,000
Eighth division.....	89	408,000	25,887	614	5, 6 & 12	3,531,750
Ninth division.....	212	1,014,420	16,952	811	6 & 10	10,052,800
Total .....	1,163	6,152,901	397,460	4,678	.....	62,646,690

\*Government owns plant.

NOTE.—For the office of General Superintendent the following was performed on the Daily Bulletin: Number of forms, 365; number of ems set, 4,197,300; number of impressions, 346,330.

At division headquarters the work was done by men appointed as railway post-office clerks and detailed as printers, with the understanding that they were to furnish, at their own expense, certain presses, paper-cutters, type, etc., necessary to do the work required of them. The amount paid these printers for services rendered during the fiscal year ended June 30, 1888, was \$13,350, and the postal clerks detailed to operate the printing-office plant owned by the Government, and located in the basement of the Department building, received \$4,300.

## ASSISTANT GENERAL SUPERINTENDENT.

This service has assumed such large proportions during the past few years that the employment of an Assistant General Superintendent of the Railway Mail Service should be provided for by law, as such an officer would be of great service to this office in the transaction of the business of the executive branch of the service.

Prior to 1884 the duties of an Assistant General Superintendent were performed by a post-office inspector-in-charge, who was detailed to this office for the purpose, but by the promotion of the incumbent to the position of General Superintendent in that year the vacancy thereby created was filled by the appointment of an inspector-in-charge, who was needed elsewhere by the Department. This office thus lost the services of an assistant to the General Superintendent.

For the reasons stated above an Assistant General Superintendent should be provided, and I have the honor to recommend that the sum of \$3,000 be included in your estimates for the fiscal year ending June 30, 1890, for that purpose.

## CHIEF CLERK.

Attention is invited to the fact that a chief clerk has never been provided by law for this office. Up to the month of April, 1884, such an officer was employed at a salary of \$2,200 per annum and charged to the clerical force of the Washington city post-office; but under a subsequent ruling of the Department, based upon the ground that the detail was not warranted by law, the place was abolished, and since then the duties appertaining to it have been performed for a portion of the time by a \$1,400 clerk detailed for the purpose, and later by an assistant superintendent, whose compensation is \$1,600 per annum. In view of the fact that the duties and responsibilities of this position have increased with (and in the same ratio) as the railway mail service throughout the country, a much larger salary should be paid this officer for the services rendered by him, and the position should be placed on an equality with all other chief clerks of the Post-Office Department as to grade and rate of compensation.

I would, therefore, recommend that the sum of \$2,000 be inserted in your estimate for the fiscal year ending June 30, 1890, for one chief clerk for the office of General Superintendent of the Railway Mail Service. The following table will show the increase in service since the above-mentioned reductions in force and pay were made:

Fiscal year ended.	Miles of railroad over which mails were carried.	Annual transportation of mails by railroads.	Length of railway post-office lines.	Annual miles of service by railway post-office lines.	Number of railway postal clerks.	Number of pieces of mail matter handled by railway postal clerks.	Number of post-offices in the United States.
June 30, 1888 .....	143, 713	185, 485, 783	126, 310	122, 031, 104	5, 094	6, 545, 876, 202	57, 376
June 30, 1884 .....	117, 160	142, 541, 392	102, 140	92, 640, 099	3, 963	4, 536, 697, 326	50, 017
Increase .....	26, 553	42, 944, 591	24, 170	29, 391, 005	1, 131	2, 009, 178, 876	7, 359
Increase per cent. . .	+22. 6	+30. 1	+23. 6	+31. 7	+28. 5	+44. 2	14. 7

## CHIEF CLERKS.

Another matter to which I desire to invite particular attention is the apparent injustice to which chief clerks of the several divisions are subjected in being required to pay their traveling expenses while on the road in the performance of duty. To these officers is committed the immediate supervision of all the details of the service within certain territorial limits, with headquarters at designated places where many railway post-office lines terminate, and from which others may be easily reached, and, to quote from the Annual Report of my immediate predecessor for the fiscal year ended June 30, 1887:

"Their duties are to examine the men under their charge; to see that they perform all the duties required of them properly and thoroughly; that the schemes of distribution furnished them are kept corrected and that all orders issued by the General Superintendent and division superintendents are obeyed. All irregularities, insubordination, inefficiency, and lax morality occurring on routes under their charge must be reported to their division superintendents at once. In the performance of these duties the chief clerk must travel a great deal, and for his expenses while on the road he is not re-imbursed, as is done in the case of other Government officers, but must pay them out of his salary of \$1,400. This is not only unjust to these men but also a detriment to the service; for, in many instances where a personal inspection should be made, the chief clerk endeavors to settle the matter by correspondence rather than reduce his salary by incurring the increased expenditure incident to such inspection. In other words, the more useful the chief clerk makes himself by traveling about inspecting lines, examining, instructing, and encouraging the men, the greater will be his expenses, and, consequently, the less his salary. \* \* \* The best men in the service being selected for these positions, they are, as a rule, possessed of more than the average amount of executive ability; and, from their apprenticeship on the road, are well versed in the distribution and dispatch of mail. They certainly earn more money than is now paid them."

From an investigation of this matter, I am convinced that the salaries received by these officers for the services rendered is entirely inadequate, and that the zeal and skill manifested by them in the performance of their onerous and exacting duties during the past year would command a much higher rate of pay in any other branch of the public service. I would, therefore, earnestly renew, in substance, the recommendation of my predecessor that the law approved July 31, 1872, entitled "An act to designate, classify and fix the salaries of persons in the railway mail service," be so amended as to authorize the payment of these chief clerks at the rate of \$1,500 per annum, being an increase of \$100 each, and in addition thereto that their actual expenses, while traveling on the business of the Department, to an amount not to exceed \$300 in any fiscal year, be paid out of the appropriation for the transportation of the mails.

## SPECIAL FACILITIES.

There are no changes of importance to report this year in reference to the running of mail trains on lines where special facilities are paid for by the Department.

The appropriation for that purpose for the fiscal year ending June 30, 1889, is \$295,655.38, and the current expenditure on account of this fund is as follows:

Number of route.	Termini.	Railroad company.	Miles.	Pay.
5005.....	New York—Springfield.....	New York, New Haven and Hartford.	136.00	\$17,647.06
6011.....	4.35 a. m train .....	New York Central and Hudson River.	144.00	25,000.00
10001.....	Philadelphia—Bay View.....	Philadelphia, Wilmington and Baltimore.	91.80	20,000.00
10013 } part .....	Bay View—Quantico .....	Baltimore and Potomac.....	79.80	21,900.00
11001 } .....	Quantico—Richmond .....	Richmond, Fredericksburgh and Potomac.	81.50	17,419.26
11008.....	Richmond to Petersburg .....	Richmond and Petersburg .....	23.39	4,268.67
11009.....	Petersburgh to Weldon .....	Petersburgh .....	64.00	11,680.00
13002.....	Weldon to Wilmington .....	Wilmington and Weldon .....	161.87	29,541.27
14002.....	Wilmington to Florence .....	Wilmington, Columbia and Augusta	110.00	20,075.00
14005.....	Florence to Charleston Junction.	Northeastern .....	95.00	17,337.50
14004.....	Charleston Junction to Savannah.	Charleston and Savannah.....	108.00	19,710.00
15009.....	Savannah to Jacksonville .....	Savannah, Florida and Western.	171.56	31,309.70
10006.....	Baltimore to Hagerstown.....	Western Maryland .....	86.60	15,804.50
16018, 16007.....	Jacksonville to Tampa .....	Jacksonville, Tampa and Key West, and South Florida.	240.89	43,962.42
Total .....	.....	.....	.....	295,655.38

As is well understood, the annual appropriations for special facilities on trunk lines secure very important results in expedition to the mails which could not be otherwise obtained; and, believing that it is the desire of Congress to have these fast mail trains continued, I have the honor to recommend that, for the fiscal year ending June 30, 1890, the sum of \$295,655.38 be appropriated for extra and special facilities on trunk lines, this sum being about the same as the amount appropriated for the current fiscal year, which is \$295,987.53.

## ESTIMATES AND EXPENDITURES.

The amount appropriated for railway post-office car service, exclusive of the gross amount accrued to Pacific roads for the fiscal year ended June 30, 1888, was.....\$1,934,560.00  
Amount expended.....1,822,964.37

Leaving an unexpended balance of.....111,595.63  
Add to the above expenditure the amount accrued to Pacific roads.....128,237.62  
And we have the total cost for railway post-office cars during the year. 1,951,201.99

Compared with 1887, this is an increase of \$111,434.86, or 6.05 per cent.

The following tabular statement shows in concise form the growth of this branch of the service from July 1, 1879, to June 30, 1888:

Fiscal year ended June 30—	Amount of appropriation.	Amount expended.	Expenditures.		Per cent.		Gross amount accrued to Pacific railroads.
			Increase.	Decrease.	Increase.	Decrease.	
1880 .....	\$1,250,000.00	\$1,141,545.19	.....	.....	.....	.....	\$91,851.15

Average per cent. per year .....	.....	.....	.....	.....	48.90	.....	.....
					6.98	.....	.....

No separate appropriation made for 1879.

From the above it will be seen that, excluding amounts accrued to the subsidized Pacific roads and branches (which are not paid from this appropriation), the average annual increase for the last seven years (1886 not included) is 6.98 per cent. In making up this average increase 1886 was excluded for the reason that the apparent decrease in that year was owing entirely to the discontinuance of payment for apartment cars less than 40 feet in length.

The annual *rate* of cost of railway post-office car lines (exclusive of the amounts to be credited the subsidized Pacific lines) on July 1, 1888, was \$1,858,958.60. From July 1 up to and including October 27, 1888, additional lines aggregating \$109,017.45 have been authorized by the Department, and it is apparent from carefully prepared data that during the current fiscal year additional lines costing \$130,800.45 will be needed. If these are authorized the annual *rate* of cost on July 1, 1889, will be \$2,098,776.50. There are also recommendations on file from division superintendents for additional service amounting to \$143,336.70, which will increase the aggregate for the new fiscal year to \$2,242,113.20. As there are good reasons for believing that the expansion of this service is likely to continue during the coming year I do not think it advisable to place the estimate below \$2,260,000, and I have the honor to recommend that the sum of \$2,260,000 be appropriated for railway post-office car lines, *exclusive of lines on the subsidized Pacific roads*, for the fiscal year ending June 30, 1890.

While the amount called for is somewhat in excess of the average increase for previous years, the phenomenal growth of the service in the Western, Southern, and Southwestern States of late, which the Department now finds itself unable to keep pace with in the matter of postal-car service (for want of sufficient appropriation), would seem to imperatively demand that the full amount estimated for should be appropriated for the railway post-office car service.

On the 30th of June, 1887, there were 4,851 railway postal clerks in the service; and on June 30, 1888, there were 5,094, being an increase of 243, or 5.01 per cent. The amount paid for salaries during the former period was \$4,694,561.75; during the latter \$4,981,365.93, being an in-

crease of \$286,804.18, or 6.11 per cent. The amount appropriated for salaries of postal clerks for the fiscal year ending June 30, 1888, was \$4,990,240.62, and the expenditures amounted to \$4,981,365.93, leaving an unexpended balance of \$8,874.69. The annual rate of expenditures for salaries of railway postal clerks was, on July 1, 1888, \$5,084,517, and the appropriation for the fiscal year ending June 30, 1889, is \$5,246,790.21, leaving a margin of \$162,273.21 for extensions of service, additional help on lines where mails are getting heavier, and the promotion of clerks who were serving as probationers at the beginning of the fiscal year.

The following table shows the per cent. of increase in expenditures on account of salaries of railway postal clerks for the period from October 1, 1886, to June 30, 1888, by quarters:

Quarter ending—	Expenditure.	Increase.	
		Amount.	Per cent.
September 30, 1886 .....	\$1,145,999.67		
December 31, 1886 .....	1,160,202.92	\$14,203.25	1.24
March 31, 1887 .....	1,182,510.39	22,307.47	1.92
June 30, 1887 .....	1,205,848.77	23,338.38	1.98
September 30, 1887 .....	1,219,994.52	14,145.75	1.17
December 31, 1887 .....	1,232,965.62	12,971.10	1.07
March 31, 1888 .....	1,254,111.01	21,145.39	1.72
June 30, 1888 .....	1,274,294.78	20,183.77	1.61
Average quarterly increase .....			10.71
			1.53

## SUMMARY.

Quarter.	Amount.	Quarter.	Amount.
Third quarter, 1886 .....	\$1,145,999.67	Third quarter, 1887 .....	\$1,219,994.52
Fourth quarter, 1886 .....	1,160,202.92	Fourth quarter, 1887 .....	1,232,965.62
First quarter, 1887 .....	1,182,510.39	First quarter, 1888 .....	1,254,111.01
Second quarter, 1887 .....	1,205,848.77	Second quarter, 1888 .....	1,274,294.78
Total .....	4,694,561.75	Total .....	4,981,365.93

Increase 1888 over 1887, \$286,804.18, or 6.11 per cent.

Taking the average quarterly increase of 1.53 per cent. and applying it to the fiscal year ending June 30, 1889, we have the following:

Amount expended quarter ended June 30, 1888 .....	\$1,274,294.78
Estimate third quarter, 1888 .....	1,293,791.49
Estimate fourth quarter, 1888 .....	1,313,586.49
Estimate first quarter, 1889 .....	1,333,684.36
Estimate second quarter, 1889 .....	1,354,089.73
Total .....	5,295,152.07

This is \$48,361.86 in excess of the amount appropriated.

Assuming that the expenditure for the quarter ending June 30, 1889, will be \$1,354,089.73, and applying the average quarterly increase of

1.53 per cent., we have the following as the probable cost for the fiscal year ending June 30, 1890:

Third quarter, 1889 .....	\$1, 374, 807. 30
Fourth quarter, 1889 .....	1, 395, 841. 85
First quarter, 1890 .....	1, 417, 198. 23
Second quarter, 1890 .....	1, 438, 781. 36
Total .....	5, 626, 728. 74
Add for pay of additional railway postal clerks to handle registered matter.....	50, 000. 00
	<hr/> 5, 676, 728. 74

Excluding the amount of the estimate for railway postal clerks to handle registered matter, this is an increase of \$379,938.53, or 7.24 per cent. over the appropriation for the current fiscal year (in which a deficiency is likely to be created), and the data above given warrants the belief that the service can not be properly performed for a less sum; and I, therefore, have the honor to recommend that this amount of \$5,676,728.74 be appropriated for the payment of salaries of railway postal clerks for the fiscal year ending June 30, 1890.

#### COMMENDATION.

In concluding this report I desire to acknowledge the deep obligations I am under to division superintendents and chief clerks for the aid they have afforded this office in carrying into effect the improvements inaugurated during the year, and for the energy and ability displayed by them in effecting needed changes in the service. Each of these and their subordinates, and those connected with this office, are entitled to a full measure of praise and commendation for the prompt and cheerful manner with which they have met all demands upon them for the performance of extra service, and for the fidelity and zeal with which they have performed the duties assigned them.

I have the honor to be, very respectfully, your obedient servant,  
W. L. BANCROFT,  
*General Superintendent.*

Hon. A. LEO KNOTT,  
*Second Assistant Postmaster-General.*

TABLE A<sup>a</sup>.—Statement of railway post-offices in operation

Designation of railway post-office. (Lines upon which railway post-office cars are paid for, in <i>italics</i> .)	Division.	Distance run by clerks, register to register.	Initial and terminal stations, running from east to west, north to south, or northwest to southeast (with abbreviated title of railroad company).	Number of route.	Miles of route for which railroad is paid.
		<i>Miles.</i>			
Arcadia and Cherry Vale, Kans.	7	71.37	Cherry Vale, Arcadia, Kans. (K. C., Ft. S. and M.).	33024	73.97
			Weir City Junction (n. o.), Weir, Kans. (K. C., Ft. S. and M.).	232043	3 90
Arkansas City and Warren, Ark.	7	56.60	Arkansas City, Trippe, Ark. (St. L., I. M. and S.).	29007	( <sup>3</sup> )
			Trippe, Warren, Ark. (St. L., I. M. and S.).	29004	49.25
Asheville and Jarretts, N. C. . . .	3	101.33	Asheville, Asheville Junction (n. o.), N. C. (Rich. and Dan.).	13006	( <sup>4</sup> )
			Asheville Junction (n. o.), Jarretts, N. C. (Rich. and Dan.).	13016	98.95
Ashland and Abbotsford, Wis..	6	133.70	Ashland, Abbotsford, Wis. (Wisconsin Central).	25017	133.10
			Ashland, Wis., Watersweet, Mich. (Mil., L. S. and West.).	25063	98.42
Ashland and Milwaukee, Wis..	6	480.69	Watersweet, Mich., Eland, Wis. (Mil., L. S. and West.).	25050	105.48
			Eland, Manitowoc, Wis. (Mil., L. S. and West.).	25049	110.60
			Manitowoc, Milwaukee, Wis. (Mil., L. S. and West.).	25018	77.63
Ashland, Wis., and Saint Paul, Minn.	6	184.22	Ashland, Ashland Junction, Wis. (Chi., St. P., Minn. and Om.).	25032	4.63
			Ashland Junction, Hudson, Wis. (Chi., St. P., Minn. and Om.).	25028	159.90
			Hudson, Wis., Saint Paul, Minn. (Chi., St. P., Minn. and Om.).	25030	( <sup>13</sup> )
Ashland and Richardson, Ky. . .	5	50.42	Ashland, Richardson, Ky. (Chattaroi) . . . . .	20027	50.36
Asheville, N. C., and Columbia, S. C.	4	164.00	Asheville, N. C., Spartanburgh, S. C. (R. and D. R. R.).	14011	72.27
			Spartanburgh, Alston, S. C. (R. and D. R. R.).	14008	68.39
			Alston, Columbia, S. C. (R. and D. R. R.). . .	14001	( <sup>14</sup> )
Ashley and Muskegon, Mich. <sup>15</sup>	9	96.24	Ashley and Muskegon, Mich. (T. S. and M.).	24076	96.24
Ashtabula, Ohio, and New Castle, Pa.	5	81.25	Ashtabula, Youngstown, Ohio (Pa. Co.). . . .	21044	60.36
			Youngstown, Ohio, Mahoningtown, Pa. (Pa. Co.).	21035	18.40
			Mahoningtown, New Castle, Pa. (Pa. Co.). .	8044	( <sup>17</sup> )
Ashtabula and Youngstown, Ohio. <sup>18</sup>	9	64.70	Ashtabula, Andover, Ohio (L. S. and M. S.).	8045	( <sup>19</sup> )
			Andover, Youngstown, Ohio (L. S. and M. S.).	21062	38.84
Astor and Leesburgh, Fla. . . . .	4	40.90	Astor, Fort Mason, Fla. (Fla. So. Rwy.). . .	261608	27.20
			Fort Mason, Leesburgh, Fla. (Fla. So. R. R.).	261604	13.60
Atchison and Lenora, Kans. <sup>22</sup>	7	294.52	Atchison, Waterville, Kans. (C. Beh. U. P.).	33003	100.26
			Waterville, Greenleaf, Kans. (C. Beh. U. P.).	2633021	13.11
			Greenleaf, Concordia, Kans. (C. Beh. U. P.).	33022	43.19
			Concordia, Lenora, Kans. (C. Beh. U. P.). . . .	33026	138.70

<sup>1</sup> Clerk is relieved every third week by the additional clerk of Fort Scott, Kans., and Webb City, Mo., R. P. O., who alternates between this line, Fort Scott, Kans., and Webb City, Mo., R. P. O., and Yates Centre and Sedan, Kans., R. P. O.

<sup>2</sup> Clerk doubles route 33043 twice each round trip.

<sup>3</sup> Distance over route 29007 (7.30 miles) covered by Fort Smith, Ark., and Leland, Miss., R. P. O.

<sup>4</sup> One mile, covered by the Salisbury and Knoxville R. P. O.

<sup>5</sup> Balance of route covered by Chicago, Ill., Abbotsford, Wis., and Minneapolis, Minn., R. P. O. (185.54 miles) and by Milwaukee and Rugby Junction, Wis., pouch service (27.30 miles). (See Table C.)

<sup>6</sup> Reserve.

<sup>7</sup> North Division, Ashland to Appleton, Wis.

<sup>8</sup> One of these cars in reserve. There is double daily R. P. O. service between Appleton and Antigo, Wis.

<sup>9</sup> Balance of route (23.01 miles) covered by Eland and Wausau, Wis., pouch service. (See Table C.)

<sup>10</sup> South Division, Antigo to Milwaukee, Wis.

<sup>11</sup> Balance of route (17.33 miles) covered by Two Rivers and Manitowoc, Wis., pouch service. (See Table C.)

<sup>12</sup> Balance of route (21.21 miles) covered by Bayfield and Ashland Junction, Wis., pouch service. (See Table C.)

<sup>13</sup> Distance (19.60 miles) covered by Saint Paul, Minn., and Elroy, Wis., R. P. O.

in the United States on June 30, 1888—Continued.

Average weight of mail whole distance per day.	Date of last re-adjust- ment.	Average speed per hour (train num- bers taken from di- vision schedules).		Number of round trips with clerks per week.	Annual miles of service with clerks.	Average miles run daily by crews.	Number of mail cars, or cars in which are mail apartments.	Inside dimen- sions of cars or apartments (railway post- office cars in black figures).		Number of crews.	Number of clerks to crew.	Number of clerks ap- pointed to line.

<sup>14</sup> 25 miles shown as Greenville and Columbia R. P. O.

<sup>15</sup> Order March 2, 1888, establishing R. P. O. service to commence March 12, 1888.

<sup>16</sup> In reserve.

<sup>17</sup> Covered by lines in the second division, 2.40 miles.

<sup>18</sup> Runs on route 8045, Ashtabula to Andover, Ohio (24.50 miles).

<sup>19</sup> Shown in report of Oil City and Ashtabula R. P. O. In connection with Oil City and Ashtabula R. P. O. gives double service between Ashtabula and Andover, Ohio, daily, except Sunday.

<sup>20</sup> 2 miles, Eustis to Fort Mason; double daily 25 miles, Eustis to Leesburgh, reported in Table C; closed pouches.

<sup>21</sup> 72.71 miles shown as Palatka and Punta Gorda R. P. O.

<sup>22</sup> Double daily service between Atchison and Downs.

<sup>23</sup> Clerks on trains 403 and 404 run only to Downs, Kans. (209.36 miles).

<sup>24</sup> The clerk appointed to Downs and Stockton, Kans., R. P. O., also performs service on this line, acting as second clerk on trains 401 and 402; these clerks leave Atchison and Lenora car every day at Downs, and perform service on Downs and Stockton, Kans., R. P. O.; 1 helper on trains 403 and 404 between Atchison, Kans., and meeting point (78.55 miles).

<sup>25</sup> 7.58 miles of route 33021, between Washington and Greenleaf, Kans., covered by closed-pouch service. (See Table C.)

TABLE A<sup>o</sup>.—Statement of railway post-offices in operation

Designation of railway post-office. (Lines upon which railway post-office cars are paid for, in italics.)	Division.	Distance run by clerks, register to register.	Initial and terminal stations, running from east to west, north to south, or north to southeast (with abbreviated title of railroad company).	Number of route.	Miles of route for which railroad is paid.

<sup>1</sup> Owned by East Tenn., Va. and Ga. R.R. Co., 1 in reserve. (See Lynchburgh and Bristol R. P. O. Cars on that line run through to Chattanooga, Tenn.)

<sup>2</sup> Balance of route (373.92 miles) Sault de Ste. Marie, Mich., to Bruce, Wis., covered by closed pouches. (See Table C.)

<sup>3</sup> Reserve.

<sup>4</sup> Reserved cars.

<sup>5</sup> One transfer clerk, Waycross, Ga.; 1 transfer clerk, Albany, Ga.

<sup>6</sup> This line was formerly the Crill and West Alexandria R. P. O., 110.74 miles. August 22, 1887, service was extended to Carlisle, Ohio; increased distance 16.65 miles. October 10, 1887,

service was extended to Bryan, Ohio; increased distance 19.71 miles.

<sup>7</sup> Balance of route, between Bryan and Alvordton, Ohio, covered by closed pouches, 16.40 miles. (See Table C.)

<sup>8</sup> Distance (3 miles) covered by Peoria and Galesburgh, Ill., R. P. O.

<sup>9</sup> Larabee and Clermont clerk alternates with Dunkirk and Titusville clerk as a helper between Buffalo and Larabee.

<sup>10</sup> In reserve.

<sup>11</sup> Two helpers between Buffalo and Oil City.

<sup>12</sup> 49.53 miles covered by Salamanca and Oil City R. P. O.

in the United States on June 30, 1888—Continued.

Average weight of mail whole distance per day.	Date of last re-adjust- ment.	Average speed per hour (train num- bers taken from di- vision schedules).				Number of round trips with clerks per week.	Annual miles of service with clerks.	Average miles run daily by crews.	Number of mail cars, or cars in which are mail apartments.	Inside dimen- sions of cars or apartments (railway post- office cars in black figures).		Number of crews.	Number of clerks to crews.	Number of clerks ap- pointed to line.

<sup>13</sup> Cars and clerks shown on route No. 6061.

<sup>14</sup> One clerk runs from Buffalo to Jamestown and one from Salamanca to Jamestown—both between Jamestown and Youngstown. No service Sunday Buffalo to Jamestown.

<sup>15</sup> 29.70 miles covered by closed-pouch service. (See table C<sup>c</sup>.)

<sup>16</sup> Cars and clerks shown on route No. 6091.

<sup>17</sup> Balance of route (66.75 miles) covered by Cleveland, Youngstown and Pittsburgh R. P. O.

<sup>18</sup> Salamanca to Jamestown.

<sup>19</sup> 224.58 miles covered by Leavittsburgh and Cincinnati R. P. O.

<sup>20</sup> Cars run through between Chicago, Ill., and Union Pacific Transfer, Iowa. (See Chicago, Ill., and Burlington, Iowa, R. P. O.)

<sup>21</sup> Three clerks east on train No. 4; two clerks east on train No. 8.

<sup>22</sup> One clerk detailed as assistant to chief clerk at Burlington, Iowa.

<sup>23</sup> Balance of route, Winfield to Washington, Iowa (18.57 miles), covered by closed pouches. (See table C<sup>c</sup>.)

<sup>24</sup> One helper between Burlington and Keokuk, Iowa, and one helper between Winfield and Saint Louis, Mo.

<sup>25</sup> Balance of route (50.86 miles) covered by Mount Pleasant and Keokuk, Iowa, R. P. O.

<sup>26</sup> Distance (32.20 miles) covered by Saint Louis, Moberly, and Kansas City, Mo., R. P. O.

<sup>27</sup> Double daily service except Sunday.

TABLE A<sup>a</sup>.—Statement of railway post-offices in operation

in the United States on June 30, 1883—Continued.

Designation of railway post-office. (Lines upon which railway post-offices are paid for, in italics.)	Distance run by clerks, register to register.	Initial and terminal stations, running from east to west, north to south, or northwest to southeast (with abbreviated title of railroad company).	Number of route.	Miles of route, for which entitled to post.	Average weighted mail volume per day.	Date of last readjustment.	Train No. outward.	Average miles per hour (train number from division schedules).	Train No. inward.	Average miles per hour (train number from division schedules).	Number of cars or coaches with clerks per week.	Annual miles of service with clerks.	Average miles run daily by clerks.	Number of mail cars or coaches in which are mail apartments.	Inside dimensions of cars or apartments (railway post-office cars in black figures).	Length.	Width.	Number of clerks.	Number of clerks appointed to line.

<sup>1</sup> This line was formerly the Michigan City, Monon and Indianapolis, and Cincinnati, Hamilton and Indianapolis R. P. O.'s. December 15, 1837, run of clerks on Michigan City, Monon and Indianapolis R. P. O. was curtailed to end at Monon, Ind., and is now known as the Michigan City and Monon R. P. O.; distance 59.57 miles. (See that line.) Run of clerks on Cincinnati, Hamilton and Indianapolis trains 8 and 31 was extended to begin at Chicago.

<sup>2</sup> Covered by Chicago and Louisville R. P. O. (88.52 miles)

Four clerks run daily, except Sunday, over whole route, acting as helpers to Chicago and Louisville day line between Chicago, Ill., and Monon, Ind. One clerk runs daily, except Sunday, on trains 37 and 38, between Cincinnati, Hamilton and Indianapolis (see that line), thus making double daily service, except Sunday,

between Cincinnati, Hamilton, and Indianapolis.

<sup>4</sup> Covered by Toledo and Cincinnati R. P. O. (25.40 miles.)

<sup>5</sup> Distance (85.98 miles) covered by Chicago, Ill., and Minneapolis, Minn., R. P. O.

<sup>6</sup> One reserve.

<sup>7</sup> Two helpers between Waukesha, Wis., and North McGregor, Iowa; one clerk detailed to transfer duty at Prairie du Chien, Wis.

<sup>8</sup> Distance (163 miles) covered by Chicago, Ill., and Burlington, Iowa, R. P. O.

<sup>9</sup> Two of these cars in reserve.

<sup>10</sup> Through run.

<sup>11</sup> Two helpers on a through run between Chicago and Galesburgh, Ill.

<sup>12</sup> Short run; Galesburgh to Quincy, Ill.

<sup>13</sup> One car in reserve.

<sup>14</sup> Covered by Toledo and Cincinnati R. P. O. (25.40 miles).

in the United States on June 30, 1888—Continued.

Average weight of mail whole distance per day.	Date of last readjustment.	Average speed per hour (train numbers taken from division schedules).				Number of round trips with clerks per week.	Annual miles of service with clerks.	Average miles run daily by crews.	Number of mail cars or cars in which are mail apartments.	Inside dimensions of cars or apartments (railway post-office cars in black figures).		Number of crews.	Number of clerks to crew.	Number of clerks appointed to line.

<sup>14</sup> New service; not reported last year.

<sup>15</sup> 43.18 miles of route 33077, between Keystone and Barnard, Kans., covered by Keystone and Barnard, Kans., R. P. O., and 12.60 miles, between Strong and Bazaar, covered by closed-pouch service. (See Table C.)

<sup>16</sup> Reported last year as Montgomery and Somerville (n. o.), Tex.; increased distance, 15.93 miles.

<sup>17</sup> Double daily service: full postal-car service on trains 1 and 2, and mail-apartment service on trains 3 and 4. Last year there was only mail-apartment service on all trains.

<sup>18</sup> Clerks do not run over branches of route 28006 from Winthron Junction to East Atchison (1.10 miles), and from Payne to Eastport, Iowa (3.62 miles). Two helpers, one on each line, from Kansas City to Saint Joseph, Mo. (67 miles).

TABLE A<sup>a</sup>.—Statement of railway post-offices in operation

Designation of railway post-office. (Lines upon which railway post-office cars are paid for, in <i>italics</i> ).	Division.	Distance run by clerks, register to register.	Initial and terminal stations, running from east to west, north to south, or northwest to southeast (with abbreviated title of railroad company).	Number of route.	Miles of route for which railroad is paid.
